Cheltenham
Glos GL50 2BN

Civil Aviation Statistics for earlier years Statistics for the period from January 1968 to December 1972 were published in the Civil Aviation Series of the Department of Trade & Industry's *Business Monitors*. The series comprise:

CA. 1	<i>Airport activity</i>	(Monthly)
CA. 2	<i>Air passengers</i>	"
CA. 3	<i>Air freight & mail</i>	"
CA. 4	<i>Airline operations</i>	"
CA. 5	<i>Airline operations</i>	(Quarterly)
CA. 6	<i>Domestic passenger traffic</i>	"
CA. 7	<i>Air passengers – international and cabotage</i>	"
CA. 8	<i>Airline financial statistics</i>	(Annually – 1968 to 1971 only)

Annual versions of CA. 1 to CA. 7 were also published

Civil Aviation Authority

CAA Monthly Statistics

APRIL 1974

CAA Monthly Statistics is prepared by the Civil Aviation Authority with the co-operation of the United Kingdom airport and airline operators; some of this information is required by the Civil Aviation Act, 1971. Statistics for the Channel Islands airports are provided by the Commandant for Jersey Airport and the Office of the Lieutenant Governor for Guernsey and Alderney Airports. The assistance from all these authorities is gratefully acknowledged.

Some of the figures included in *CAA Monthly Statistics* are provisional only and may be revised in later issues. Figures contained in monthly and quarterly tables have not been seasonally adjusted, but figures are given, in the tables covering past years, for the most recent six months and the corresponding six months one year earlier.

Chief Statistician
Civil Aviation Authority
Aviation House
129 Kingsway
LONDON WC2B 6NN

Symbols and Abbreviations The following are used throughout:

- + = UK Customs airport
- .. = not available
- = nil or less than half the final digit shown
- n.e.i. = not elsewhere included
- a.t-km = available tonne-kilometres

A.T. Movements = Air Transport Movements

Rounding of figures In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

Units of measurement Metric measurements are used throughout *CAA Monthly Statistics*.

- Tonne = 1000 kilograms
- Tonne-kilometres = The product obtained by multiplying the number of tonnes carried by the distance flown measured in kilometres

Conversion factors (foot/pound system to metric system)

- 1 short ton (2000 lbs) = 0.9072 tonnes
- 1 ton (2240 lbs) = 1.0160 tonnes
- 1 statute mile (5280 feet) = 1.6093 kilometres
- 1 short ton-mile = 1.4600 tonne-kilometres

The explanations of other terms used throughout the Tables are contained in the section on Definitions immediately following the Tables.

Civil Aviation Statistics—January 1974

Activity at UK Airports

Although air transport movements in January were still below 50 000 a growth of 2·2 per cent was achieved on January 1973. A comparison of the two three month periods ending January 1973 and January 1974 shows growth of 4·9 per cent. In the London area movements in January 1974 declined fractionally compared with the month of January 1973, although when comparing the three month periods as above a growth of 1·5 per cent is evident. The greatest increase in actual movements was recorded at Heathrow (310 additional ATMs per month; 1·6 per cent growth) followed by Gatwick (185 ATMs; 3·9 per cent growth) and Southend (60 ATMs; 7·6 per cent growth) which also had the greatest percentage growth amongst the London area airports. The declines at Luton and Stansted continued over this period at 8·0 and 7·0 per cent respectively. At airports elsewhere in the UK there was an aggregate growth of 5·1 per cent between January 1973 and January 1974 and 9·3 per cent when comparing the monthly averages of the two November-January periods. Scottish airports presented the greatest increases in actual movements; Glasgow recorded the highest (332 additional ATMs per month; 11·5 per cent growth) and was followed by Aberdeen (311 ATMs; 64·5 per cent growth) and Sumburgh, which replaced East Midlands in third place, with 206 ATMs and 80·2 per cent growth. During the November-January periods referred to above, there was a growth in ATMs of 6·6 per cent in charter services and 4·5 per cent in scheduled services. UK operators increased their share of scheduled traffic movements by 1·6 percentage points to 73·3 per cent, but their share of charter traffic movements fell by less than one percentage point to 88 per cent.

