Foreword

1 CONTENT

- 1.1 *CAA Monthly Statistics* is prepared by the Civil Aviation Authority with the co-operation of the United Kingdom airport and airline operators; some of this information is required by the Civil Aviation Act, 1971. Statistics for the Channel Islands airports are provided by the Commandant for Jersey Airport and the Office of the Lieutenant Governor for Guernsey and Alderney Airports. The assistance from all these authorities is gratefully acknowledged.
- 1.2 Some of the figures included in *CAA Monthly Statistics* are provisional only and may be revised in later issues. Figures contained in monthly and quarterly tables have not been seasonally adjusted, but figures are given, in the tables covering past years, for the most recent six months and the corresponding six months one year earlier.

2 CONVENTIONS

- 2.1 **Symbols and Abbreviations** The following are used throughout:

+	= UK Customs airport
.	= not available
—	= nil or less than half the final digit shown
n.e.i.	= not elsewhere included
a.t-km	= available tonne-kilometres
A.T. Movements	= Air Transport Movements

- 2.2 **Rounding of Figures** In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

- 2.3 **Units of Measurement** Metric measurements are used throughout *CAA Monthly Statistics*.

Tonne	= 1000 kilograms
Tonne-kilometres	= The product obtained by multiplying the number of tonnes carried by the distance flown measured in kilometres

Conversion factors (foot/pound system to metric system)

1 short ton (2000 lbs)	= 0.9072 tonnes
1 ton (2240 lbs)	= 1.0160 tonnes
1 statute mile (5280 feet)	= 1.6093 kilometres
1 short ton-mile	= 1.4600 tonne-kilometres

The explanations of other terms used throughout the Tables are contained in the section on Definitions immediately following the Tables.

3 ENQUIRIES

- 3.1 **Statistics** Enquiries concerning the information in *CAA Monthly Statistics* should be addressed, according to the subject, as follows:

4 CIVIL AVIATION STATISTICS FOR EARLIER YEARS Statistics for the period from January 1968 to December 1972 were published in the Civil Aviation Series of the Department of Trade & Industry's *Business Monitors*.

The series comprise:

CA. 1	<i>Airport activity</i>	(Monthly)
CA. 2	<i>Air passengers</i>	"
CA. 3	<i>Air freight & mail</i>	"
CA. 4	<i>Airline operations</i>	"
CA. 5	<i>Airline operations</i>	(Quarterly)
CA. 6	<i>Domestic passenger traffic</i>	"
CA. 7	<i>Air passengers – international and cabotage</i>	"
CA. 8	<i>Airline financial statistics</i>	(Annually – 1968 to 1971 only)

Annual versions of CA. 1 to CA. 7 were also published.

Civil Aviation Statistics—August 1975

Activity at UK Airports

During August 1975 UK Air Transport Movements fell to a level of almost 71 000, a decline of 3·3 per cent against 1974. A similar rate of decline was reported from London area airports (an aggregate decline of 3·2 per cent) and airports elsewhere in the UK (an aggregate decline of 3·4 per cent). When comparing the two three month periods June-August 1974 and 1975 the overall rate of decline was heavier at 4·2 per cent. London area airports recorded an aggregate 5·5 per cent decline, and once again only Stansted and Gatwick achieved growth against one year previously (24·4 per cent growth; 69 additional movements per month and 0·6 per cent growth; 44 additional movements per month respectively). Heathrow reported a decline of 7·6 per cent (1900 fewer movements), Luton 7·8 per cent decline (186 fewer movements) and Southend 4·5 per cent decline (53 fewer movements). The rate of decline over the remainder of the UK was half (at 2·8 per cent) that of the London area during this period, when the greatest increases in actual movements again occurred at Aberdeen, Lydd and Manchester (858 additional movements; 46·4 per cent growth, 346 movements; 17 fold growth – the highest of all airports over this period – and 223 movements, 5·0 per cent growth respectively). Glasgow reported the heaviest actual decline in movements (578 fewer movements; 13·6 per cent decline) whilst Gloucester the heaviest rate of decline (58·5 per cent; 83 fewer movements). The 4·2 per cent decline in total movements in the June to August period comprised an 8·0 per cent decline in scheduled movements and a 9·5 per cent growth in charter flights. The UK operators' share of the former declined 1·5 percentage points to 73·6 per cent, and their share of the latter fell marginally to 84·9 per cent resulting in their operating 76·4 per cent of total movements – a marginal decline on the corresponding period during 1974.

