# Foreword

## 1 CONTENT

- 1.1 *CAA Monthly Statistics* is prepared by the Civil Aviation Authority with the co-operation of the United Kingdom airport and airline operators; some of this information is required by the Civil Aviation Act, 1971. Statistics for the Channel Islands airports are provided by the Commandant for Jersey Airport and the Office of the Lieutenant Governor for Guernsey and Alderney Airports. The assistance from all these authorities is gratefully acknowledged.
- 1.2 Some of the figures included in *CAA Monthly Statistics* are provisional only and may be revised in later issues. Figures contained in monthly and quarterly tables have not been seasonally adjusted, but figures are given, in the tables covering past years, for the most recent six months and the corresponding six months one year earlier.

## 2 CONVENTIONS

- 2.1 **Symbols and Abbreviations** The following are used throughout:

+	= UK Customs airport
..	= not available
—	= nil or less than half the final digit shown
n.e.i.	= not elsewhere included
a.t-km	= available tonne-kilometres

A.T. Movements = Air Transport Movements

- 2.2 **Rounding of Figures** In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

- 2.3 **Units of Measurement** Metric measurements are used throughout *CAA Monthly Statistics*.

Tonne	= 1000 kilograms
Tonne-kilometres	= The product obtained by multiplying the number of tonnes carried by the distance flown measured in kilometres

Conversion factors (foot/pound system to metric system)

1 short ton (2000 lbs)	= 0.9072 tonnes
1 ton (2240 lbs)	= 1.0160 tonnes
1 statute mile (5280 feet)	= 1.6093 kilometres
1 short ton-mile	= 1.4600 tonne-kilometres

The explanations of other terms used throughout the Tables are contained in the section on Definitions immediately following the Tables.

## 3 ENQUIRIES

- 3.1 **Statistics** Enquiries concerning the information in *CAA Monthly Statistics* should be addressed, according to the subject, as follows:

Airport and Air Passenger Statistics: Civil Aviation Authority  
Room 291  
Shell Mex House  
Strand  
London WC2R 0DP  
Tel. 01 217 4210

Airline Statistics: Civil Aviation Authority  
Room 622  
Aviation House  
129 Kingsway  
London WC2B 6NN  
Tel. 01 405 6922 Ext. 244

**3.2 Distribution** Enquiries concerning orders and subscriptions should be addressed to:

Civil Aviation Authority  
Printing and Publication Services  
Greville House  
37 Gratton Road  
Cheltenham  
Glos GL50 2BN

**4 CIVIL AVIATION STATISTICS FOR EARLIER YEARS** Statistics for the period from January 1968 to December 1972 were published in the Civil Aviation Series of the Department of Trade & Industry's *Business Monitors*.

The series comprise:

CA. 1	<i>Airport activity</i>	(Monthly)
CA. 2	<i>Air passengers</i>	"
CA. 3	<i>Air freight &amp; mail</i>	"
CA. 4	<i>Airline operations</i>	"
CA. 5	<i>Airline operations</i>	(Quarterly)
CA. 6	<i>Domestic passenger traffic</i>	"
CA. 7	<i>Air passengers – international and cabotage</i>	"
CA. 8	<i>Airline financial statistics</i>	(Annually – 1968 to 1971 only)

Annual versions of CA. 1 to CA. 7 were also published.

# Civil Aviation Statistics—April 1975

## Activity at UK Airports

During the month of April 1975 the level of air transport movements declined against April 1974 by 5·2 per cent to just over 56 500. London area movements fell by 9·2 per cent whilst over the rest of the UK the decline was only marginal. When comparing the three month period February to April 1974 with 1975, the national rate of decline of 1·2 per cent comprised a 2·7 per cent decline in the London area against a marginal growth elsewhere in the UK. Stansted was the only London area airport over this period to report a growth (10·8 per cent growth; 32 additional movements per month). Heathrow recorded a decline of under 1 per cent (137 less movements per month) and Gatwick a decline of 1·4 per cent (70 less movements per month). Luton reported a decline of 31·6 per cent (548 less movements per month) and Southend a decline of 2·6 per cent (23 less movements). Outside the London area the greatest increases in actual movements continued to be recorded at Aberdeen (a monthly average of 812 additional movements; 61·4 per cent growth) followed by Edinburgh which, as a result of the continued industrial action at Glasgow, recorded a 46·2 per cent growth (468 additional movements per month). Lydd which reported the third highest increase in movements (343 per month) also recorded the greatest rate of growth (13 fold its April 1974 level). Glasgow again suffered the heaviest actual decline in movements (1429 per month) and Gloucester the heaviest rate of decline (72·6 per cent). Whilst total charter movements increased marginally scheduled movements declined by 1·6 per cent. The UK operators' share of scheduled movements decreased slightly to 72·3 per cent and their share of charter movements also dropped slightly to 89·4 per cent. A maintenance supervisors' strike at Manchester resulted in 52 of the 157 diversions during April.