The monthly average of 2·7 million passengers handled over the three month period November 1973 to January 1974 was 8·0 per cent greater than in the corresponding period one year earlier. London area airports reported a combined growth of 8·7 per cent over this period. Heathrow had both the greatest actual increase in passengers and the greatest growth rate (152 296 additional passengers per month and 11·9 per cent growth) while Luton and Stansted both reported declines (6·5 per cent and 22·1 per cent respectively). Over both the three month period November 1973/January 1974 and the month of January airports elsewhere in the United Kingdom reported a lower rate of growth than the London area (6·4 per cent and 2·8 per cent respectively). The greatest percentage growth was reported by Sumburgh (79·1 per cent) whilst Glasgow achieved the largest actual increase in passengers (16 348 additional passengers per month; 11·9 per cent growth) followed by Edinburgh (6 784 passengers; 13·4 per cent growth) and Aberdeen (6 723 passengers; 47·8 per cent growth). The 8·0 per cent growth in total terminal passengers at UK airports comprised a 12·3 per cent increase in passengers travelling by scheduled services and a decrease of 5·0 per cent in those using charter services. UK operators' share of scheduled service passengers grew slightly from 66·8 per cent to 67·6 per cent whilst their share of charter service passengers decreased by 1·7 percentage points to 87·3 per cent.

During the November/January 1973/74 period, of the

monthly average 2·7 million terminal passengers who used UK airports, 1·9 million travelled by international services and 0·8 million by domestic services. These figures represent growths of 6·4 per cent and 13·0 per cent respectively against the corresponding period of the year before.

Over this three months period November/January 1973/74 a monthly average of 1·3 million international passengers travelled by scheduled services, an increase of 13·2 per cent on the corresponding period a year earlier, whilst 0·6 million travelled by charter services, a decline of 6·5 per cent. The most heavily used scheduled services continued to be those to and from the USA carrying 13·3 per cent of total scheduled passengers, followed by those to and from France carrying 12·5 per cent of the total. The growth of these services since the November/January period 1972/73 was 5·4 per cent and 1·9 per cent respectively. Services to and from the Irish Republic were again the third most heavily used; 9·0 per cent of total passengers were carried representing a growth of 9·8 per cent. Services to Spain continued to carry the greatest proportion of charter traffic, although a decline of 9·0 per cent was recorded against the corresponding period the year before. Services to Germany and Italy maintained their previous order in popularity; the former carrying 8·2 per cent of total charter passengers (with a fractional growth on last year) the latter carrying 7·3 per cent (with a decline of 9·5 per cent on the corresponding period the year before).

During the November/January period 1973/74 the monthly average number of passengers flying on domestic routes amounted to over 435 000; a 14·8 per cent growth on the corresponding period 1972/73. Over this period both the Scottish and non-Scottish routes into and out of London shared a similar growth rate with the London routes as a whole (17·2, 17·0 and 17·1 per cent respectively). The rate of growth in passengers on services between London and the Channel Islands was slightly less at 16·2 per cent but on services between the Channel Islands and the rest of the UK it reached 27·4 per cent.

Over 57 000 tonnes of cargo was picked up or set down at UK airports during January 1974 and this represented a growth of 7·7 per cent on January 1973. Over the November/January period 1973/74 a growth of 9·1 per cent on the corresponding period a year earlier resulted in a monthly average of almost 60 000 tonnes being handled. The London area airports reported the movement of a monthly average of 46 000 tonnes (8·7 per cent growth); Heathrow continued to report the greatest increase in actual volume (2135 additional tonnes a month) whilst Gatwick and Stansted reported the largest growth (27·3 and 42·6 per cent respectively). Outside the London area a higher growth rate was reported; 9·3 per cent for the month of January, 10·2 per cent over the three month period. Prestwick again recorded the largest increase in actual tonnes handled (658 additional tonnes per month) followed once more by Glasgow and Manchester (315 and 294 tonnes respectively). Cargo carried during the November/January period 1973/74 by scheduled services grew by 6·6 per cent and that by charter services by 27·8 per cent, growth in the former declining and in the latter increasing from the last period published.

The UK operators' share of cargo carried by scheduled services declined by 1·6 percentage points to 50·7 per cent and 4·1 percentage points to 69·7 for charter services.

