Foreword

1 CONTENT

- 1.1 *CAA Monthly Statistics* is prepared by the Civil Aviation Authority with the co-operation of the United Kingdom airport and airline operators; some of this information is required by the Civil Aviation Act, 1971. Statistics for the Channel Islands airports are provided by the Commandant for Jersey Airport and the Office of the Lieutenant Governor for Guernsey and Alderney Airports. The assistance from all these authorities is gratefully acknowledged.
- 1.2 Some of the figures included in *CAA Monthly Statistics* are provisional only and may be revised in later issues. Figures contained in monthly and quarterly tables have not been seasonally adjusted, but figures are given, in the tables covering past years, for the most recent six months and the corresponding six months one year earlier.

2 CONVENTIONS

- 2.1 **Symbols and Abbreviations** The following are used throughout:

+	=	UK Customs airport
..	=	not available
—	=	nil or less than half the final digit shown
n.e.i.	=	not elsewhere included
a.t-km	=	available tonne-kilometres

A.T. Movements = Air Transport Movements

- 2.2 **Rounding of Figures** In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

- 2.3 **Units of Measurement** Metric measurements are used throughout *CAA Monthly Statistics*.

Tonne	=	1000 kilogrammes
Tonne-kilometres	=	The product obtained by multiplying the number of tonnes carried by the distance flown measured in kilometres

Conversion factors (foot/pound system to metric system)

1 short ton (2000 lbs)	=	0.9072 tonnes
1 ton (2240 lbs)	=	1.0160 tonnes
1 statute mile (5280 feet)	=	1.6093 kilometres
1 short ton-mile	=	1.4600 tonne-kilometres

The explanations of other terms used throughout the Tables are contained in the section on Definitions immediately following the Tables.

3 ENQUIRIES

4 CIVIL AVIATION STATISTICS FOR EARLIER YEARS Statistics for the period from January 1968 to December 1972 were published in the Civil Aviation Series of the Department of Trade & Industry's *Business Monitors*.

The series comprise:

CA. 1	<i>Airport activity</i>	(Monthly)
CA. 2	<i>Air passengers</i>	"
CA. 3	<i>Air freight & mail</i>	"
CA. 4	<i>Airline operations</i>	"
CA. 5	<i>Airline operations</i>	(Quarterly)
CA. 6	<i>Domestic passenger traffic</i>	"
CA. 7	<i>Air passengers – international and cabotage</i>	"
CA. 8	<i>Airline financial statistics</i>	(Annually – 1968 to 1971 only)

Annual versions of CA. 1 to CA. 7 were also published.

Civil Aviation Statistics—August 1976

Activity at Airports

Air transport movements reached a level of 75 000 during August 1976, a growth of 5·2 per cent against August 1975. London area movements accounted for 37 000 (1·7 per cent growth) whilst over the rest of the UK there was an increase of 8·7 per cent (a total of 38 000 movements). Over the three month period June to August 1976 an aggregate growth of 5·8 per cent was reported compared with a year earlier. This comprised a 2·8 per cent growth in the London area and an increase of 8·9 per cent elsewhere in the UK. With the exception of Stansted all airports within the London area reported growth; Luton only marginally (12 additional movements per month), Heathrow by 1·2 per cent (269 additional movements per month), Southend by 3·5 per cent (39 additional movements per month) and Gatwick by 8·2 per cent (655 additional movements per month). Stansted reported a 2·0 per cent decline (7 fewer movements per month). Outside the London area, Aberdeen reported the greatest increase in actual movements (1235 additional movements per month; 45·6 per cent growth), followed by Edinburgh (250 additional movements; 14·7 per cent growth) and Birmingham (204 additional movements; 9·8 per cent growth). Coventry reported the heaviest rate of decline (−27·3 per cent) and the heaviest growth rate was at Wick (83·1 per cent). Scheduled movements during the period June to August 1976, as compared with the previous year, grew by 3·3 per cent and charter movements by 13·4 per cent. The UK operators' share of total and scheduled movements increased marginally to stand at 76·6 per cent and 73·9 per cent respectively, but their share of charter traffic declined marginally to stand at 84·1 per cent.

