# Foreword

## 1 CONTENT

- 1.1 *CAA Monthly Statistics* is prepared by the Civil Aviation Authority with the co-operation of the United Kingdom airport and airline operators; some of this information is required by the Civil Aviation Act, 1971. Statistics for the Channel Islands airports are provided by the Commandant for Jersey Airport and the Office of the Lieutenant Governor for Guernsey and Alderney Airports. The assistance from all these authorities is gratefully acknowledged.
- 1.2 Some of the figures included in *CAA Monthly Statistics* are provisional only and may be revised in later issues. Figures contained in monthly and quarterly tables have not been seasonally adjusted, but figures are given, in the tables covering past years, for the most recent six months and the corresponding six months one year earlier.

## 2 CONVENTIONS

- 2.1 **Symbols and Abbreviations** The following are used throughout:

+	=	UK Customs airport
.	=	not available
—	=	nil or less than half the final digit shown
n.e.i.	=	not elsewhere included
a.t-km	=	available tonne-kilometres

A.T. Movements = Air Transport Movements

- 2.2 **Rounding of Figures** In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

- 2.3 **Units of Measurement** Metric measurements are used throughout *CAA Monthly Statistics*.

Tonne	=	1000 kilogrammes
Tonne-kilometres	=	The product obtained by multiplying the number of tonnes carried by the distance flown measured in kilometres

Conversion factors (foot/pound system to metric system)

1 short ton (2000 lbs)	=	0.9072 tonnes
1 ton (2240 lbs)	=	1.0160 tonnes
1 statute mile (5280 feet)	=	1.6093 kilometres
1 short ton-mile	=	1.4600 tonne-kilometres

The explanations of other terms used throughout the Tables are contained in the section on Definitions immediately following the Tables.

## 3 ENQUIRIES

- 3.1 **Statistics** Enquiries concerning the information in *CAA Monthly Statistics* should be addressed to:

Civil Aviation Authority  
Room T420  
Space House  
43/59 Kingsway  
London WC2B 6TE  
Tel. 01 379 7311 Ext. 2584

- 3.2 **Distribution** Enquiries concerning orders and subscriptions should be addressed to:

Civil Aviation Authority  
Printing and Publication Services  
Greville House  
37 Gratton Road  
Cheltenham  
Glos GL50 2BN

**4 CIVIL AVIATION STATISTICS FOR EARLIER YEARS** Statistics for the period from January 1968 to December 1972 were published in the Civil Aviation Series of the Department of Trade & Industry's *Business Monitors*.

The series comprise:

CA. 1	<i>Airport activity</i>	(Monthly)
CA. 2	<i>Air passengers</i>	"
CA. 3	<i>Air freight &amp; mail</i>	"
CA. 4	<i>Airline operations</i>	"
CA. 5	<i>Airline operations</i>	(Quarterly)
CA. 6	<i>Domestic passenger traffic</i>	"
CA. 7	<i>Air passengers – international and cabotage</i>	"
CA. 8	<i>Airline financial statistics</i>	(Annually – 1968 to 1971 only)

Annual versions of CA. 1 to CA. 7 were also published.

# Civil Aviation Statistics—April 1976

## Activity at UK Airports

Just over 60 000 UK air transport movements were recorded during the month of April 1976, a growth of 6·4 per cent on 1975. This overall growth rate comprises an increase of 3·5 per cent in London area movements and 9·6 per cent elsewhere. A comparison of movements recorded during the period February-April 1976 against the corresponding months in 1975 shows a growth of 7·5 per cent in total UK air transport movements. At London area airports the growth was 2·3 per cent whilst over the rest of the UK it stood at 13·5 per cent. Of the London area airports, only Gatwick reported a substantial increase in actual movements (592 additional movements per month; 12·1 per cent growth). Heathrow reported a marginal increase (83 additional movements per month). Luton showed a marginal decline (3 movements less per month) and Stansted a 2·2 per cent decline (5 fewer movements). At Southend, both the rate of decline and the decline in movements was more substantial (44 fewer movements per month; 5·1 per cent decline). Aberdeen and Glasgow again achieved the greatest increase in actual movements (1119 additional movements per month; 52·4 per cent growth and 1023 additional movements; 56·1 per cent growth respectively). The large increase at Glasgow reflected the low March and April 1975 figures which were due to industrial action. They were followed, outside the London area, by Sumburgh with 250 additional movements per month; 28·1 per cent growth. The one-fold increase reported at Swansea was again the heaviest growth rate. Coventry reported the heaviest rate of decline (-82·6 per cent) and Prestwick the heaviest fall in movements (158 fewer per month; 22·6 per cent decline). During this period, scheduled movements grew by 5·8 per cent and charter movements by 14·4 per cent. The UK operators' share of scheduled movements increased marginally to stand at 72·9 per cent, and their share of charter movements increased by 1·1 percentage points to stand at 90·5 per cent. Their share of the total traffic was 76·6 per cent, an increase of 1·0 percentage point.