Output of UK Airlines

In January 1974 the output of UK airlines for all services was 573·9 million available tonne-kilometres, a decline of over 6 per cent on January 1973 and of nearly 16 per cent on December 1973.

The scheduled service output of over 392 million available tonne-kilometres showed an unchanged position from January 1973, but passengers and cargo uplifted at 1·1 million and over 23 600 tonnes respectively were both higher than January 1973 thus achieving an overall load factor of 54·6 per cent compared with 52·2 in January 1973. The seat factor on domestic services was 66·8 per cent compared with 58·3 per cent in January 1973 and that on international services was 57·6 per cent compared with 54·9 per cent.

The output for non-scheduled services in January 1974

was over 180 million available tonne-kilometres compared with over 204 million in December (a decrease of 11·6 per cent) and over 219 million in January 1973 (a decrease of 17·7 per cent). Inclusive tour charters accounted for 36·8 per cent of the total non-scheduled output, a slight increase on both December and January 1973; Advance Booking Charters, accounting for 2·2 per cent of the total non-scheduled output, retained their share of the total non-scheduled output. The seat factor on inclusive tour charters in January 1974 was 74·3 compared with 73·7 in December 1973 and 77·2 in January 1973, while Advance Booking Charters carried 4827 passengers providing a seat factor of 73·1 per cent.

NOTE: Statistics of airport activity, passengers and cargo are derived from data supplied by airports. Airline statistics are based on data supplied by the airlines. Data from the two sources are not strictly comparable. There are small differences in timing and more significant differences arising because airlines are not asked to report non-revenue passengers and cargo.

Size Structure of UK Airports and Airlines Year ended 31 December 1973

London includes Heathrow, Gatwick and Stansted.

S.E. England includes Ashford, London, Luton, Lydd, Manston and Southend.

N. England comprises the airports in England north of a line from the Mersey to the Humber (Manchester, Liverpool, Blackpool, Newcastle, Leeds/Bradford and Tees-side).

Glasgow includes Prestwick and Abbotscinch.

- (a) N. France comprises the airports north of a line of 49° latitude.
- (b) Soviet Union and Eastern Europe includes the United Soviet Socialist Republics, Bulgaria, Czechoslovakia, Hungary, Poland, Roumania and the Eastern Zone of Germany but excluding Berlin.
- (c) North Africa includes Algeria, Libya, Morocco and Tunisia.
- (d) Commonwealth countries only.
- (e) Commonwealth countries including Rhodesia.
- (f) Middle East includes Iraq, Iran, Israel, Jordan, Lebanon, Persian Gulf States, Saudi Arabia, Sudan and the United Arab Republic.
- (g) Total is in respect of charter passengers only. Passengers on scheduled flights included in London — Other Italy.
- (h) Total is in respect of charter passengers only. Passengers on scheduled flights included in other routes to Italy.

The figures show the uplift and discharge of passengers at United Kingdom airports on services operated there according to their immediate destination or last point of embarkation overseas on those services. These may not, in all cases, be the origin or destination of passenger journeys: they may be places at which a journey was broken or a connection made with another air service. The figures in this table include all passengers carried on scheduled and charter services excluding those carried on aircraft chartered by Government Departments.

Domestic Passengers by Main Routes

(a) Heathrow, Gatwick and Stansted
 Traffic counted in either direction

The figures show the uplift and discharge of passengers according to the destination and origin of the route. Because of the method of collection of this information there are discrepancies between the reports received from airports on a route, particularly in the case of multi-sector flights. In most cases, however, the discrepancies are small, but in a few cases the figures include an estimated component.

† Variable charges can be made against only those licences issued under the revised system that came into effect on 1 January 1974; immediate conversion to the revised system did not take place in all cases. In the table above activities that continued under old-style licences have been included under the equivalent revised licence classes; for example, activity under Class A licences has been listed under Class 1, but were not in fact chargeable.

