Foreword

1 CONTENT

- 1.1 *CAA Monthly Statistics* is prepared by the Civil Aviation Authority with the co-operation of the United Kingdom airport and airline operators; some of this information is required by the Civil Aviation Act, 1971. Statistics for the Channel Islands airports are provided by the Commandant for Jersey Airport and the Office of the Lieutenant Governor for Guernsey and Alderney Airports. The assistance from all these authorities is gratefully acknowledged.
- 1.2 Some of the figures included in *CAA Monthly Statistics* are provisional only and may be revised in later issues. Figures contained in monthly and quarterly tables have not been seasonally adjusted, but figures are given, in the tables covering past years, for the most recent six months and the corresponding six months one year earlier.
- 1.3 Tables 13, 16–19 and 21 have been revised with effect from January 1977. Figures given in all the Tables are now for the current month only, instead of a monthly average of the latest three months. Tables 13 and 21 have been expanded so as to enable freight carried on all-freight flights to be separated from that carried on passenger flights, and to show a breakdown between International and Domestic and Scheduled and Non-Scheduled Traffic.

2 CONVENTIONS

- 2.1 **Symbols and Abbreviations** The following are used throughout:

+	= UK Customs airport
..	= not available
—	= nil or less than half the final digit shown
n.e.i.	= not elsewhere included
a.t-km	= available tonne-kilometres

A.T. Movements = Air Transport Movements

- 2.2 **Rounding of Figures** In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

- 2.3 **Units of Measurement** Metric measurements are used throughout *CAA Monthly Statistics*.

Tonne	= 1000 kilograms
Tonne-kilometres	= The product obtained by multiplying the number of tonnes carried by the distance flown measured in kilometres

Conversion factors (foot/pound system to metric system)

1 short ton (2000 lbs)	= 0.9072 tonnes
1 ton (2240 lbs)	= 1.0160 tonnes
1 statute mile (5280 feet)	= 1.6093 kilometres
1 short ton-mile	= 1.4600 tonne-kilometres

The explanations of other terms used throughout the Tables are contained in the section on Definitions immediately following the Tables.

3 ENQUIRIES

- 3.1 **Statistics** Enquiries concerning the information in *CAA Monthly Statistics* should be addressed to:

Civil Aviation Authority
Room T410
Space House
43/59 Kingsway
London WC2B 6TE
Tel. 01 379 7311 Ext. 2475

- 3.2 **Distribution** Enquiries concerning orders and subscriptions should be addressed to:

Civil Aviation Authority
Printing and Publication Services
Greville House
37 Gratton Road
Cheltenham
Glos GL50 2BN

- 4 CIVIL AVIATION STATISTICS FOR EARLIER YEARS** Statistics for the period from January 1968 to December 1972 were published in the Civil Aviation Series of the Department of Trade & Industry's *Business Monitors*.

The series comprise:

CA. 1	<i>Airport activity</i>	(Monthly)
CA. 2	<i>Air passengers</i>	"
CA. 3	<i>Air freight & mail</i>	"
CA. 4	<i>Airline operations</i>	"
CA. 5	<i>Airline operations</i>	(Quarterly)
CA. 6	<i>Domestic passenger traffic</i>	"
CA. 7	<i>Air passengers – international and cabotage</i>	"
CA. 8	<i>Airline financial statistics</i>	(Annually – 1968 to 1971 only)

Annual versions of CA. 1 to CA. 7 were also published.

Civil Aviation Statistics—April 1977

Activity at UK Airports

During almost the whole month of April 1977, there was an industrial dispute which seriously affected British Airways' operations. The number of aircraft diversions totalled 259, the majority of which were from Heathrow to Bournemouth and Southampton; the traffic pattern was not the normal one and the monthly statistics presented a distorted picture, particularly in the comparison of the figures with those of the previous year.