More than 3·5 million terminal passengers used UK airports during April (14·1 per cent more than in 1975). Over 2·5 million of these were reported in the London area (14·8 per cent growth). During the period February to April 1976, a total 9·3 per cent growth was reported -8·1 per cent in the London area and 12·2 per cent elsewhere in the UK. With the exception of Luton, all the airports in the London area reported some growth. At Heathrow there were 127 459 additional passengers per month (8·6 per cent growth); at Gatwick 27 663 additional passengers (8·8 per cent growth); at Stansted 2812 additional passengers (19·7 per cent growth) and at Southend a marginal increase of 102 passengers per month. Luton handled 711 fewer passengers (a marginal decline). Over the remainder of the UK, Glasgow again reported both the greatest increase in actual passengers and the heaviest rate of growth (65 413 additional passengers per month; 86·7 per cent growth). As reported above, industrial action affected the March and April 1975 figures at Glasgow. Manchester reported an additional

29 010 passengers per month (20·3 per cent growth) and Aberdeen an additional 16 387 (38·0 per cent growth). Prestwick reported both the largest decline in passengers handled and the heaviest rate of decline (9003 fewer passengers per month; 41·4 per cent decline). The 9·3 per cent growth in passenger traffic comprised a 9·3 per cent increase in those travelling on scheduled services and a 9·4 per cent increase in those travelling on charter services. The UK operators share of passengers carried on scheduled services increased marginally against 1975 to stand at 65·9 per cent. Their share of total passengers carried and those carried by charter services fell marginally to 70·3 per cent and 87·0 per cent respectively.

On a monthly average, almost 3 million passengers used UK airports between February and April 1976. 2·1 million travelled on international services (6·0 per cent growth) and 0·9 million on domestic services (17·0 per cent growth). International scheduled passengers increased by 7·0 per cent. Services to France which carried 12·9 per cent of the total scheduled traffic achieved a 1·6 per cent growth, those to the USA which carried 11·1 per cent achieved 11·2 per cent growth and those to the Netherlands, carrying 8·8 per cent, achieved 11·0 per cent growth. Total international charter passengers increased by 8·0 per cent, services to Spain carrying 34·9 per cent of the traffic (4·7 per cent decline), those to Italy carrying 11·0 per cent (21·1 per cent growth) and those to West Germany carrying 9·3 per cent (5·6 per cent decline). Domestic passenger traffic within the period February to April 1976 showed an overall growth of 15·0 per cent against 1975. London services carried 21·3 per cent more traffic. Glasgow 85·8 per cent more (again due to the poor 1975 results) and Belfast 1·3 per cent more. Routes to the Channel Islands were used by 8·8 per cent fewer passengers, to the Isle of Man by 7·5 per cent fewer and to Edinburgh by 3·6 per cent fewer.