Definitions

AIRPORT ACTIVITY

An air transport movement	is a landing or a take-off of an aircraft engaged on commercial air transport. The types of movement covered are all scheduled service movements, whether loaded or empty, and charter movements transporting passengers or cargo from one point to another. All other types of commercial flying are excluded (e.g. flights returning to the airport of take-off without landing elsewhere, empty charter positioning flights paid for by the charterer, ferrying of empty aircraft, etc.).
Empty charter positioning flights	are flights by chartered aircraft moving into position for transport flights or returning to base after such flights.
Other commercial flights	are miscellaneous non-transport charter flights (e.g. commercial delivery or ferry of empty aircraft and local flights for the Press, survey companies or farmers).
Test and training flights	are flights for the purpose of testing aircraft or airports, or for training flying crew or ground personnel. Also included in this category are demonstration flights by makers or sellers of aircraft and aviation equipment. Aero-club instructional flights are excluded from this category and shown under 'Aero-club'.
Other non-commercial flights	by air transport operators are flights by air transport operators for the sole purpose of moving their own aircraft, personnel or stores from one place to another, and air transport flights forced to return to base by bad weather, engine failure or other causes.
Private flights	are flights for purely private purposes by private owners or other private aircraft operators, excluding aero-club flights.
Aero-club flights	are flights operated by aero-club members for instruction or pleasure.
Official flights	are flights for official purposes by British or foreign civil Government Departments excluding air transport movements.
Military flights	are flights by British or foreign military personnel exclusively for military purposes.

AIR PASSENGERS

Passengers	includes all revenue and non-revenue passengers on air transport flights. Air crew being carried on such flights other than as members of the aircraft's complement are classified as non-revenue passengers.
Revenue passengers	are those who pay 25 per cent or more of the normal applicable fare.
A terminal passenger	is a passenger joining or leaving the aircraft flight at the reporting airport. A passenger travelling between two reporting airports is counted twice, once at each airport.
A transit passenger	is a passenger who arrives at and departs from a reporting airport on the same aircraft which is transiting the airport. Each transit passenger is counted once only and not once on arrival and once on departure.

International services	are services flown between the United Kingdom (including Great Britain, Isle of Man, Channel Islands and Northern Ireland) and places outside.
Domestic services	are services flown entirely within Great Britain, Isle of Man, Channel Islands and Northern Ireland.
Cabotage	is traffic carried between territories of the United Kingdom other than domestic services.
Scheduled services	are those performed according to a published timetable, including those supplementary thereto, and open to use by members of the public.
Non-scheduled services	include all air transport flights other than scheduled services.
Charter services	are those transporting passengers or cargo for hire or reward from one point to another, other than scheduled services.

AIR CARGO

Cargo	in airport statistics means the weight of cargo (including accompanied vehicles) picked up and set down by aircraft on air transport flights. Cargo in transit through the airport on the same aircraft is excluded as is mail, company stores, excess baggage and diplomatic bags picked up and set down. (See also definition below under 'Airline Operations').
Tonnes	are metric tonnes of 1 000 kilograms (2 204·62 lb).

AIRLINE OPERATIONS

Advance Booking Charters (ABC)	Charter flights operated under Class 2 licences between the UK and designated territories overseas in respect of which an operator has sold blocks of seats to one or more licensed travel organisers for resale to passengers. Details of the sales to travel organisers have to be notified to the Civil Aviation Authority 120 days before the date of the flight: details of the sales of seats to passengers which must be on a round trip basis have to be notified to the Authority 60 days before departure.
Aircraft-hour	an aircraft hour is performed when an aircraft flies for one hour: aircraft hours are measured on the basis of block-to-block time.
Aircraft-kilometre (Aircraft-km)	An aircraft-kilometre is performed when an aircraft flies one kilometre. Aircraft-kilometres equal the sum of the products obtained by multiplying the number of flights performed on each stage flight by the stage distance measured in kilometres.
Cargo	in airline statistics means the weight of any property carried on an aircraft, including the weight of vehicles carried, mail and diplomatic bags, but excluding passengers' baggage. (See also definition above for 'Air Cargo' statistics and definition below for 'Passenger tonne-kilometres').
Cargo tonne-km	means a metric tonne of cargo carried one kilometre. Cargo tonne-kilometres equal the sum of products obtained by multiplying the number of tonnes of cargo carried on each flight stage by the stage distance measured in kilometres.