More than 5 million terminal passengers used UK airports during August (2·8 per cent more than in August 1975). London area passengers grew by 4·4 per cent to more than 3·5 million whilst over the remainder of the UK there was a marginal decline (1·6 million passengers). During the three months June to August 1976 an aggregate growth of 4·4 per cent was reported, 5·9 per cent in the London area and 1·3 per cent elsewhere in the UK. Gatwick, Heathrow and Southend all reported growth (30 226 additional passengers per month; 4·5 per cent growth, 171 537 additional passengers; 7·9 per cent growth and 1688 additional passengers; 7·0 per cent growth respectively). Luton recorded 7·3 per cent decline (17 385 fewer passengers per month) and Stansted 5·0 per cent decline (1474 fewer passengers). Outside the London area, Edinburgh reported the greatest increase in actual passengers handled (19 920 additional passengers per month; 23·4 per cent growth), followed by Aberdeen with 18 637 additional passengers (30·8 per cent growth) and Manchester with 18 504 additional passengers (6·0 per cent growth). Belfast reported the heaviest fall in passengers handled (15 605 fewer per month; 11·6 per cent decline), whilst the heaviest rate of decline (−78·3 per cent) was reported at Manston. The heaviest growth rate was reported at Cambridge (72·0 per cent). Passengers travelling by scheduled services increased by 4·6 per cent and those by charter

services by 3·9 per cent. The UK operators claimed less of these increases than foreign operators; their share of total passengers fell 1·1 percentage points to 68·2 per cent; scheduled passengers fell 1·0 percentage points to 64·2 per cent and charter passengers fell 1·1 percentage points to 77·8 per cent.

Between June and August 1976 a monthly average of 4·8 million passengers used UK airports; 3·6 million travelled on international services (5·0 per cent growth) and 1·2 million on domestic services (2·0 per cent growth). International scheduled passengers increased by 7·0 per cent. Services to the USA, which carried 14·5 per cent of the total scheduled traffic achieved a 22·6 per cent growth. Services to France carried 11·2 per cent of the traffic (a marginal decline) and those to the Irish Republic 8·6 per cent (1·5 per cent growth). Total international charter passengers increased by 3·0 per cent. Services to Spain carried 35·7 per cent of the traffic (12·8 per cent decline), services to Italy carried 12·1 per cent (12·9 per cent growth) and those to the USA 9·7 per cent (58·2 per cent growth). Of the passengers travelling on the main domestic routes, only those travelling on London services increased (6·2 per cent growth). Routes to the Isle of Man were used by 15·6 per cent fewer passengers, to the Channel Islands by 12·4 per cent fewer, and to Belfast by 12·3 per cent fewer; those to Glasgow and Edinburgh were used by 5·5 per cent fewer and 3·0 per cent fewer respectively.

More than 50 000 tonnes of air freight were handled at UK airports in August 1976, 6·0 per cent growth as compared with August 1975. This comprised an increase of 6·9 per cent over the London area and 2·2 per cent over the rest of the UK. During the period June to August 1976 an overall growth of 4·3 per cent was recorded as compared with the previous year. London area tonnage rose by 4·4 per cent whilst over the rest of the UK tonnage rose by 3·8 per cent. Luton, Stansted and Heathrow all reported growth. In the case of Luton the increase was more than one fold (218·4 additional tonnes per month). Stansted and Heathrow reported 353·2 additional tonnes per month (23·2 per cent growth) and 1556·8 additional tonnes per month (4·8 per cent growth) respectively. Gatwick handled 226·7 fewer tonnes per month (3·5 per cent decline) and Southend 72·0 fewer tonnes (6·2 per cent decline). Outside the London area, Liverpool, Bournemouth and Aberdeen reported the greatest increases in tonnage handled (176·6 additional tonnes per month; 22·2 per cent growth, 176·1 additional tonnes; 46·2 per cent growth and 126·3 additional tonnes; 39·9 per cent growth respectively). Manchester reported the largest fall in tonnage handled (146·4 fewer tonnes per month; 5·7 per cent decline), followed by Southampton with 47·3 fewer tonnes per month (29·3 per cent decline). Freight carried on scheduled services grew by 3·8 per cent whilst that carried on charter services grew by 6·3 per cent. The UK operators' share of total cargo fell (2·5 percentage points to 49·6 per cent), as did their share of scheduled and charter tonnage (2·4 percentage points to 43·3 per cent and 3·2 percentage points to 75·8 per cent respectively).

Output of UK Airlines

The output of UK airlines for all services in August 1976 was 928 million available tonne-kilometres, an increase of 5.0 per cent on August 1975.