The amount of air freight tonnage handled in the UK during April 1976 was just over 53 000 tonnes, an overall decline of 2·9 per cent against 1975. For the period February to April 1976 a decline of 4·3 per cent was reported as compared with the corresponding months in 1975. London area tonnage fell by 5·8 per cent during this period. Only Gatwick in the London area reported a growth in tonnage (an additional 990 tonnes per month; 16·9 per cent growth). Freight handled at Heathrow fell by 2631 tonnes per month (7·2 per cent decline), that at Luton by 24 tonnes (15·1 per cent decline), at Southend by 624 tonnes (37·4 per cent decline) and at Stansted by 370 tonnes (23·3 per cent decline). Over the rest of the UK, tonnage fell by an aggregate of 2·2 per cent. Glasgow, Aberdeen and Bournemouth reported the heaviest increases in tonnage (525 additional tonnes per month; 60·2 per cent growth, 226 tonnes; 87·3 per cent growth and 137 tonnes; 29·2 per cent growth respectively). The rate of growth recorded at Aberdeen was the heaviest throughout the UK. Manston reported both the largest fall in tonnage and the heaviest rate of decline (287 tonnes and -95·0 per cent). Freight carried on scheduled services fell by 5·9 per cent whilst that

carried on charter services grew by 3·1 per cent. The UK operators share of total and scheduled cargo fell by 2·5 percentage points to 51·0 per cent and by 4·7 percentage points to 43·9 per cent respectively but their share of charter service cargo increased 4·9 percentage points to 80·7 per cent.

### **Output of UK Airlines**

The output of UK airlines for all services in April 1976 was 768 million available tonne-kilometres, an increase of 20·3 per cent on April 1975.

The scheduled service output of 532 million available tonne-kilometres was 24·6 per cent higher than a year earlier. The overall load factor was 53·7 per cent compared with 53·9 per cent the previous year. Seat kilometres used were 56·8 per cent of those available.

Seat factors on domestic and international scheduled services were 58·7 and 56·6 per cent respectively compared with 60·5 and 56·0 per cent a year earlier.

The non-scheduled output of 236 million available tonne-kilometres was 11·7 per cent higher than in April 1975. Advance Booking Charters and Inclusive Tour Charters accounted for 24·1 and 89·4 million available tonne-kilometres respectively compared with 15·2 and 70·7 million a year earlier.

**NOTE:** Statistics of airport activity, passengers and cargo are derived from data supplied by airports. Airline statistics are based on data supplied by the airlines. Data from these two sources are not strictly comparable. There are small differences in timing and more significant differences arise because airlines are not asked to report non-revenue passengers and cargo.