Cargo uplifted	means the number of tonnes of cargo which is obtained by counting each tonne of cargo on a particular flight (with one flight number) once only and not repeatedly on each individual stage of that flight. The only exception to this is for cargo flown on both the international and domestic stages of the same flight which is considered in computation both as a domestic and an international shipment or despatch.
Daily utilisation per a/c (hrs)	is an average per aircraft measure computed by dividing the aircraft hours of use by the number of days on which the aircraft are available. This latter figure includes days required for maintenance and overhaul but it does not include days between the date of purchase and the date actually placed in service, days out of service due to major accidents or conversion, days when an aircraft is in the possession of others or is not available because of government action, such as grounding by government order.
Exempt operations	are operations for which a licence is not required. The Civil Aviation Authority in pursuance of its powers under paragraph (a) of Section 21(2) of the Civil Aviation Act 1971 has by an instrument dated 29 March 1972 and later instruments specified a number of types of flights for which a licence is not required. The specifications of such flights are published in the Authority's Official Record Series 1 but typical examples are ambulance flights, aircrew training and test flights, Government charters, helicopters carrying externally suspended loads, etc.
Inclusive tours (IT)	are separate fare charters where the cost to the passenger includes the cost of accommodation.
Licence	means an air transport licence granted under Section 22 of the Civil Aviation Act 1971.
Mail	covers only that handled by postal administrations and includes troop mail.
Mail tonne-km	are calculated using the same principle as when calculating cargo tonne-km.
Overall load factor	is an expression of tonne-km used as a percentage of tonne-km available.
Passengers	in airline statistics means revenue passengers only, i.e. passengers paying 25 per cent or more of the normal fare.
Passenger-km	means a passenger carried one kilometre. Calculation of passenger-kilometre equals the sum of the products obtained by multiplying the number of passengers carried on each flight stage by the stage distance measured in kilometres. The resultant figure is equal to the number of kilometres travelled by all passengers. Note. Passenger-km is numerically equivalent to seat-km used.
Passenger load factor	is an expression of seat-km used as a percentage of seat-km available.
Passengers uplifted and passengers carried	The number of passengers uplifted is obtained by counting each revenue passenger on a particular flight (with one flight number) once only and not repeatedly on each individual stage of flight.
Passenger tonne-kilometres	is deduced as the difference between the total tonne-kilometres used and tonne-kilometres used for cargo and/or mail; it includes the weight of passengers' free and excess baggage.

Seat-km available	a seat-kilometre is available when a seat is flown one kilometre. Seat-kms available are equal to the sum of the products obtained by multiplying the number of passenger seats available for sale on each stage flight by the stage distance measured in kilometres.
Seat-km used	a seat-kilometre is used when a seat occupied by a revenue passenger is flown for one kilometre. Seat-km used is equal to the sum of the products obtained by multiplying the number of revenue passengers carried on each stage flight by the stage distance measured in kilometres.
Separate fare charters	are those where the charterer re-sells part of the capacity of the aircraft to the public at large; an organisation, etc.
Sole-use charters	are those where the charterer has exclusive use of the whole capacity of the aircraft and does not dispose of any of it to third persons for reward.
Stage flights	that part of the flight between two consecutive places, i.e. from take-off to the next landing, excluding technical stops, on the route.
Tonne-km available	a metric tonne of payload space available flown one kilometre. Tonne-km available is equal to the sum of the products obtained by multiplying the number of tonnes available for the carriage of revenue load (passengers and cargo) on each stage flight by the distance measured in kilometres.
Tonne-km used	a metric tonne of revenue load carried one kilometre. Tonne-km used is the sum of the products obtained by multiplying the number of tonnes of revenue load (passengers and cargo) carried on each stage flight by the distance measured in kilometres.

Classes of Licence

NB These definitions are not intended as a comprehensive statement of each type of licence. They define the general purpose of the types of flights authorised by each class of licence. The specification for each class of licence is published in the Civil Aviation Authority Official Record Series 1.

Class 1 authorises scheduled service flights;

Class 2 authorises advance booking charter flights;

Class 3 authorises inclusive tour charter flights;

Class 4 authorises other charter flights for the carriage of passengers;

Class 5 authorises substitute charter flights;

Class 6 authorises charter flights for the carriage of cargo and attendants;

Class 7 authorises sole-use charter flights.