In the June to August period a monthly average of 4·6 million terminal passengers used UK airports – 6·3 per cent more than during the corresponding period of 1974. During the month of August the number of terminal passengers carried increased to almost 5·0 million – 7·7 per cent more than in 1974. London area airports reported an aggregate 6·5 per cent growth over the three month period which comprised growth at Heathrow, Gatwick and Stansted (7·3 per cent growth; 147 000 additional passengers, 8·0 per cent growth; 50 000 additional passengers and 43·7 per cent growth; 9000 additional passengers respectively) against a decline in the number of passengers at Southend and Luton (19·5 per cent decline; 6000 fewer passengers and 3·6 per cent decline; 9000 fewer passengers respectively). Outside the London area an aggregate growth of 5·9 per cent was achieved. Manchester recorded the greatest actual increase in passengers handled (50 000 additional passengers; 19·5 per cent growth) followed by Aberdeen and East Midlands (16 500 passengers; 37·6 per cent growth and 13 000 passengers; 24·7 per cent growth respectively). Lydd, which continued to report the highest rate of growth, increased its rate to over 46 fold the 1974 level. Gloucester's rate of decline of 48·2 per cent was the heaviest, whilst Liverpool once more reported the

largest decline in actual passengers (9000 fewer passengers; 15·8 per cent decline). The 6·3 per cent growth in passengers in the June to August period resulted from a 3·8 per cent growth in scheduled passengers and a 12·9 per cent growth in charter passengers. The UK operators' share of the total and scheduled service passengers declined by 1·9 percentage points to 69·3 per cent and 65·2 per cent respectively, and their share of charter passengers fell 2·7 percentage points to 78·9.

Of the monthly average 4·6 million passengers who used UK airports in the June to August period, 3·4 million travelled by international services (8·9 per cent growth against 1974) and 1·2 million by domestic services (a marginal decline). International route passengers ~~on charter services~~ experienced a 9·6 per cent growth over this period, and those on scheduled services a 6·7 per cent growth. Once again more passengers travelled by scheduled services to USA, France and Irish Republic than on other routes (12·7 per cent of total; 1·9 per cent decline, 12·0 per cent of total; 3·3 per cent growth and 9·1 per cent of total; 8·3 per cent growth). Passengers on international charter services experienced an aggregate 14·2 per cent growth and the three most heavily used routes were once more those to Spain (42·1 per cent of total; 16·5 per cent growth), Italy (11·0 per cent of total; 6·6 per cent growth) and those to Canada (7·8 per cent of total; 25·5 per cent growth). Over the June to August period only two of the domestic route groupings on table 19 reported growth against the corresponding period of 1974 – those servicing London (3·4 per cent growth) and those servicing Edinburgh (14·7 per cent growth). There was a marginal decline in passengers travelling to and from Belfast, a 4·0 per cent decline on those to the Channel Islands, 20·8 per cent decline on Glasgow services and 10·7 per cent decline on those to the Isle of Man.

The month of August saw the level of air freight fall 13·8 per cent against 1974 to almost 48 000 tonnes. Tonnage in the London area fell by an aggregate 10·7 per cent, whilst over the rest of the UK it fell by 24·8 per cent. When comparing the two three month periods June to August an aggregate UK decline of 13·5 per cent was reported – 10·3 per cent fall in the London area and 25·0 per cent over the remainder of the UK. Stansted and Gatwick were alone amongst London area airports in achieving a growth in tonnage (48 additional tonnes; 3·3 per cent growth and 2055 additional tonnes; 47·1 per cent growth). Heathrow handled 15·9 per cent less freight than in 1974 (6135 fewer tonnes), Luton 30·7 per cent less freight (73 fewer tonnes) and Southend 36·8 per cent less (678 fewer tonnes). Lydd again recorded both the greatest increase in actual tonnage and the heaviest rate of growth (220 additional tonnes; 12 fold growth) and Edinburgh the heaviest rate of decline (57·7 per cent drop; 191 fewer tonnes). The second highest increase in actual tonnage outside the London area occurred at Aberdeen (76 additional tonnes; 31·5 per cent growth) followed by Southampton with 67 additional tonnes (71·4 per cent growth). The heaviest actual decline in tonnage continued to be recorded at Manchester (1091 fewer tonnes; 30·2 per cent decline). Despite a 38·7