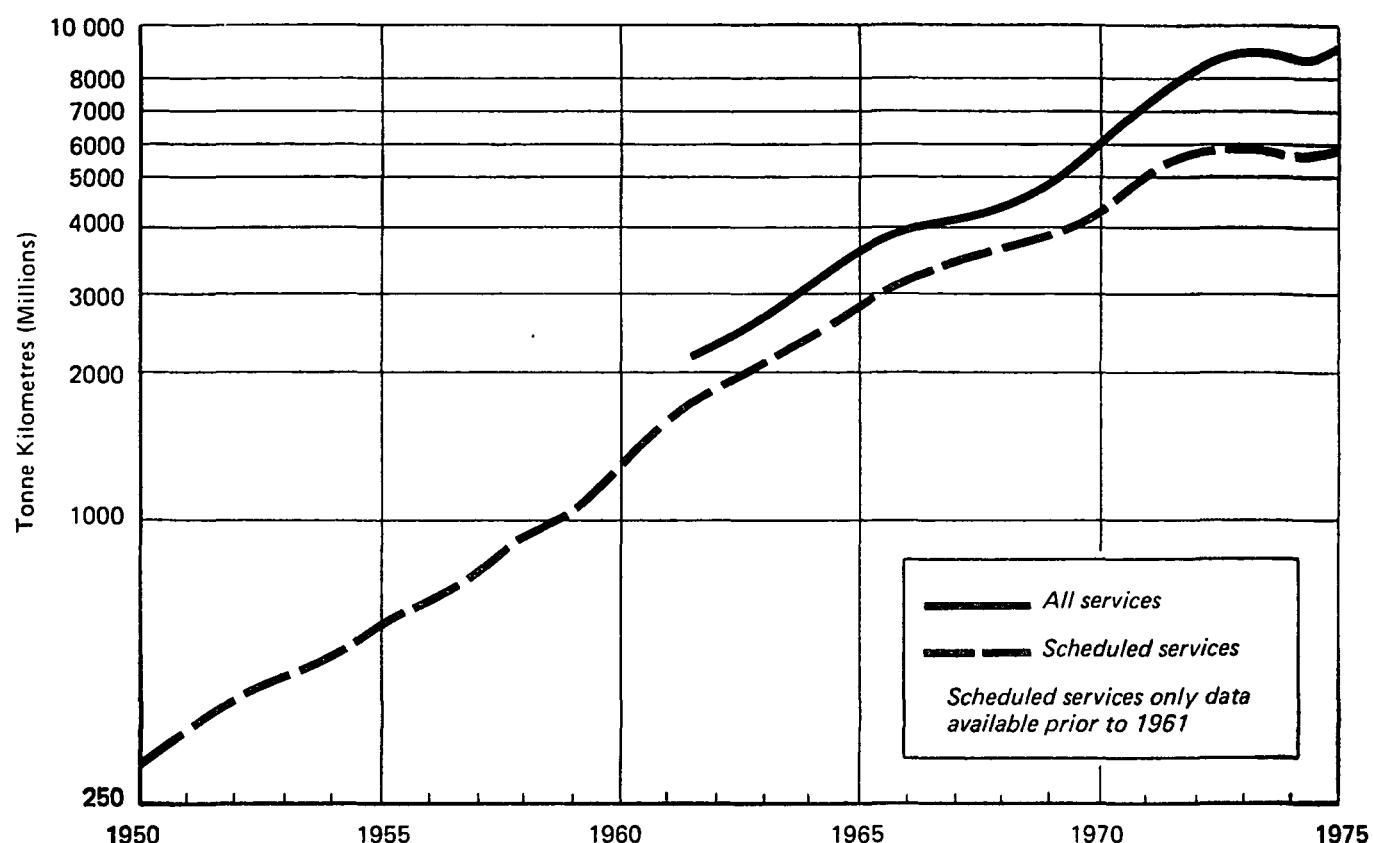

# Size Structure of UK Airports and Airlines Year ended 31 March 1976

**London** includes Heathrow, Gatwick and Stansted.

**S.E. England** includes London, Luton, Lydd, Manston and Southend.

**N. England** comprises the airports in England north of a line from the Mersey to the Humber (Manchester, Liverpool, Blackpool, Newcastle, Leeds/Bradford and Tees-side).

**Glasgow** includes Prestwick and Abbotscinch.

- (a) N. France comprises the airports north of the line of 49° latitude.
- (b) Soviet Union and Eastern Europe includes the United Soviet Socialist Republics, Bulgaria, Czechoslovakia, Hungary, Poland, Roumania and the Eastern Zone of Germany but excluding Berlin.
- (c) North Africa includes Algeria, Libya, Morocco and Tunisia.
- (d) Commonwealth countries only.
- (e) Commonwealth countries including Rhodesia.
- (f) Middle East includes Iraq, Iran, Israel, Jordan, Lebanon, Persian Gulf States, Saudi Arabia, Sudan and the United Arab Republic.
- (g) Total is in respect of charter passengers only. Passengers on scheduled flights included in London — Other Italy.
- (h) Total is in respect of charter passengers only. Passengers on scheduled flights included in other routes to Italy.

The figures show the uplift and discharge of passengers at United Kingdom airports on services operated there according to their immediate destination or last point of embarkation overseas on those services. These may not, in all cases, be the origin or destination of passenger journeys: they may be places at which a journey was broken or a connection made with another air service. The figures in this table include all passengers carried on scheduled and charter services excluding those carried on aircraft chartered by Government Departments.

(a) Heathrow, Gatwick and Stansted

Traffic counted in either direction

The figures show the uplift and discharge of passengers according to the destination and origin of the route. Because of the method of collection of this information there are discrepancies between the reports received from airports on a route, particularly in the case of multi-sector flights. In most cases, however, the discrepancies are small, but in a few cases the figures include an estimated component.