During the month of April 1975 3·1 million terminal passengers travelled through UK airports, an increase of 200 000 on March 1975 but a 5·4 per cent decrease against April 1974. Throughout the month the number of passengers handled in the London area declined by 6·4 per cent and over the rest of the country by 2·8 per cent. Over the three month period February to April 1975 London area passengers increased marginally compared with a year earlier whilst those over the rest of the UK fell by 4·8 per cent. The aggregate UK decline over this period against February to April 1974 was 1·1 per cent. Amongst London area airports only Heathrow and Stansted reported growth in passengers handled (5·8 per cent; 81 559 additional passengers per month and 15·4 per cent; 1907 additional passengers respectively). Terminal passengers at Gatwick fell by 6·6 per cent (21 934 less passengers) and those at Southend by 26·6 per cent (4507 less per month). Luton recorded the heaviest decline in the area (29·0 per cent; 48 113 less passengers). Outside the London area Edinburgh, Aberdeen and Prestwick achieved the greatest increases in actual passengers handled (17 446 passengers, 30·5 per cent growth; 14 849 passengers, 52·6 per cent growth and 9418 passengers, 76·2 per cent growth respectively). Cambridge recorded the highest growth rate of 79·1 per cent, whilst Swansea the heaviest decline (86·9 per cent). The 1·1 per cent

decline in passengers travelling through UK airports between February and April 1975 compared with 1974 comprised a 1·6 per cent growth in those travelling by scheduled services against a 10·1 per cent drop in those by charter services. The UK operators' share of total passengers carried declined 2·3 percentage points to 70·4 per cent. Their share of charter traffic passengers grew marginally to 87·9 per cent but their share of scheduled traffic passengers fell by 2·5 percentage points to 65·8 per cent.

Over the period February to April 1975 a monthly average of 2·7 million passengers used UK airports, 1·9 million travelling by international services (1·6 per cent growth compared with a year earlier) and 0·8 million by domestic services (7·3 per cent decline). Total international scheduled passengers at UK airports grew by 9·0 per cent over this period when the most heavily used scheduled services were again those to France with 13·5 per cent (10·1 per cent growth), followed by those to USA with 10·7 per cent (0·1 per cent growth) and those to the Netherlands with 8·5 per cent (6·3 per cent growth). Charter service passengers declined overall by 10·6 per cent. Services to Spain continued to carry the largest proportion of charter service passengers (39·6 per cent; 9·9 per cent decline) followed by services to Germany with 10·7 per cent (7·7 per cent decline).

The 6·2 per cent aggregate decline in passengers travelling on domestic routes comprised a 53·3 per cent growth in those travelling to and from Edinburgh and a 4·5 per cent growth in those to the Channel Islands against declines of 53·4 per cent, 10·1 per cent, 5·0 per cent and 3·9 per cent in those travelling to and from Glasgow, Belfast, London and the Isle of Man.

The amount of air freight handled in the UK during April 1975 was nearly 55 000 tonnes, an overall decline of 6·7 per cent on 1974. London area tonnage fell by 4·6 per cent and that over the rest of the UK by 14·4 per cent. When comparing the three month period February to April 1975 with the corresponding period a year earlier, the level of air freight dropped by 7·0 per cent overall. Airports outside the London area reported handling an aggregate 19·8 per cent less cargo than a year earlier. London area airports reported an aggregate drop in freight of 3·5 per cent. Gatwick handled 29·0 per cent more cargo (1315 additional tonnes per month) and Stansted 21·2 per cent more (278 additional tonnes) whilst Heathrow, Stansted and Luton reported declines of 7·9 per cent (3108 less tonnes per month), 3·4 per cent (59 less tonnes) and 34·1 per cent (83 less tonnes) respectively. Lydd continued to report both the highest rate of growth over the whole country and the greatest increase in actual tonnage outside the London area (315 additional tonnes per month; 19 fold growth). Edinburgh reported handling 189 additional tonnes per month (102·4 per cent growth) and Aberdeen 89 additional tonnes (52·2 per cent growth). Glasgow reported the largest decline in actual tonnage (1177 less tonnes; 57·4 per cent decline) and Tiree against the heaviest rate of decline (70 per cent). The 7·0 per cent overall decline in air freight tonnage comprised a 13·3 per cent decline in that carried by scheduled services against a 39·4 per