The scheduled services output of 574 million available tonne-kilometres was 5.9 per cent higher than a year earlier. The overall load factor was 60.2 per cent compared with 58.7 the previous year. Seat kilometres used were 67.7 per cent of those available. Seat factors on domestic and international scheduled services were 64.4 and 68.0 per cent respectively compared with 69.4 and 66.9 per cent a year earlier.

The non-scheduled output of 354 million available tonne-kilometres was 3.5 per cent higher than in August 1975. Advance Booking Charters and Inclusive Tour Charters accounted for 65.2 and 148.1 million available tonne-kilometres respectively compared with 58.1 and 136.1 million a year earlier.

NOTE: Statistics of airport activity, passengers and cargo are derived from data supplied by airports. Airline statistics are based on data supplied by the airlines. Data from these two sources are not strictly comparable. There are small differences in timing and more significant differences arise because airlines are not asked to report non-revenue passengers and cargo.

Size Structure of UK Airports and Airlines Year ended 30 June 1976

London includes Heathrow, Gatwick and Stansted.

S.E. England includes London, Luton, Lydd, Manston and Southend.

N. England comprises the airports in England north of a line from the Mersey to the Humber (Manchester, Liverpool, Blackpool, Newcastle, Leeds/Bradford and Tees-side).

Glasgow includes Prestwick and Abbotsinch.

(a) N. France comprises the airports north of the line of 49° latitude.

(b) Soviet Union and Eastern Europe includes the United Soviet Socialist Republics, Bulgaria, Czechoslovakia, Hungary, Poland, Roumania and the Eastern Zone of Germany but excluding Berlin.

(c) North Africa includes Algeria, Libya, Morocco and Tunisia.

(d) Commonwealth countries only.

(e) Commonwealth countries including Rhodesia.

(f) Middle East includes Iraq, Iran, Israel, Jordan, Lebanon, Persian Gulf States, Saudi Arabia, Sudan and the United Arab Republic.

(g) Total is in respect of charter passengers only. Passengers on scheduled flights included in London — Other Italy.

(h) Total is in respect of charter passengers only. Passengers on scheduled flights included in other routes to Italy.

These figures are based on the origin and destination of passengers as reported to UK Airport Authorities by UK and Foreign airlines. Operators are required to report in respect of each service operated the point of uplift and discharge of each passenger. The figures may not reflect a passenger's entire air journey; the point at which a passenger disembarks from a particular service may not represent their ultimate destination.

Although Operators are asked to report all passenger journeys, in some cases the actual point of uplift or discharge is not recorded. In such cases all passengers are allocated to the end point of the service, i.e. the aircraft's ultimate origin or destination. This has been the practice since the 1 January 1976—before this date missing information was replaced by estimates made by the Authority. The figures in this table include all passengers carried on scheduled and charter services excluding those carried on aircraft chartered by Government Departments.

Domestic Passengers by Main Routes

Table 19

TOTAL		696.5	694.4	—	

(a) Heathrow, Gatwick and Stansted

Traffic counted in either direction

The figures show the uplift and discharge of passengers according to the destination and origin of the route. Because of the method of collection of this information there are discrepancies between the reports received from airports on a route, particularly in the case of multi-sector flights. In most cases, however, the discrepancies are small, but in a few cases the figures include an estimated component.

Appendix A Definitions—Traffic Statistics

MOVEMENTS AT AIRPORTS

- An air transport movement** is a landing or a take-off of an aircraft engaged on commercial air transport. The types of movement covered are all scheduled service movements, whether loaded or empty, and charter movements transporting passengers or cargo from one point to another. All other types of commercial flying are excluded (e.g. flights returning to the airport of take-off without landing elsewhere, empty charter positioning flights paid for by the charterer, ferrying of empty aircraft, etc.).
- Empty charter positioning flights** are flights by chartered aircraft moving into position for transport flights or returning to base after such flights.
- Other commercial flights** are miscellaneous non-transport charter flights (e.g. commercial delivery or ferry of empty aircraft and local flights for the Press, survey companies or farmers).
- Test and training flights** are flights for the purpose of testing aircraft or airports, or for training flying crew or ground personnel. Also included in this category are demonstration flights by makers or sellers of aircraft and aviation equipment. Aero-club instructional flights are excluded from this category and shown under 'Aero-club'.
- Other non-commercial flights** by air transport operators are flights by air transport operators for the sole purpose of moving their own aircraft, personnel or stores from one place to another, and air transport flights forced to return to base by bad weather, engine failure or other causes.
- Private flights** are flights for purely private purposes by private owners or other private aircraft operators, excluding aero-club flights.
- Aero-club flights** are flights operated by aero-club members for instruction or pleasure.
- Official flights** are flights for official purposes by British or foreign civil Government Departments excluding air transport movements.
- Military flights** are flights by British or foreign military personnel exclusively for military purposes.