# Appendix A Definitions—Traffic Statistics

## MOVEMENTS AT AIRPORTS

<b>An air transport movement</b>	is a landing or a take-off of an aircraft engaged on commercial air transport. The types of movement covered are all scheduled service movements, whether loaded or empty, and charter movements transporting passengers or cargo from one point to another. All other types of commercial flying are excluded (e.g. flights returning to the airport of take-off without landing elsewhere, empty charter positioning flights paid for by the charterer, ferrying of empty aircraft, etc.).
<b>Empty charter positioning flights</b>	are flights by chartered aircraft moving into position for transport flights or returning to base after such flights.
<b>Other commercial flights</b>	are miscellaneous non-transport charter flights (e.g. commercial delivery or ferry of empty aircraft and local flights for the Press, survey companies or farmers).
<b>Test and training flights</b>	are flights for the purpose of testing aircraft or airports, or for training flying crew or ground personnel. Also included in this category are demonstration flights by makers or sellers of aircraft and aviation equipment. Aero-club instructional flights are excluded from this category and shown under 'Aero-club'.
<b>Other non-commercial flights</b>	by air transport operators are flights by air transport operators for the sole purpose of moving their own aircraft, personnel or stores from one place to another, and air transport flights forced to return to base by bad weather, engine failure or other causes.
<b>Private flights</b>	are flights for purely private purposes by private owners or other private aircraft operators, excluding aero-club flights.
<b>Aero-club flights</b>	are flights operated by aero-club members for instruction or pleasure.
<b>Official flights</b>	are flights for official purposes by British or foreign civil Government Departments excluding air transport movements.
<b>Military flights</b>	are flights by British or foreign military personnel exclusively for military purposes.

## AIR PASSENGERS

<b>Passengers</b>	includes all revenue and non-revenue passengers on air transport flights. Air crew being carried on such flights other than as members of the aircraft's complement are classified as non-revenue passengers.
<b>Revenue passengers</b>	are those who pay 25 per cent or more of the normal applicable fare.
<b>A terminal passenger</b>	is a passenger joining or leaving the aircraft flight at the reporting airport. A passenger travelling between two reporting airports is counted twice, once at each airport.
<b>A transit passenger</b>	is a passenger who arrives at and departs from a reporting airport on the same aircraft which is transiting the airport. Each transit passenger is counted once only and not once on arrival and once on departure.

## TYPES OF SERVICES

<b>International services</b>	are services flown between the United Kingdom (including Great Britain, Isle of Man, Channel Islands and Northern Ireland) and places outside.
<b>Domestic services</b>	are services flown entirely within Great Britain, Isle of Man, Channel Islands and Northern Ireland.
<b>Cabotage</b>	is traffic carried between territories of the United Kingdom other than domestic services.
<b>Scheduled services</b>	are those performed according to a published timetable, including those supplementary thereto, and open to use by members of the public.

<b>Non-scheduled or charter services</b>	include all air transport flights other than scheduled services.
<b>Separate fare charters</b>	are those where the charterer re-sells part of the capacity of the aircraft to the public at large; an organisation, etc.
<b>Inclusive tour</b>	consists of a round trip or circle trip performed in whole or in part by air, organised by a tour operator and offered to the public at a comprehensive price including besides air transport, accommodation for the duration of the trip, surface transport and, where appropriate, other amenities.
<b>Advance booking charters</b>	Charter flights operated under Class 2 licences between the UK and territories overseas in respect of which an operator has sold blocks of seats to one or more licensed travel organisers for resale to passengers. Advance details of sales to travel organisers and sales of seats to passengers have to be notified to the Civil Aviation Authority.
<b>Sole-use charters</b>	are those where the charterer has exclusive use of the whole capacity of the aircraft and does not dispose of any of it to third persons for reward.
<b>Licence</b>	means an air transport licence granted under Section 22 of the Civil Aviation Act 1971.

## CLASSES OF LICENCE

<b>Class 1</b>	authorises scheduled service flights;
<b>Class 2</b>	authorises advance booking charter flights;
<b>Class 3</b>	authorises inclusive tour charter flights;
<b>Class 4</b>	authorises other charter flights for the carriage of passengers;
<b>Class 5</b>	authorises substitute charter flights;
<b>Class 6</b>	authorises charter flights for the carriage of cargo and attendants;
<b>Class 7</b>	authorises sole-use charter flights.

