up to and including April 1973

Civil Aviation Authority

CAA Monthly Statistics

JULY 1973

CAA Monthly Statistics is prepared by the Civil Aviation Authority with the co-operation of the United Kingdom airport and airline operators; some of this information is required by the Civil Aviation Act, 1971. Statistics for the Channel Islands airports are provided by the Commandant for Jersey Airport and the Office of the Lieutenant Governor for Guernsey and Alderney Airports. The assistance from all these authorities is gratefully acknowledged.

Some of the figures included in *CAA Monthly Statistics* are provisional only and may be revised in later issues. Figures contained in monthly and quarterly tables have not been seasonally adjusted, but figures are given, in the tables covering past years, for the most recent six months and the corresponding six months one year earlier.

Chief Statistician
Civil Aviation Authority
Aviation House
129 Kingsway
LONDON WC2B 6NN

Symbols and Abbreviations The following are used throughout:

- + = UK Customs airport
- .. = not available
- = nil or less than half the final digit shown
- n.e.i. = not elsewhere included
- a.t-km = available tonne-kilometres

A.T. Movements = Air Transport Movements

Rounding of figures In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

Units of measurement Metric measurements are used throughout *CAA Monthly Statistics*.

- Tonne = 1000 kilograms
- Tonne-kilometres = The product obtained by multiplying the number of tonnes carried by the distance flown measured in kilometres

Conversion factors (foot/pound system to metric system)

- 1 short ton (2000 lbs) = 0.9072 tonnes
- 1 ton (2240 lbs) = 1.0160 tonnes
- 1 statute mile (5280 feet) = 1.6093 kilometres
- 1 short ton-mile = 1.4600 tonne-kilometres

The explanations of other terms used throughout the Tables are contained in the section on Definitions immediately following the Tables.

Civil Aviation Statistics—April 1973

Activity at UK Airports

During April there were more than 60 000 air transport movements at UK airports and this shows an apparent growth of 14·4 per cent on 1972. This is in part because in 1973 Easter traffic movements fell entirely in April, whereas last year the pre-Easter traffic fell in March. Comparison of the three months February to April shows a growth of 11·1 per cent between the two years. (In this comparison, and in similar comparisons throughout this article, figures for February to April 1972 have been adjusted to allow for the fact that 1972 was a Leap Year.)

The rate of growth at the London area airports was much lower than the national average, 6·7 per cent over the comparable three months period. Gatwick and Heathrow were close to the London Area average, but Luton traffic increased by 13·6 per cent, and Stansted's fell by 17·5 per cent. There were substantial increases at all of the major provincial airports, especially Manchester, Birmingham, Newcastle, Edinburgh, Glasgow and Belfast. An exception to the general rule was Prestwick whose traffic declined by 13·4 per cent, more steeply than previously. UK airlines accounted for most of the increased movements, with 11·3 per cent more scheduled services and 21·9 per cent more charter flights. Total charter flights including foreign operators increased by 23·4 per cent, but scheduled services by only 8·6 per cent.

Comparing the three months period February to April the number of terminal passengers rose by 17·6 per cent over the last year. As in recent months, the growth in the provinces (25·4 per cent) was substantially greater than in the London area (14·8 per cent). But 70% of total UK passengers still used London area airports. There were large increases in numbers of passengers at Heathrow (16·5 per cent) and Gatwick (13·2 per cent) and also at Southend, the first to be recorded in more than a year; passenger numbers at Stansted continued to fall. At the airports outside the London area, traffic at Manchester (23·5 per cent) and Glasgow (26·0 per cent) showed notable buoyancy, as was also true of other major provincial airports; exceptionally Prestwick had a relatively large fall (32·0 per cent). Passenger numbers on scheduled flights over the three months were up by 15·8 per cent and on charter flights by 23 per cent. UK operators marginally increased their share of passengers (74·4 per cent this year compared with 73·3 per cent last year), increasing their share on scheduled services (+1·6 per cent) but losing ground marginally on charters (-0·8 per cent).

During the three months February to April 1973 the number of passengers arriving from or departing on international flights was over 6 million, over 70 per cent of the total number of terminal passengers. At London area airports the proportion of international passengers was even higher, over 85 per cent of the total. Outside the London area, the number of international passengers was less than 1 million, but although small in absolute magnitude, it is this sector which, relatively, is now growing most rapidly, at 35·7 per cent against the London area's 14·5 per cent compared with last year.