cent growth in that carried by charter services. Most of this growth was handled by UK operators whose share of charter tonnage increased 6·3 percentage points to 75·8 per cent. Their share of scheduled service cargo fell by 2·0 percentage points to 48·6 per cent whilst their share of total tonnage carried rose marginally to 53·5 per cent.

### **Output of UK Airlines**

The output of UK airlines for all services in April 1975 was 638 million available tonne-kilometres, a decrease of 4·5 per cent on April 1974.

The scheduled service output of 427 million available tonne-kilometres was 7·6 per cent less than a year earlier. The overall load factor of 53·9 per cent compared with 55·6 per cent in April 1974. Seat kilometres used were 56·4 per cent of those available compared

with 55·1 a year earlier. Seat factors on domestic and international scheduled services were 60·5 and 56·0 per cent respectively compared with 67·4 and 54·3 per cent in April 1974.

The non-scheduled output of 211 million available tonne-kilometres was 2·3 per cent higher than a year earlier. Advance Booking Charters and Inclusive Tour Charters accounted for 15·2 and 70·7 million available tonne-kilometres respectively compared with 3·8 and 80·4 million in April 1974.

**NOTE:** Statistics of airport activity, passengers and cargo are derived from data supplied by airports. Airline statistics are based on data supplied by the airlines. Data from these two sources are not strictly comparable. There are small differences in timing and more significant differences arise because airlines are not asked to report non-revenue passengers and cargo.

# Size Structure of UK Airports and Airlines Year ended 31 March 1975

**London** includes Heathrow, Gatwick and Stansted.

**S.E. England** includes Ashford, London, Luton, Lydd, Manston and Southend.

**N. England** comprises the airports in England north of a line from the Mersey to the Humber (Manchester, Liverpool, Blackpool, Newcastle, Leeds/Bradford and Tees-side).

**Glasgow** includes Prestwick and Abbotscinch.

- (a) N. France comprises the airports north of the line of 49° latitude.
- (b) Soviet Union and Eastern Europe includes the United Soviet Socialist Republics, Bulgaria, Czechoslovakia, Hungary, Poland, Roumania and the Eastern Zone of Germany but excluding Berlin.
- (c) North Africa includes Algeria, Libya, Morocco and Tunisia.
- (d) Commonwealth countries only.
- (e) Commonwealth countries including Rhodesia.
- (f) Middle East includes Iraq, Iran, Israel, Jordan, Lebanon, Persian Gulf States, Saudi Arabia, Sudan and the United Arab Republic.
- (g) Total is in respect of charter passengers only. Passengers on scheduled flights included in London – Other Italy.
- (h) Total is in respect of charter passengers only. Passengers on scheduled flights included in other routes to Italy.

The figures show the uplift and discharge of passengers at United Kingdom airports on services operated there according to their immediate destination or last point of embarkation overseas on those services. These may not, in all cases, be the origin or destination of passenger journeys: they may be places at which a journey was broken or a connection made with another air service. The figures in this table include all passengers carried on scheduled and charter services excluding those carried on aircraft chartered by Government Departments.

	<b>TOTAL</b>	<b>24.5</b>	<b>20.8</b>	<b>18</b>

(a) Heathrow, Gatwick and Stansted

Traffic counted in either direction

The figures show the uplift and discharge of passengers according to the destination and origin of the route. Because of the method of collection of this information there are discrepancies between the reports received from airports on a route, particularly in the case of multi-sector flights. In most cases, however, the discrepancies are small, but in a few cases the figures include an estimated component.