**NB** These definitions are not intended as a comprehensive statement of each type of licence. They define the general purpose of the types of flights authorised by each class of licence. The specification for each class of licence is published in the Civil Aviation Authority Official Record Series 1.

<b>Exempt operations</b>	are operations for which a licence is not required. The Civil Aviation Authority in pursuance of its powers under paragraph (a) of Section 21 (2) of the Civil Aviation Act 1971 has by an instrument dated 29 March 1972 and later instruments specified a number of types of flights for which a licence is not required. The specifications of such flights are published in the Authority's Official Record Series 1 but typical examples are ambulance flights, aircrew training and test flights, Government charters, helicopters carrying externally suspended loads, etc.
--------------------------	--

<b>Cargo</b>	means the weight of any property carried on an aircraft including the weight of vehicles carried, mail and diplomatic bags, but excluding passengers' baggage. When related to the activity of an airline or airlines, cargo uplifted means the number of tonnes of revenue cargo that is obtained by counting each tonne of cargo on a particular flight (with one flight number) once only and not repeatedly on each individual stage of that flight. The only exception to this is for cargo flown on both the international and domestic stages of the same flight which is considered in competition both as a domestic and an international shipment or despatch.
--------------	--

When related to the activity of an airport it is usual to measure cargo as uplifted and set down. Cargo in transit through the airport on the same aircraft is excluded as is mail, company stores, excess baggage, and diplomatic bags picked up and set down.

## Appendix B Measures and their Computation

The Civil Aviation Authority follows closely the statistical practices of the International Civil Aviation Organisation.

<b>Aircraft accident</b>	An occurrence associated with the operation of an aircraft which takes place between the time any person boards the aircraft with the intention of flight until such time as all such persons have disembarked, in which (a) any person suffers death or serious injury as a result of being in or upon the aircraft or by direct contact with the aircraft or anything attached thereto, or (b) the aircraft incurs damage or structural failure which adversely affects the structure strength, performance or flight characteristics of the aircraft and which would normally require major repair or replacement of the affected component.
<b>Aircraft days available</b>	The sum of the number of days each aircraft is available for use during the year. This figure includes days required for maintenance and overhaul but it does not include days between the date of purchase and the date actually placed in service, days out of service due to major accidents or conversion, days when an aircraft is in possession of others or is not available because of government action such as grounding by government regulatory agencies.
<b>Aircraft departures</b>	The number of take-offs of aircraft. For statistical uses, departures are equal to the number of landings made or flight-stages flown.
<b>Aircraft hours</b>	An aircraft hour is said to be performed when an aircraft operates one hour; aircraft hours are measured on the basis of block-to-block time.
<b>Aircraft hours flown per day</b>	This is an average per aircraft measure computed by dividing the actual hours of use by the number of days on which the aircraft are available.
<b>Aircraft kilometres performed</b>	Aircraft kilometres equal the sum of the products obtained by multiplying the number of flights performed by the stage distance.
<b>Aircraft movements</b>	An aircraft take-off or landing at an airport. For airport traffic purposes one arrival and one departure are counted as two movements.
<b>All cargo services</b>	Services relating to scheduled or non-scheduled flights performed by aircraft carrying loads other than passengers, i.e. freight, baggage, mail.
<b>Baggage</b>	Personal property of passengers and crew carried on an aircraft by agreement with the operator.
<b>Block-to-block/ chock-to-chock time</b>	The total number of hours (and minutes) measured from the time the aircraft moves from the loading point until it stops at the unloading point.
<b>Capacity offered per aircraft hour</b>	This is an average per aircraft computed by dividing the tonne-kilometres available by the related aircraft hours of flight.
<b>Capacity offered per flight</b>	This is an average per aircraft computed by dividing the tonne-kilometres available by the related number of aircraft departures.
<b>Cargo (or mail) tonne-kilometres performed</b>	A metric tonne of cargo carried one kilometre. Cargo tonne-kilometres equal the sum of the products obtained by multiplying the number of tonnes of cargo, diplomatic bags carried on each flight stage by the stage distance. Mail tonnes kilometres are computed in the same way.