*For the three months February to April routes to or from the USA accounted for the largest share (13·4 per cent) of international scheduled services. Close behind was France (13·0 per cent) followed by

Germany (9·8 per cent) and the Netherlands and the Irish Republic (8·7 per cent each). The number of passengers on the USA routes increased by 18·6 per cent over 1972, a higher growth than the 14·5 per cent for passengers on all international scheduled services. Routes to or from Spain continued to be by far the most popular for passengers on charter flights with 42·4 per cent of the total, followed by Italy (10·3 per cent) and Germany (8·7 per cent). The Spanish routes had a growth of 33·3 per cent compared with 23·7 per cent for all international charter passengers and appear to be holding on to their dominant position. Italy had a 27·4 per cent growth but Germany had a slight fall of 3·2 per cent. Passengers travelling on the domestic routes of the UK totalled more than 2·5 million in the three months February to April 1973, 18·9 per cent more than a year ago. The principal area of growth continues to be the services between London and Scotland.

Cargo handled at UK airports in April amounted to nearly 54 000 tonnes, 12·9 per cent more than a year ago. This is a smaller increase than in recent months, the growth rate for February to April compared with 1972 being 17 per cent. London area airports had a better month than the country's airports as a whole with a 22·7 per cent increase. The more uneven performance at airports outside the London area produced a small decline in April, but an increase of 19·8 per cent for the three months ending in April. Of the total UK air cargo, 76 per cent is handled by the London area airports, and Heathrow alone accounts for 64 per cent of the total.

Output of UK Airlines

The Advance Booking Charter services commenced in April and statistics are now included. The details are in a separate table, Table 25, on page 42, and the summary tables 9.1, 9.2, 9.3, 29.1 and 29.2 include ABC statistics. In April 1973 the output of UK airlines for scheduled and non-scheduled services together amounted to 696 million available tonne-kilometres which is about the same as in March, but is 12·5 per cent higher than April 1972.

Scheduled services accounted for 458 million available tonne-kilometres (65·8 per cent of the total), a growth of 10 per cent on April 1972. The UK airlines carried nearly 1·5 million passengers and nearly 24 000 tonnes of cargo in the month, and achieved an overall load factor of 53·3 per cent; this compares with 48·0 per cent in April 1972. Seat-kilometres used as a percentage of those available increased to 57·0 per cent from 51·1 per cent in April 1972. This factor was 56·4 per cent on international services and 63·3 per cent on domestic services.

The total output for non-scheduled services in April was 238 million available tonne-kilometres, an increase of 17·8 per cent on April 1972. Inclusive Tour Charters accounted for 108 million available tonne-kilometres, 45 per cent of all non-scheduled output.

NOTE: Statistics of airport activity, passengers and cargo are derived from data supplied by airports. Airline statistics are based on data supplied by the airlines. Data from the two sources is not strictly comparable. There are small differences in timing, and more significant differences arise because airlines are not asked to report non-revenue passengers and cargo.

Analysis of Inclusive Tour Charter Traffic by Passenger Destination and Nationality of Carrier

A general survey of Inclusive Tour Charter traffic was published in the June edition of Monthly Statistics. Since that article was prepared we have been asked, by a British airline operating in this market, for more specific information about traffic flows.

As this type of analysis may be of general interest we take this opportunity of publishing some estimates of the principal ITC traffic flows and the division of the traffic between British and foreign airlines. The figures combine information from different sources, and for

foreign airlines the amount of estimation required has been rather greater than for British airlines. The accuracy of the figures is not as great as might be inferred from the detail in which they are presented. Nevertheless, we believe they provide a sound guide to the main traffic flows.

A summary table is given opposite, and on pages 4 and 5, winter (5 months) and summer (7 months) are given in country detail.

The above figures are derived from airport statistics.

(a) Excluding passengers to and from the Irish Republic.

(b) Passengers to and from North Africa and Middle East countries have been attributed to the European continent and Mediterranean Sea area.

(c) Commonwealth countries only.

London includes Heathrow, Gatwick and Stansted.

S.E. England includes Ashford, London, Luton, Lydd and Southend.

N. England comprises the airports in England north of a line from the Mersey to the Humber (Manchester, Liverpool, Blackpool, Newcastle, Leeds/Bradford and Tees-side).

Glasgow includes Prestwick and Abbotscinch.

- (a) N. France comprises the airports north of the line of 49° latitude.
- (b) Soviet Union and Eastern Europe includes the United Soviet Socialist Republics, Bulgaria, Czechoslovakia, Hungary, Poland, Roumania and the Eastern Zone of Germany but excluding Berlin.
- (c) North Africa includes Algeria, Libya, Morocco and Tunisia.
- (d) Commonwealth countries only.
- (e) Commonwealth countries including Rhodesia.
- (f) Middle East includes Iraq, Iran, Israel, Jordan, Lebanon, Persian Gulf States, Saudi Arabia, Sudan and the United Arab Republic.
- (g) Total is in respect of charter passengers only. Passengers on scheduled flights included in London – Other Italy.
- (h) Total is in respect of charter passengers only. Passengers on scheduled flights included in other routes to Italy.