Air transport movements during April 1977 totalled 57 000, a decline of 5·6 per cent against April 1976; the proportion of all-freight movements fell 1·0 percentage points to stand at 6·2 per cent of the total. London area movements accounted for 28 000 (9·4 per cent decline as compared with the previous year). With the exception of Heathrow, all airports in the area reported increases in traffic. Gatwick reported 1 068 additional movements (15·9 per cent growth), Southend 224 additional movements (22·8 per cent growth), Luton 187 additional movements (11·2 per cent growth) and Stansted 159 additional movements (60·0 per cent growth); Heathrow reported 4 504 fewer movements (21·5 per cent decline). Outside the London area, a total of 29 000 movements was reported (1·8 per cent decline). Aberdeen reported the greatest increase in actual movements (350 additional movements; 10·0 per cent growth), followed by Southampton and Sumburgh with 319 additional movements (31·8 per cent growth) and 318 additional movements (25·1 per cent growth) respectively. Glasgow reported the heaviest fall in movements (703 fewer movements; 23·1 per cent decline), followed by Manchester and Edinburgh with 396 fewer movements (11·2 per cent decline) and 254 fewer movements (16·2 per cent decline) respectively. In terms of all-freight movements, Blackpool reported the greatest increase (43 additional movements) and Aberdeen the heaviest fall (339 fewer movements). Scheduled movements in April 1977, as compared with the previous year, declined by 11·5 per cent whilst charter movements rose by 14·2 per cent. The UK operators' share of scheduled traffic fell 4·2 percentage points to stand at 69·5 per cent and their share of charter traffic fell marginally to 88·6 per cent.

The number of terminal passengers reported by UK airports in April 1977 was 3·3 million, a decline of 5·5 per cent against the same month in 1976. London area airports handled 2·4 million passengers (2·5 per cent decline). Four out of the five airports reported growth, Gatwick 29·5 per cent (138 156 additional passengers), Stansted 23·9 per cent (5 566 additional passengers), Southend 17·2 per cent (3 218 additional passengers) and Luton 1·5 per cent (2 627 additional passengers), but Heathrow reported an 11·7 per cent decline (212 220 fewer passengers). Outside the London area, 0·9 million passengers used UK airports (12·9 per cent decline). Southampton and Bournemouth reported the greatest increases with 12 131 additional passengers (44·7 per cent growth) and 8 571 additional passengers (89·6 per cent growth) respectively, followed by

Sumburgh with 3 370 additional passengers (17·4 per cent growth). Glasgow reported the heaviest fall (48 388 fewer passengers; 32·6 per cent decline) followed by Manchester and Belfast with 28 838 fewer passengers (14·4 per cent decline) and 25 824 fewer passengers (28·8 per cent decline) respectively. Passengers travelling on scheduled services declined by 9·2 per cent whilst those on charter services rose by 6·2 per cent. The UK operators' share of scheduled passengers fell 13·6 percentage points to stand at 51·6 per cent and their share of charter passengers fell 2·7 percentage points to 82·8 per cent.

Almost 2·7 million passengers travelled on international services (5·0 per cent growth), whilst only 0·6 million travelled on domestic services (34·0 per cent decline). International scheduled services carried 5·0 per cent more passengers than a year earlier and international charter services 6·0 per cent more. The most heavily used scheduled routes were those to France with 12·0 per cent of the total traffic (4·0 per cent growth), followed by those to USA and the Netherlands with 12·0 per cent of the total (8·0 per cent growth) and 9·0 per cent of the total (8·0 per cent growth) respectively. Services to Spain carried 32·0 per cent of the total charter traffic (5·0 per cent decline), services to Italy carried 13·0 per cent of the total (11·0 per cent growth) and those to Germany 8·0 per cent of the total (15·0 per cent growth). Of the passengers travelling on the main domestic routes, only those on services to the Channel Islands increased (30·0 per cent growth). Traffic carried on routes to London, Belfast, Edinburgh, Glasgow and the Isle of Man declined (-47·0 per cent, -40·0 per cent, -17·0 per cent, -24·0 per cent and -21·0 per cent respectively).