AIR PASSENGERS

- Passengers** includes all revenue and non-revenue passengers on air transport flights. Air crew being carried on such flights other than as members of the aircraft's complement are classified as non-revenue passengers.
- Revenue passengers** are those who pay 25 per cent or more of the normal applicable fare.
- A terminal passenger** is a passenger joining or leaving the aircraft flight at the reporting airport. A passenger travelling between two reporting airports is counted twice, once at each airport.
- A transit passenger** is a passenger who arrives at and departs from a reporting airport on the same aircraft which is transitting the airport. Each transit passenger is counted once only and not once on arrival and once on departure.

TYPES OF SERVICES

- International services** are services flown between the United Kingdom (including Great Britain, Isle of Man, Channel Islands and Northern Ireland) and places outside.
- Domestic services** are services flown entirely within Great Britain, Isle of Man, Channel Islands and Northern Ireland.
- Cabotage** is traffic carried between territories of the United Kingdom other than domestic services.
- Scheduled services** are those performed according to a published timetable, including those supplementary thereto, and open to use by members of the public.

Non-scheduled or charter services include all air transport flights other than scheduled services.

Separate fare charters are those where the charterer re-sells part of the capacity of the aircraft to the public at large; an organisation, etc.

Inclusive tour consists of a round trip or circle trip performed in whole or in part by air, organised by a tour operator and offered to the public at a comprehensive price including besides air transport, accommodation for the duration of the trip, surface transport and, where appropriate, other amenities.

Advance booking charters Charter flights operated under Class 2 licences between the UK and territories overseas in respect of which an operator has sold blocks of seats to one or more licensed travel organisers for resale to passengers. Advance details of sales to travel organisers and sales of seats to passengers have to be notified to the Civil Aviation Authority.

Sole-use charters are those where the charterer has exclusive use of the whole capacity of the aircraft and does not dispose of any of it to third persons for reward.

Licence means an air transport licence granted under Section 22 of the Civil Aviation Act 1971.

CLASSES OF LICENCE

Class 1 authorises scheduled service flights;

Class 2 authorises advance booking charter flights;

Class 3 authorises inclusive tour charter flights;

Class 4 authorises other charter flights for the carriage of passengers;

Class 5 authorises substitute charter flights;

Class 6 authorises charter flights for the carriage of cargo and attendants;

Class 7 authorises sole-use charter flights.

NB These definitions are not intended as a comprehensive statement of each type of licence. They define the general purpose of the types of flights authorised by each class of licence. The specification for each class of licence is published in the Civil Aviation Authority Official Record Series 1.

Exempt operations are operations for which a licence is not required. The Civil Aviation Authority in pursuance of its powers under paragraph (a) of Section 21 (2) of the Civil Aviation Act 1971 has by an instrument dated 29 March 1972 and later instruments specified a number of types of flights for which a licence is not required. The specifications of such flights are published in the Authority's Official Record Series 1 but typical examples are ambulance flights, aircrew training and test flights, Government charters, helicopters carrying externally suspended loads, etc.

Cargo means the weight of any property carried on an aircraft including the weight of vehicles carried, mail and diplomatic bags, but excluding passengers' baggage. When related to the activity of an airline or airlines, cargo uplifted means the number of tonnes of revenue cargo that is obtained by counting each tonne of cargo on a particular flight (with one flight number) once only and not repeatedly on each individual stage of that flight. The only exception to this is for cargo flown on both the international and domestic stages of the same flight which is considered in competition both as a domestic and an international shipment or despatch.

When related to the activity of an airport it is usual to measure cargo as uplifted and set down. Cargo in transit through the airport on the same aircraft is excluded as is mail, company stores, excess baggage, and diplomatic bags picked up and set down.

Appendix B Measures and their Computation

The Civil Aviation Authority follows closely the statistical practices of the International Civil Aviation Organisation.