<b>Cargo (or mail) tonnes carried</b>	The number of tonnes of cargo carried is obtained by counting each tonne of cargo or mail on a particular flight (with one flight number) once only and not repeatedly on each individual stage of that flight. The only exception to this is for cargo flown on both the international and domestic stages of the same flight, which is considered in computation both as a domestic and an international shipment or despatch. The same principle is used in calculating mail tonnes carried.
<b>Distance flown per passenger</b>	The average distance flown per passenger is computed by dividing the passenger-kilometres by the related number of passengers carried.
<b>Distance flown per tonne of cargo</b>	The average distance flown per tonne of cargo is computed by dividing the cargo tonne-kilometres performed by the related number of tonnes of cargo carried.
<b>Flights (commercial air transport)</b>	The operation of aircraft on a stage or number of stages with an unchanging flight number is counted as one flight. (Technical stops are not counted.) An air transport operation having both international and domestic stages would be counted as an international flight and also a domestic flight.
<b>Passenger-kilometres performed</b>	A passenger-kilometre is performed when a passenger is carried one kilometre. Calculation of passenger-kilometres equals the sum of the products obtained by multiplying the number of revenue passengers carried on each flight stage by the stage distance. The resultant figure is equal to the number of kilometres travelled by all passengers.
<b>Passenger load factor</b>	Passenger-kilometres performed divided by seat-kilometres available and expressed as a percentage.
<b>Passenger revenue per traffic-unit</b>	This is a type of financial measurement which relates the passenger traffic applicable to the passenger revenues. It is computed by dividing passenger revenues by the passenger-kilometres performed.
<b>Passengers carried</b>	The number of passengers carried is obtained by counting each passenger on a particular flight (with one flight number) once only and not repeatedly on each individual stage of that flight, with a single exception that a passenger flying on both the international and domestic stages of the same flight is counted as both a domestic and an international passenger.
<b>Passengers carried per aircraft</b>	The average number of passengers per aircraft is computed by dividing passenger-kilometres by the related aircraft kilometres flown.
<b>Payload capacity</b>	Total of aircraft capacity available for the carriage of revenue load (passengers, baggage, cargo and mail) measured in metric tonnes.
<b>Payload capacity per aircraft</b>	This is an average per aircraft computed by dividing the tonne-kilometres available by the related aircraft kilometres flown.
<b>Payload carried</b>	The revenue load of passengers, baggage, cargo and mail carried in the aircraft as measured in metric tonnes.
<b>Seat-kilometres available</b>	A seat-kilometre is available when a seat is flown one kilometre. Seat-kilometres available are equal to the sum of the products obtained by multiplying the number of passenger seats available for sale on each flight stage by the stage distance. Seats not actually available for the carriage of passengers because of the weight of fuel or other load are excluded in the calculations.

<b>Seats available per aircraft</b>	This is an average per aircraft computed by dividing the seat-kilometres available by the related aircraft kilometres flown.
<b>Speed flown per aircraft</b>	This is an average per aircraft measure computed by dividing the aircraft kilometres flown by the related aircraft hours of flight.
<b>Stage distance flown per aircraft</b>	The average stage distance flown per aircraft is computed by dividing the aircraft kilometres flown by the related number of aircraft departures.
<b>Tonne-kilometres available</b>	A metric tonne of available payload space flown one kilometre. Tonne-kilometres available equals the sum of the products obtained by multiplying the number of tonnes available for the carriage of revenue load (passengers, cargo and mail) on each flight stage by the stage distance.
<b>Tonne-kilometres performed</b>	A metric tonne of revenue load carried one kilometre. Tonne-kilometres performed equals the sum of the products obtained by multiplying the number of tonnes of revenue load carried on each flight stage by the stage distance.
<b>Tonnes available</b>	The capacity of the aircraft for the carriage of payload measured in tonnes.
<b>Weight load factor</b>	Tonne-kilometres performed divided by tonne-kilometres available and expressed as a percentage.