During April 1977, air freight handled at UK airports amounted to 55 000 tonnes (4·0 per cent growth as compared with April 1976); 32 000 tonnes of this travelled on all-freight flights (6·4 per cent growth), whilst freight carried on passenger flights increased only marginally. In the London area, total tonnage rose by 6·5 per cent; only Southend reported a fall in traffic (614 fewer tonnes; 55·9 per cent decline). Heathrow handled 474 additional tonnes (1·4 per cent growth) and Gatwick 911 additional tonnes (12·6 per cent growth), whilst Luton and Stansted each reported more than one fold growth, Luton with an additional 445 tonnes and Stansted with an additional 1 551 tonnes, 1 079 of which travelled on all-freight flights. Over the rest of the UK, there was a 6·0 per cent decline in tonnage handled. Prestwick and Bournemouth reported the heaviest increases with 449 additional tonnes (44·5 per cent growth) and 136 additional tonnes (20·3 per cent growth) respectively. Glasgow and East Midlands reported the heaviest falls (375 fewer tonnes; 25·8 per cent decline and 333 fewer tonnes; 55·1 per cent decline respectively). Freight carried on scheduled services fell marginally whilst on charter services there was an increase of 25·0 per cent. The UK operators' share of scheduled tonnage fell 11·8 percentage points to stand at 31·4 per cent and their share of charter tonnage fell 1·8 percentage points to 83·7 per cent.

Output of UK Airlines

The output of UK airlines for all services in April 1977 was 766 million available tonne-kilometres, a marginal fall as compared with April 1976 due to an industrial dispute.

The scheduled service output of 489 million available tonne-kilometres was 8·1 per cent lower than a year earlier. The overall load factor was 52·3 per cent compared with 53·7 the previous year. Seat kilometres used were 54·8 per cent of those available. Seat factors on domestic and international scheduled services were 64·0 and 54·3 per cent respectively compared with 58·7 and 56·6 per cent a year earlier.

The non-scheduled output of 277 million available tonne-kilometres was 17·6 per cent higher than in April 1976. Advance Booking charters and Inclusive Tour charters accounted for 29·1 and 92·4 million available tonne-kilometres respectively compared with 24·1 and 89·4 million a year earlier.

NOTE: Statistics of airport activity, passengers and cargo are derived from data supplied by airports. Airline statistics are based on data supplied by the airlines. Data from these two sources are not strictly comparable. There are small differences in timing and more significant differences arise because airlines are not asked to report non-revenue passengers and cargo.

Size Structure of UK Airports and Airlines Year ended 31 March 1977

The above figures are derived from airport statistics.

(a) Excluding passengers to and from the Irish Republic.

(b) Passengers to and from North Africa and Middle East countries have been attributed to the European continent and Mediterranean Sea area.

(c) Commonwealth countries only.

(d) Oil Rigs not included.

London includes Heathrow, Gatwick and Stansted.

S.E. England includes London, Luton, Lydd, Manston and Southend.

N. England comprises the airports in England north of a line from the Mersey to the Humber (Manchester, Liverpool, Blackpool, Newcastle, Leeds/Bradford and Tees-side).

Glasgow includes Prestwick and Abbotscinch.

- (a) N. France comprises the airports north of the line of 49° latitude.
- (b) Soviet Union and Eastern Europe includes the United Soviet Socialist Republics, Bulgaria, Czechoslovakia, Hungary, Poland, Roumania and the Eastern Zone of Germany but excluding Berlin.
- (c) North Africa includes Algeria, Libya, Morocco and Tunisia.
- (d) Commonwealth countries only.
- (e) Commonwealth countries including Rhodesia.
- (f) Middle East includes Iraq, Iran, Israel, Jordan, Lebanon, Persian Gulf States, Saudi Arabia, Sudan and the United Arab Republic.

- (g) Total is in respect of charter passengers only. Passengers on scheduled flights included in London – Other Italy.
- (h) Total is in respect of charter passengers only. Passengers on scheduled flights included in other routes to Italy.

These figures are based on the origin and destination of passengers as reported to UK Airport Authorities by UK and Foreign airlines. Operators are required to report in respect of each service operated the point of uplift and discharge of each passenger. The figures may not reflect a passenger's entire air journey; the point at which a passenger disembarks from a particular service may not represent their ultimate destination.