per cent growth in charter tonnage over this period, the 20·6 per cent fall in scheduled tonnage resulted in a 13·5 per cent decline in total freight moving through UK airports. The UK operators marginally increased their share of total tonnage (to 52·1 per cent), and whilst their share of that carried by scheduled services fell 4·4 percentage points (to 45·7 per cent) their share of that moving by charter services increased 16·3 percentage points to stand at 79·0 per cent.

Output of UK Airlines

The output of UK airlines for all services in August 1975 was over 884 million available tonne-kilometres, an increase of 7·0 per cent on August 1974.

The scheduled service output of 542 million available tonne-kilometres was one per cent higher than a year earlier. The overall load factor of 58·7 per cent compared with 57·5 per cent in August 1974. Seat kilo-

metres used were 67·1 per cent of those available compared with 64·4 per cent in August 1974. Seat factors on domestic and international scheduled services were 69·4 and 66·9 per cent respectively compared with 64·9 and 64·4 per cent a year earlier.

The non-scheduled output of 342 million available tonne-kilometres was 18·2 per cent higher than a year earlier. Advance Booking Charters and Inclusive Tour Charters accounted for 58·1 and 136·1 million available tonne-kilometres respectively compared with 57·4 and 122·0 million in August 1974.

NOTE: Statistics of airport activity, passengers and cargo are derived from data supplied by airports. Airline statistics are based on data supplied by the airlines. Data from these two sources are not strictly comparable. There are small differences in timing and more significant differences arise because airlines are not asked to report non-revenue passengers and cargo.

Size Structure of UK Airports and Airlines Year ended 30 June 1975

London includes Heathrow, Gatwick and Stansted.

S.E. England includes Ashford, London, Luton, Lydd, Manston and Southend.

N. England comprises the airports in England north of a line from the Mersey to the Humber (Manchester, Liverpool, Blackpool, Newcastle, Leeds/Bradford and Tees-side).

Glasgow includes Prestwick and Abbotscinch.

- (a) N. France comprises the airports north of the line of 49° latitude.
- (b) Soviet Union and Eastern Europe includes the United Soviet Socialist Republics, Bulgaria, Czechoslovakia, Hungary, Poland, Roumania and the Eastern Zone of Germany but excluding Berlin.
- (c) North Africa includes Algeria, Libya, Morocco and Tunisia.
- (d) Commonwealth countries only.
- (e) Commonwealth countries including Rhodesia.
- (f) Middle East includes Iraq, Iran, Israel, Jordan, Lebanon, Persian Gulf States, Saudi Arabia, Sudan and the United Arab Republic.
- (g) Total is in respect of charter passengers only. Passengers on scheduled flights included in London — Other Italy.
- (h) Total is in respect of charter passengers only. Passengers on scheduled flights included in other routes to Italy.

The figures show the uplift and discharge of passengers at United Kingdom airports on services operated there according to their immediate destination or last point of embarkation overseas on those services. These may not, in all cases, be the origin or destination of passenger journeys; they may be places at which a journey was broken or a connection made with another air service. The figures in this table include all passengers carried on scheduled and charter services excluding those carried on aircraft chartered by Government Departments.

Domestic Passengers by Main Routes

Table 19

TOTAL		694.4	697.7	—

(a) Heathrow, Gatwick and Stansted
 Traffic counted in either direction

The figures show the uplift and discharge of passengers according to the destination and origin of the route. Because of the method of collection of this information there are discrepancies between the reports received from airports on a route, particularly in the case of multi-sector flights. In most cases, however, the discrepancies are small, but in a few cases the figures include an estimated component.

(a) Undergoing revision.