## Cargo by Type and Nationality of Operator April 1975

# Appendix A Definitions

## AIRPORT ACTIVITY

<b>An air transport movement</b>	is a landing or a take-off of an aircraft engaged on commercial air transport. The types of movement covered are all scheduled service movements, whether loaded or empty, and charter movements transporting passengers or cargo from one point to another. All other types of commercial flying are excluded (e.g. flights returning to the airport of take-off without landing elsewhere, empty charter positioning flights paid for by the charterer, ferrying of empty aircraft, etc.).
<b>Empty charter positioning flights</b>	are flights by chartered aircraft moving into position for transport flights or returning to base after such flights.
<b>Other commercial flights</b>	are miscellaneous non-transport charter flights (e.g. commercial delivery or ferry of empty aircraft and local flights for the Press, survey companies or farmers).
<b>Test and training flights</b>	are flights for the purpose of testing aircraft or airports, or for training flying crew or ground personnel. Also included in this category are demonstration flights by makers or sellers of aircraft and aviation equipment. Aero-club instructional flights are excluded from this category and shown under 'Aero-club'.
<b>Other non-commercial flights</b>	by air transport operators are flights by air transport operators for the sole purpose of moving their own aircraft, personnel or stores from one place to another, and air transport flights forced to return to base by bad weather, engine failure or other causes.
<b>Private flights</b>	are flights for purely private purposes by private owners or other private aircraft operators, excluding aero-club flights.
<b>Aero-club flights</b>	are flights operated by aero-club members for instruction or pleasure.
<b>Official flights</b>	are flights for official purposes by British or foreign civil Government Departments excluding air transport movements.
<b>Military flights</b>	are flights by British or foreign military personnel exclusively for military purposes.

## AIR PASSENGERS

<b>Passengers</b>	includes all revenue and non-revenue passengers on air transport flights. Air crew being carried on such flights other than as members of the aircraft's complement are classified as non-revenue passengers.
<b>Revenue passengers</b>	are those who pay 25 per cent or more of the normal applicable fare.
<b>A terminal passenger</b>	is a passenger joining or leaving the aircraft flight at the reporting airport. A passenger travelling between two reporting airports is counted twice, once at each airport.
<b>A transit passenger</b>	is a passenger who arrives at and departs from a reporting airport on the same aircraft which is transiting the airport. Each transit passenger is counted once only and not once on arrival and once on departure.

- International services** are services flown between the United Kingdom (including Great Britain, Isle of Man, Channel Islands and Northern Ireland) and places outside.
- Domestic services** are services flown entirely within Great Britain, Isle of Man, Channel Islands and Northern Ireland.
- Cabotage** is traffic carried between territories of the United Kingdom other than domestic services.
- Scheduled services** are those performed according to a published timetable, including those supplementary thereto, and open to use by members of the public.
- Non-scheduled services** include all air transport flights other than scheduled services.
- Charter services** are those transporting passengers or cargo for hire or reward from one point to another, other than scheduled services.

## AIR CARGO

- Cargo** in airport statistics means the weight of cargo (including accompanied vehicles) picked up and set down by aircraft on air transport flights. Cargo in transit through the airport on the same aircraft is excluded as is mail, company stores, excess baggage and diplomatic bags picked up and set down. (See also definition below under 'Airline Operations').
- Tonnes** are metric tonnes of 1 000 kilograms (2 204·62 lb).

## AIRLINE OPERATIONS

- Advance booking charters (ABC)** Charter flights operated under Class 2 licences between the UK and designated territories overseas in respect of which an operator has sold blocks of seats to one or more licensed travel organisers for resale to passengers. Details of the sales to travel organisers have to be notified to the Civil Aviation Authority 120 days before the date of the flight: details of the sales of seats to passengers which must be on a round trip basis have to be notified to the Authority 60 days before departure.
- Aircraft-hour** an aircraft hour is performed when an aircraft flies for one hour: aircraft hours are measured on the basis of block-to-block time.
- Aircraft-kilometre (Aircraft-km)** An aircraft-kilometre is performed when an aircraft flies one kilometre. Aircraft-kilometres equal the sum of the products obtained by multiplying the number of flights performed on each stage flight by the stage distance measured in kilometres.
- Cargo** in airline statistics means the weight of any property carried on an aircraft, including the weight of vehicles carried, mail and diplomatic bags, but excluding passengers' baggage. (See also definition above for 'Air Cargo' statistics and definition below for 'Passenger tonne-kilometres'.)
- Cargo tonne-km** means a metric tonne of cargo carried one kilometre. Cargo tonne-kilometres equal the sum of products obtained by multiplying the number of tonnes of cargo carried on each flight stage by the stage distance measured in kilometres.