Although Operators are asked to report all passenger journeys, in some cases the actual point of uplift or discharge is not recorded. In such cases all passengers are allocated to the end point of the service, i.e. the aircraft's ultimate origin or destination. This has been the practice since the 1 January 1976—before this date missing information was replaced by estimates made by the Authority. The figures in this table include all passengers carried on scheduled and charter services excluding those carried on aircraft chartered by Government Departments.

Table 19

TOTAL	373 484	541 942	-31

(a) Heathrow, Gatwick and Stansted

Traffic counted in either direction

The figures show the uplift and discharge of passengers according to the destination and origin of the route. Because of the method of collection of this information there are discrepancies between the reports received from airports on a route, particularly in the case of multi-sector flights. In most cases, however, the discrepancies are small, but in a few cases the figures include an estimated component.

Cargo by Type and Nationality of Operator April 1977

(a) Under revision.

Appendix A Definitions—Traffic Statistics

MOVEMENTS AT AIRPORTS

An air transport movement	is a landing or a take-off of an aircraft engaged on commercial air transport. The types of movement covered are all scheduled service movements, whether loaded or empty, and charter movements transporting passengers or cargo from one point to another. All other types of commercial flying are excluded (e.g. flights returning to the airport of take-off without landing elsewhere, empty charter positioning flights paid for by the charterer, ferrying of empty aircraft, etc.).
Empty charter positioning flights	are flights by chartered aircraft moving into position for transport flights or returning to base after such flights.
Other commercial flights	are miscellaneous non-transport charter flights (e.g. commercial delivery or ferry of empty aircraft and local flights for the Press, survey companies or farmers).
Test and training flights	are flights for the purpose of testing aircraft or airports, or for training flying crew or ground personnel. Also included in this category are demonstration flights by makers or sellers of aircraft and aviation equipment. Aero-club instructional flights are excluded from this category and shown under 'Aero-club'.
Other non-commercial flights	by air transport operators are flights by air transport operators for the sole purpose of moving their own aircraft, personnel or stores from one place to another, and air transport flights forced to return to base by bad weather, engine failure or other causes.
Private flights	are flights for purely private purposes by private owners or other private aircraft operators, excluding aero-club flights.
Aero-club flights	are flights operated by aero-club members for instruction or pleasure.
Official flights	are flights for official purposes by British or foreign civil Government Departments excluding air transport movements.
Military flights	are flights by British or foreign military personnel exclusively for military purposes.

AIR PASSENGERS

Passengers	includes all revenue and non-revenue passengers on air transport flights. Air crew being carried on such flights other than as members of the aircraft's complement are classified as non-revenue passengers.
Revenue passengers	are those who pay 25 per cent or more of the normal applicable fare.
A terminal passenger	is a passenger joining or leaving the aircraft flight at the reporting airport. A passenger travelling between two reporting airports is counted twice, once at each airport.
A transit passenger	is a passenger who arrives at and departs from a reporting airport on the same aircraft which is transiting the airport. Each transit passenger is counted once only and not once on arrival and once on departure.

TYPES OF SERVICES

International services	are services flown between the United Kingdom (including Great Britain, Isle of Man, Channel Islands and Northern Ireland) and places outside.
Domestic services	are services flown entirely within Great Britain, Isle of Man, Channel Islands and Northern Ireland.
Cabotage	is traffic carried between territories of the United Kingdom other than domestic services.
Scheduled services	are those performed according to a published timetable, including those supplementary thereto, and open to use by members of the public.

Non-scheduled or charter services	include all air transport flights other than scheduled services.
Separate fare charters	are those where the charterer re-sells part of the capacity of the aircraft to the public at large; an organisation, etc.
Inclusive tour	consists of a round trip or circle trip performed in whole or in part by air, organised by a tour operator and offered to the public at a comprehensive price including besides air transport, accommodation for the duration of the trip, surface transport and, where appropriate, other amenities.
Advance booking charters	Charter flights operated under Class 2 licences between the UK and territories overseas in respect of which an operator has sold blocks of seats to one or more licensed travel organisers for resale to passengers. Advance details of sales to travel organisers and sales of seats to passengers have to be notified to the Civil Aviation Authority.
Sole-use charters	are those where the charterer has exclusive use of the whole capacity of the aircraft and does not dispose of any of it to third persons for reward.
Licence	means an air transport licence granted under Section 22 of the Civil Aviation Act 1971.