Appendix A Definitions

AIRPORT ACTIVITY

An air transport movement	is a landing or a take-off of an aircraft engaged on commercial air transport. The types of movement covered are all scheduled service movements, whether loaded or empty, and charter movements transporting passengers or cargo from one point to another. All other types of commercial flying are excluded (e.g. flights returning to the airport of take-off without landing elsewhere, empty charter positioning flights paid for by the charterer, ferrying of empty aircraft, etc.).
Empty charter positioning flights	are flights by chartered aircraft moving into position for transport flights or returning to base after such flights.
Other commercial flights	are miscellaneous non-transport charter flights (e.g. commercial delivery or ferry of empty aircraft and local flights for the Press, survey companies or farmers).
Test and training flights	are flights for the purpose of testing aircraft or airports, or for training flying crew or ground personnel. Also included in this category are demonstration flights by makers or sellers of aircraft and aviation equipment. Aero-club instructional flights are excluded from this category and shown under 'Aero-club'.
Other non-commercial flights	by air transport operators are flights by air transport operators for the sole purpose of moving their own aircraft, personnel or stores from one place to another, and air transport flights forced to return to base by bad weather, engine failure or other causes.
Private flights	are flights for purely private purposes by private owners or other private aircraft operators, excluding aero-club flights.
Aero-club flights	are flights operated by aero-club members for instruction or pleasure.
Official flights	are flights for official purposes by British or foreign civil Government Departments excluding air transport movements.
Military flights	are flights by British or foreign military personnel exclusively for military purposes.

AIR PASSENGERS

Passengers	includes all revenue and non-revenue passengers on air transport flights. Air crew being carried on such flights other than as members of the aircraft's complement are classified as non-revenue passengers.
Revenue passengers	are those who pay 25 per cent or more of the normal applicable fare.
A terminal passenger	is a passenger joining or leaving the aircraft flight at the reporting airport. A passenger travelling between two reporting airports is counted twice, once at each airport.
A transit passenger	is a passenger who arrives at and departs from a reporting airport on the same aircraft which is transiting the airport. Each transit passenger is counted once only and not once on arrival and once on departure.

International services	are services flown between the United Kingdom (including Great Britain, Isle of Man, Channel Islands and Northern Ireland) and places outside.
Domestic services	are services flown entirely within Great Britain, Isle of Man, Channel Islands and Northern Ireland.
Cabotage	is traffic carried between territories of the United Kingdom other than domestic services.
Scheduled services	are those performed according to a published timetable, including those supplementary thereto, and open to use by members of the public.
Non-scheduled services	include all air transport flights other than scheduled services.
Charter services	are those transporting passengers or cargo for hire or reward from one point to another, other than scheduled services.

AIR CARGO

Cargo	in airport statistics means the weight of cargo (including accompanied vehicles) picked up and set down by aircraft on air transport flights. Cargo in transit through the airport on the same aircraft is excluded as is mail, company stores, excess baggage and diplomatic bags picked up and set down. (See also definition below under 'Airline Operations').
Tonnes	are metric tonnes of 1 000 kilogrammes (2 204.62 lb).

AIRLINE OPERATIONS

Advance booking charters (ABC)	Charter flights operated under Class 2 licences between the UK and designated territories overseas in respect of which an operator has sold blocks of seats to one or more licensed travel organisers for resale to passengers. Details of the sales to travel organisers have to be notified to the Civil Aviation Authority 120 days before the date of the flight: details of the sales of seats to passengers which must be on a round trip basis have to be notified to the Authority 60 days before departure.
Aircraft-hour	an aircraft hour is performed when an aircraft flies for one hour: aircraft hours are measured on the basis of block-to-block time.
Aircraft-kilometre (Aircraft-km)	An aircraft-kilometre is performed when an aircraft flies one kilometre. Aircraft-kilometres equal the sum of the products obtained by multiplying the number of flights performed on each stage flight by the stage distance measured in kilometres.
Cargo	in airline statistics means the weight of any property carried on an aircraft, including the weight of vehicles carried, mail and diplomatic bags, but excluding passengers' baggage. (See also definition above for 'Air Cargo' statistics and definition below for 'Passenger tonne-kilometres'.)
Cargo tonne-km	means a metric tonne of cargo carried one kilometre. Cargo tonne-kilometres equal the sum of products obtained by multiplying the number of tonnes of cargo carried on each flight stage by the stage distance measured in kilometres.