The figures show the uplift and discharge of passengers at United Kingdom airports on services operated there according to their immediate destination or last point of embarkation overseas on those services. These may not, in all cases, be the origin or destination of passenger journeys; they may be places at which a journey was broken or a connection made with another air service. The figures in this table include all passengers carried on scheduled and charter services excluding those carried on aircraft chartered by Government Departments.

Domestic Passengers by Main Routes

(a) Heathrow, Gatwick and Stansted

(b) 'Glasgow' includes Prestwick and Abbotscinch
 Traffic counted in either direction

The figures show the uplift and discharge of passengers according to the destination and origin of the route. Because of the method of collection of this information there are discrepancies between the reports received from airports on a route, particularly in the case of multi-sector flights. In most cases, however, the discrepancies are small, but in a few cases the figures include an estimated component.

Tables 24, 25 and 26 cover all operations performed under Classes B, C, D, E (types I and VI) and Class 2 licences. The division between 'inclusive tours' (Table 24) 'advance booking charters' (Table 25) and 'other separate fare charters' (Table 26) is based on the terms of the various licences. A service is an inclusive tour service where the tariff includes the cost of accommodation.

Definitions

AIRPORT ACTIVITY

- An air transport movement** is a landing or a take-off of an aircraft engaged on commercial air transport. The types of movement covered are all scheduled service movements, whether loaded or empty, and charter movements transporting passengers or cargo from one point to another. All other types of commercial flying are excluded (e.g. flights returning to the airport of take-off without landing elsewhere, empty charter positioning flights paid for by the charterer, ferrying of empty aircraft, etc.).
- Empty charter positioning flights** are flights by chartered aircraft moving into position for transport flights or returning to base after such flights.
- Other commercial flights** are miscellaneous non-transport charter flights (e.g. commercial delivery or ferry of empty aircraft and local flights for the Press, survey companies or farmers).
- Test and training flights** are flights for the purpose of testing aircraft or airports, or for training flying crew or ground personnel. Also included in this category are demonstration flights by makers or sellers of aircraft and aviation equipment. Aero-club instructional flights are excluded from this category and shown under 'Aero-club'.
- Other non-commercial flights** by air transport operators are flights by air transport operators for the sole purpose of moving their own aircraft, personnel or stores from one place to another, and air transport flights forced to return to base by bad weather, engine failure or other causes.
- Private flights** are flights for purely private purposes by private owners or other private aircraft operators, excluding aero-club flights.
- Aero-club flights** are flights operated by aero-club members for instruction or pleasure.
- Official flights** are flights for official purposes by British or foreign civil Government Departments excluding air transport movements.
- Military flights** are flights by British or foreign military personnel exclusively for military purposes.

AIR PASSENGERS

- Passengers** includes all revenue and non-revenue passengers on air transport flights. Air crew being carried on such flights other than as members of the aircraft's complement are classified as non-revenue passengers.
- Revenue passengers** are those who pay 25 per cent or more of the normal applicable fare.
- A terminal passenger** is a passenger joining or leaving the aircraft flight at the reporting airport. A passenger travelling between two reporting airports is counted twice, once at each airport.

A transit passenger is a passenger who arrives at and departs from a reporting airport on the same aircraft which is transiting the airport. Each transit passenger is counted once only and not once on arrival and once on departure.

International services are services flown between the United Kingdom (including Great Britain, Isle of Man, Channel Islands and Northern Ireland) and places outside.

Domestic services are services flown entirely within Great Britain, Isle of Man, Channel Islands and Northern Ireland.

Cabotage is traffic carried between territories of the United Kingdom other than domestic services.

Scheduled services are those performed according to a published timetable, including those supplementary thereto, and open to use by members of the public.

Non-scheduled services include all air transport flights other than scheduled services.

Charter services are those transporting passengers or cargo for hire or reward from one point to another, other than scheduled services.

AIR CARGO

Cargo means the weight of cargo (including accompanied vehicles) picked up and set down by aircraft on air transport flights. Cargo in transit through the airport on the same aircraft is excluded as is mail, company stores, excess baggage and diplomatic bags picked up and set down. (See also definition below when used in airline statistics where mail and excess baggage are included.)

Tonnes are metric tonnes of 1000 kilograms (2 204·62 lb.)

AIRLINE OPERATIONS

Aircraft-kilometre an aircraft-kilometre is performed when an aircraft flies one kilometre.