CLASSES OF LICENCE

Class 1	authorises scheduled service flights;
Class 2	authorises advance booking charter flights;
Class 3	authorises inclusive tour charter flights;
Class 4	authorises other charter flights for the carriage of passengers;
Class 5	authorises substitute flights;
Class 6	authorises charter flights for the carriage of cargo and attendants;
Class 7	authorises sole-use charter flights (except exempted operations);
NB	These definitions are not intended as a comprehensive statement of each type of licence. They define the general purpose of the types of flights authorised by each class of licence. The specification for each class of licence is published in the Civil Aviation Authority Official Record Series 1.

Exempt operations	are operations for which a licence is not required. The Civil Aviation Authority in pursuance of its powers under paragraph (a) of Section 21 (2) of the Civil Aviation Act 1971 has by an instrument dated 29 March 1972 and later instruments specified a number of types of flights for which a licence is not required. The specifications of such flights are published in the Authority's Official Record Series 1 and include all sole-use charter flights other than those made to or from vessels or installations used in connection with oil or gas exploration or production under the sea. Other examples are ambulance flights, aircrew training and test flights, Government charters, helicopters carrying externally suspended loads, etc.
--------------------------	---

Cargo	means the weight of any property carried on an aircraft including the weight of vehicles carried, mail and diplomatic bags, but excluding passengers' baggage. When related to the activity of an airline or airlines, cargo uplifted means the number of tonnes of revenue cargo that is obtained by counting each tonne of cargo on a particular flight (with one flight number) once only and not repeatedly on each individual stage of that flight. The only exception to this is for cargo flown on both the international and domestic stages of the same flight which is considered in competition both as a domestic and an international shipment or despatch.
--------------	--

When related to the activity of an airport it is usual to measure cargo as uplifted and set down. Cargo in transit through the airport on the same aircraft is excluded as is mail, company stores, excess baggage, and diplomatic bags picked up and set down.

Appendix B Measures and their Computation

The Civil Aviation Authority follows closely the statistical practices of the International Civil Aviation Organisation.

Aircraft accident	An occurrence associated with the operation of an aircraft which takes place between the time any person boards the aircraft with the intention of flight until such time as all such persons have disembarked, in which (a) any person suffers death or serious injury as a result of being in or upon the aircraft or by direct contact with the aircraft or anything attached thereto, or (b) the aircraft incurs damage or structural failure which adversely affects the structure strength, performance or flight characteristics of the aircraft and which would normally require major repair or replacement of the affected component.
Aircraft days available	The sum of the number of days each aircraft is available for use during the year. This figure includes days required for maintenance and overhaul but it does not include days between the date of purchase and the date actually placed in service, days out of service due to major accidents or conversion, days when an aircraft is in possession of others or is not available because of government action such as grounding by government regulatory agencies.
Aircraft departures	The number of take-offs of aircraft. For statistical uses, departures are equal to the number of landings made or flight-stages flown.
Aircraft hours	An aircraft hour is said to be performed when an aircraft operates one hour; aircraft hours are measured on the basis of block-to-block time.
Aircraft hours flown per day	This is an average per aircraft measure computed by dividing the actual hours of use by the number of days on which the aircraft are available.
Aircraft kilometres performed	Aircraft kilometres equal the sum of the products obtained by multiplying the number of flights performed by the stage distance.
Aircraft movements	An aircraft take-off or landing at an airport. For airport traffic purposes one arrival and one departure are counted as two movements.
All cargo services	Services relating to scheduled or non-scheduled flights performed by aircraft carrying loads other than passengers, i.e. freight, baggage, mail.
Baggage	Personal property of passengers and crew carried on an aircraft by agreement with the operator.
Block-to-block/ chock-to-chock time	The total number of hours (and minutes) measured from the time the aircraft moves from the loading point until it stops at the unloading point.
Capacity offered per aircraft hour	This is an average per aircraft computed by dividing the tonne-kilometres available by the related aircraft hours of flight.
Capacity offered per flight	This is an average per aircraft computed by dividing the tonne-kilometres available by the related number of aircraft departures.
Cargo (or mail) tonne-kilometres performed	A metric tonne of cargo carried one kilometre. Cargo tonne-kilometres equal the sum of the products obtained by multiplying the number of tonnes of cargo, diplomatic bags carried on each flight stage by the stage distance. Mail tonne-kilometres are computed in the same way.