<b>Cargo uplifted</b>	means the number of tonnes of cargo which is obtained by counting each tonne of cargo on a particular flight (with one flight number) once only and not repeatedly on each individual stage of that flight. The only exception to this is for cargo flown on both the international and domestic stages of the same flight which is considered in computation both as a domestic and an international shipment or despatch.
<b>Daily utilisation per a/c (hrs)</b>	is an average per aircraft measure computed by dividing the aircraft hours of use by the number of days on which the aircraft are available. This latter figure includes days required for maintenance and overhaul but it does not include days between the date of purchase and the date actually placed in service, days out of service due to major accidents or conversion, days when an aircraft is in the possession of others or is not available because of government action, such as grounding by government order.
<b>Exempt operations</b>	are operations for which a licence is not required. The Civil Aviation Authority in pursuance of its powers under paragraph (a) of Section 21(2) of the Civil Aviation Act 1971 has by an instrument dated 29 March 1972 and later instruments specified a number of types of flights for which a licence is not required. The specifications of such flights are published in the Authority's Official Record Series 1 but typical examples are ambulance flights, aircrew training and test flights, Government charters, helicopters carrying externally suspended loads, etc.
<b>Inclusive tours (IT)</b>	are separate fare charters where the cost to the passenger includes the cost of accommodation.
<b>Licence</b>	means an air transport licence granted under Section 22 of the Civil Aviation Act 1971.
<b>Mail</b>	covers only that handled by postal administrations and includes troop mail.
<b>Mail tonne-km</b>	are calculated using the same principle as when calculating cargo tonne-km.
<b>Overall load factor</b>	is an expression of tonne-km used as a percentage of tonne-km available.
<b>Passengers</b>	in airline statistics means revenue passengers only, i.e. passengers paying 25 per cent or more of the normal fare.
<b>Passenger-km</b>	means a passenger carried one kilometre. Calculation of passenger-kilometre equals the sum of the products obtained by multiplying the number of passengers carried on each flight stage by the stage distance measured in kilometres. The resultant figure is equal to the number of kilometres travelled by all passengers. Note.—Passenger-km is numerically equivalent to Seat-km used.
<b>Passenger load factor</b>	is an expression of seat-km used as a percentage of seat-km available.
<b>Passengers uplifted and passengers carried</b>	The number of passengers uplifted is obtained by counting each revenue passenger on a particular flight (with one flight number) once only and not repeatedly on each individual stage of flight.
<b>Passenger tonne-kilometres</b>	is deduced as the difference between the total tonne-kilometres used and tonne-kilometres used for cargo and/or mail; it includes the weight of passengers' free and excess baggage.

**Seat-km available** a seat-kilometre is available when a seat is flown one kilometre. Seat-kms available are equal to the sum of the products obtained by multiplying the number of passenger seats available for sale on each stage flight by the stage distance measured in kilometres.

**Seat-km used** a seat-kilometre is used when a seat occupied by a revenue passenger is flown for one kilometre. Seat-km used is equal to the sum of the products obtained by multiplying the number of revenue passengers carried on each stage flight by the stage distance measured in kilometres.

**Separate fare charters** are those where the charterer re-sells part of the capacity of the aircraft to the public at large; an organisation, etc.

**Sole-use charters** are those where the charterer has exclusive use of the whole capacity of the aircraft and does not dispose of any of it to third persons for reward.

**Stage flights** that part of the flight between two consecutive places, i.e. from take-off to the next landing, excluding technical stops, on the route.

**Tonne-km available** a metric tonne of payload space available flown one kilometre. Tonne-km available is equal to the sum of the products obtained by multiplying the number of tonnes available for the carriage of revenue load (passengers and cargo) on each stage flight by the distance measured in kilometres.

**Tonne-km used** a metric tonne of revenue load carried one kilometre. Tonne-km used is the sum of the products obtained by multiplying the number of tonnes of revenue load (passengers and cargo) carried on each stage flight by the distance measured in kilometres.

## Appendix B Classes of Licence

**NB** These definitions are not intended as a comprehensive statement of each type of licence. They define the general purpose of the types of flights authorised by each class of licence. The specification for each class of licence is published in the Civil Aviation Authority Official Record Series 1.

**Class 1** authorises scheduled service flights;

**Class 2** authorises advance booking charter flights;

**Class 3** authorises inclusive tour charter flights;

**Class 4** authorises other charter flights for the carriage of passengers;

**Class 5** authorises substitute charter flights;

**Class 6** authorises charter flights for the carriage of cargo and attendants;

**Class 7** authorises sole-use charter flights.