Cargo uplifted	means the number of tonnes of cargo which is obtained by counting each tonne of cargo on a particular flight (with one flight number) once only and not repeatedly on each individual stage of that flight. The only exception to this is for cargo flown on both the international and domestic stages of the same flight which is considered in computation both as a domestic and an international shipment or despatch.
Daily utilisation per a/c (hrs)	is an average per aircraft measure computed by dividing the aircraft hours of use by the number of days on which the aircraft are available. This latter figure includes days required for maintenance and overhaul but it does not include days between the date of purchase and the date actually placed in service, days out of service due to major accidents or conversion, days when an aircraft is in the possession of others or is not available because of government action, such as grounding by government order.
Exempt operations	are operations for which a licence is not required. The Civil Aviation Authority in pursuance of its powers under paragraph (a) of Section 21(2) of the Civil Aviation Act 1971 has by an instrument dated 29 March 1972 and later instruments specified a number of types of flights for which a licence is not required. The specifications of such flights are published in the Authority's Official Record Series 1 but typical examples are ambulance flights, aircrew training and test flights, Government charters, helicopters carrying externally suspended loads, etc.
Inclusive tours (IT)	are separate fare charters where the cost to the passenger includes the cost of accommodation.
Licence	means an air transport licence granted under Section 22 of the Civil Aviation Act 1971.
Mail	covers only that handled by postal administrations and includes troop mail.
Mail tonne-km	are calculated using the same principle as when calculating cargo tonne-km.
Overall load factor	is an expression of tonne-km used as a percentage of tonne-km available.
Passengers	in airline statistics means revenue passengers only, i.e. passengers paying 25 per cent or more of the normal fare.
Passenger-km	means a passenger carried one kilometre. Calculation of passenger-kilometre equals the sum of the products obtained by multiplying the number of passengers carried on each flight stage by the stage distance measured in kilometres. The resultant figure is equal to the number of kilometres travelled by all passengers. Note.—Passenger-km is numerically equivalent to Seat-km used.
Passenger load factor	is an expression of seat-km used as a percentage of seat-km available.
Passengers uplifted and passengers carried	The number of passengers uplifted is obtained by counting each revenue passenger on a particular flight (with one flight number) once only and not repeatedly on each individual stage of flight.
Passenger tonne-kilometres	is deduced as the difference between the total tonne-kilometres used and tonne-kilometres used for cargo and/or mail; it includes the weight of passengers' free and excess baggage.

Seat-km available a seat-kilometre is available when a seat is flown one kilometre. Seat-kms available are equal to the sum of the products obtained by multiplying the number of passenger seats available for sale on each stage flight by the stage distance measured in kilometres.

Seat-km used a seat-kilometre is used when a seat occupied by a revenue passenger is flown for one kilometre. Seat-km used is equal to the sum of the products obtained by multiplying the number of revenue passengers carried on each stage flight by the stage distance measured in kilometres.

Separate fare charters are those where the charterer re-sells part of the capacity of the aircraft to the public at large; an organisation, etc.

Sole-use charters are those where the charterer has exclusive use of the whole capacity of the aircraft and does not dispose of any of it to third persons for reward.

Stage flights that part of the flight between two consecutive places, i.e. from take-off to the next landing, excluding technical stops, on the route.

Tonne-km available a metric tonne of payload space available flown one kilometre. Tonne-km available is equal to the sum of the products obtained by multiplying the number of tonnes available for the carriage of revenue load (passengers and cargo) on each stage flight by the distance measured in kilometres.

Tonne-km used a metric tonne of revenue load carried one kilometre. Tonne-km used is the sum of the products obtained by multiplying the number of tonnes of revenue load (passengers and cargo) carried on each stage flight by the distance measured in kilometres.

Appendix B Classes of Licence

NB These definitions are not intended as a comprehensive statement of each type of licence. They define the general purpose of the types of flights authorised by each class of licence. The specification for each class of licence is published in the Civil Aviation Authority Official Record Series 1.

Class 1 authorises scheduled service flights;

Class 2 authorises advance booking charter flights;

Class 3 authorises inclusive tour charter flights;

Class 4 authorises other charter flights for the carriage of passengers;

Class 5 authorises substitute charter flights;

Class 6 authorises charter flights for the carriage of cargo and attendants;

Class 7 authorises sole-use charter flights.