Cargo (or mail) tonnes carried	The number of tonnes of cargo carried is obtained by counting each tonne of cargo or mail on a particular flight (with one flight number) once only and not repeatedly on each individual stage of that flight. The only exception to this is for cargo flown on both the international and domestic stages of the same flight, which is considered in computation both as a domestic and an international shipment or despatch. The same principle is used in calculating mail tonnes carried.
Distance flown per passenger	The average distance flown per passenger is computed by dividing the passenger-kilometres by the related number of passengers carried.
Distance flown per tonne of cargo	The average distance flown per tonne of cargo is computed by dividing the cargo tonne-kilometres performed by the related number of tonnes of cargo carried.
Flights (commercial air transport)	The operation of aircraft on a stage or number of stages with an unchanging flight number is counted as one flight. (Technical stops are not counted.) An air transport operation having both international and domestic stages would be counted as an international flight and also a domestic flight.
Passenger-kilometres performed	A passenger-kilometre is performed when a passenger is carried one kilometre. Calculation of passenger-kilometres equals the sum of the products obtained by multiplying the number of revenue passengers carried on each flight stage by the stage distance. The resultant figure is equal to the number of kilometres travelled by all passengers.
Passenger load factor	Passenger-kilometres performed divided by seat-kilometres available and expressed as a percentage.
Passenger revenue per traffic-unit	This is a type of financial measurement which relates the passenger traffic applicable to the passenger revenues. It is computed by dividing passenger revenues by the passenger-kilometres performed.
Passengers carried	The number of passengers carried is obtained by counting each passenger on a particular flight (with one flight number) once only and not repeatedly on each individual stage of that flight, with a single exception that a passenger flying on both the international and domestic stages of the same flight is counted as both a domestic and an international passenger.
Passengers carried per aircraft	The average number of passengers per aircraft is computed by dividing passenger-kilometres by the related aircraft kilometres flown.
Payload capacity	Total of aircraft capacity available for the carriage of revenue load (passengers, baggage, cargo and mail) measured in metric tonnes.
Payload capacity per aircraft	This is an average per aircraft computed by dividing the tonne-kilometres available by the related aircraft kilometres flown.
Payload carried	The revenue load of passengers, baggage, cargo and mail carried in the aircraft as measured in metric tonnes.
Seat-kilometres available	A seat-kilometre is available when a seat is flown one kilometre. Seat-kilometres available are equal to the sum of the products obtained by multiplying the number of passenger seats available for sale on each flight stage by the stage distance. Seats not actually available for the carriage of passengers because of the weight of fuel or other load are excluded in the calculations.

Seats available per aircraft	This is an average per aircraft computed by dividing the seat-kilometres available by the related aircraft kilometres flown.
Speed flown per aircraft	This is an average per aircraft measure computed by dividing the aircraft kilometres flown by the related aircraft hours of flight.
Stage distance flown per aircraft	The average stage distance flown per aircraft is computed by dividing the aircraft kilometres flown by the related number of aircraft departures.
Tonne-kilometres available	A metric tonne of available payload space flown one kilometre. Tonne-kilometres available equals the sum of the products obtained by multiplying the number of tonnes available for the carriage of revenue load (passengers, cargo and mail) on each flight stage by the stage distance.
Tonne-kilometres performed	A metric tonne of revenue load carried one kilometre. Tonne-kilometres performed equals the sum of the products obtained by multiplying the number of tonnes of revenue load carried on each flight stage by the stage distance.
Tonnes available	The capacity of the aircraft for the carriage of payload measured in tonnes.
Weight load factor	Tonne-kilometres performed divided by tonne-kilometres available and expressed as a percentage.