(Aircraft-km) Aircraft-kilometres equal the sum of the products obtained by multiplying the number of flights performed on each stage flight by the distance measured in kilometres.

Stage flights that part of the flight between two consecutive places, i.e. from take-off to the next landing, excluding technical stops, on the route.

Aircraft-hour an aircraft hour is performed when an aircraft flies for one hour: aircraft hours are measured on the basis of block-to-block time.

Passengers uplifted The number of passengers uplifted is obtained by counting each revenue passenger on a particular flight (with one flight number) once only and not repeatedly on each individual stage of flight, with the single exception that a passenger flying on both the international and domestic stages of the same flight would be counted as both a domestic and an international passenger.

Seat-km available a seat-kilometre is available when a seat is flown one kilometre. Seat-km available is equal to the sum of the products obtained by multiplying the number of passenger seats available for sale on each stage flight by the distance measured in kilometres.

Seat-km used a seat-kilometre is used when a seat occupied by a revenue passenger is flown for one kilometre. Seat-km used is equal to the sum of the products obtained by multiplying the number of revenue passengers carried on each stage flight by the distance measured in kilometres.

Passenger load factor is an expression of seat-km used as a percentage of seat-km available.

Tonne-km available a metric tonne of payload space available flown one kilometre. Tonne-km available is equal to the sum of the products obtained by multiplying the number of tonnes available for the carriage of revenue load (passengers and cargo) on each stage flight by the distance measured in kilometres.

Tonne-km used a metric tonne of revenue load carried one kilometre. Tonne-km used is the sum of the products obtained by multiplying the number of tonnes of revenue load (passengers and cargo) carried on each stage flight by the distance measured in kilometres.

Overall load factor is an expression of tonne-km used as a percentage of tonne-km available.

Cargo means any property carried on an aircraft. In airline statistics it includes the weight of vehicles carried, excess baggage, mail and diplomatic bags (see also definition above for air cargo statistics where mail, excess baggage, company stores and diplomatic bags are excluded).

Mail covers only that handled by postal administrations and includes troop mail.

Separate Fare Charters are those where the charterer re-sells part of the capacity of the aircraft to the public at large; an organisation, etc.

Advance Booking Charters Charter flights operated under Class 2 licences between the UK and designated territories overseas in respect of which an operator has sold blocks of seats to one or more licensed travel organisers for resale to passengers. Details of the sales to travel organisers have to be notified to the Civil Aviation Authority 120 days before the date of the flight; details of the sales of seats to passengers, which must be on a round trip basis, have to be notified to the Authority 90 days before departure. (Shorter periods of notification apply during the early months of the scheme i.e. from April, 1973.)

Inclusive Tours are separate fare charters where the cost to the passenger includes the cost of accommodation.

Single Entity Charters are those where the charterer has exclusive use of the whole capacity of the aircraft and does not dispose of any of it to third persons for reward.

Sub-charters are charters to other British or foreign operators.

Fifth Freedom Charters are those between foreign territories.

Licence means an air transport licence granted under Section 22 of the Civil Aviation Act, 1971.

Classes of Licence

- Class A** Means a licence for an air transport service (not being a charter service) between places named in the licence involving more than four flights in any one direction between the same two places.
- B** Means a licence for a charter service between places named in the licence (not being a group charter service) involving more than four flights in any one direction between the same two places.
- C** Means a licence for an air transport service between places named in the licence involving not more than four flights in any one direction between the same two places.
- D** Means a licence for a group charter service between places named in the licence, involving more than four flights in any one direction between the same two places.
- E** Means a licence other than a Class 2 licence for an air transport service which is not restricted to flights between places named in the licence. The types of Class E licence are:—
- Type I** Group Charter flights of the same nature as those licensed under Class D but for flights not restricted to places named in the licence.
 - Type II** Fifth Freedom Charters, i.e. flights between foreign territories.
 - Type III** Charters to other airlines (British).
 - Type IV** Charters to other airlines (Foreign).
 - Type V** Cargo charters for more than one consignor.
 - Type VI** Passenger charters for the carriage of more than one affinity group.
 - Type VII** Miscellaneous charter flights.
- Class 2** Means a licence which specifically authorises the carriage of passengers named on a list submitted to the Civil Aviation Authority in advance of the flight on condition that no seat occupied on the flight by a fare paying passenger has been sold to that passenger by or on behalf of the operator of the aircraft.
- Exempt Services** are services which do not require a licence by virtue of Section 21(2) of the Civil Aviation Act 1971, or an instrument made under that section, which may include single entity charters, charters to Government Departments, etc.