Aircraft accident	An occurrence associated with the operation of an aircraft which takes place between the time any person boards the aircraft with the intention of flight until such time as all such persons have disembarked, in which (a) any person suffers death or serious injury as a result of being in or upon the aircraft or by direct contact with the aircraft or anything attached thereto, or (b) the aircraft incurs damage or structural failure which adversely affects the structure strength, performance or flight characteristics of the aircraft and which would normally require major repair or replacement of the affected component.
Aircraft days available	The sum of the number of days each aircraft is available for use during the year. This figure includes days required for maintenance and overhaul but it does not include days between the date of purchase and the date actually placed in service, days out of service due to major accidents or conversion, days when an aircraft is in possession of others or is not available because of government action such as grounding by government regulatory agencies.
Aircraft departures	The number of take-offs of aircraft. For statistical uses, departures are equal to the number of landings made or flight-stages flown.
Aircraft hours	An aircraft hour is said to be performed when an aircraft operates one hour; aircraft hours are measured on the basis of block-to-block time.
Aircraft hours flown per day	This is an average per aircraft measure computed by dividing the actual hours of use by the number of days on which the aircraft are available.
Aircraft kilometres performed	Aircraft kilometres equal the sum of the products obtained by multiplying the number of flights performed by the stage distance.
Aircraft movements	An aircraft take-off or landing at an airport. For airport traffic purposes one arrival and one departure are counted as two movements.
All cargo services	Services relating to scheduled or non-scheduled flights performed by aircraft carrying loads other than passengers, i.e. freight, baggage, mail.
Baggage	Personal property of passengers and crew carried on an aircraft by agreement with the operator.
Block-to-block/chock-to-chock time	The total number of hours (and minutes) measured from the time the aircraft moves from the loading point until it stops at the unloading point.
Capacity offered per aircraft hour	This is an average per aircraft computed by dividing the tonne-kilometres available by the related aircraft hours of flight.
Capacity offered per flight	This is an average per aircraft computed by dividing the tonne-kilometres available by the related number of aircraft departures.
Cargo (or mail) tonne-kilometres performed	A metric tonne of cargo carried one kilometre. Cargo tonne-kilometres equal the sum of the products obtained by multiplying the number of tonnes of cargo, diplomatic bags carried on each flight stage by the stage distance. Mail tonne-kilometres are computed in the same way.

Cargo (or mail) tonnes carried	The number of tonnes of cargo carried is obtained by counting each tonne of cargo or mail on a particular flight (with one flight number) once only and not repeatedly on each individual stage of that flight. The only exception to this is for cargo flown on both the international and domestic stages of the same flight, which is considered in computation both as a domestic and an international shipment or despatch. The same principle is used in calculating mail tonnes carried.
Distance flown per passenger	The average distance flown per passenger is computed by dividing the passenger-kilometres by the related number of passengers carried.
Distance flown per tonne of cargo	The average distance flown per tonne of cargo is computed by dividing the cargo tonne-kilometres performed by the related number of tonnes of cargo carried.
Flights (commercial air transport)	The operation of aircraft on a stage or number of stages with an unchanging flight number is counted as one flight. (Technical stops are not counted.) An air transport operation having both international and domestic stages would be counted as an international flight and also a domestic flight.
Passenger-kilometres performed	A passenger-kilometre is performed when a passenger is carried one kilometre. Calculation of passenger-kilometres equals the sum of the products obtained by multiplying the number of revenue passengers carried on each flight stage by the stage distance. The resultant figure is equal to the number of kilometres travelled by all passengers.
Passenger load factor	Passenger-kilometres performed divided by seat-kilometres available and expressed as a percentage.
Passenger revenue per traffic-unit	This is a type of financial measurement which relates the passenger traffic applicable to the passenger revenues. It is computed by dividing passenger revenues by the passenger-kilometres performed.
Passengers carried	The number of passengers carried is obtained by counting each passenger on a particular flight (with one flight number) once only and not repeatedly on each individual stage of that flight, with a single exception that a passenger flying on both the international and domestic stages of the same flight is counted as both a domestic and an international passenger.
Passengers carried per aircraft	The average number of passengers per aircraft is computed by dividing passenger-kilometres by the related aircraft kilometres flown.
Payload capacity	Total of aircraft capacity available for the carriage of revenue load (passengers, baggage, cargo and mail) measured in metric tonnes.
Payload capacity per aircraft	This is an average per aircraft computed by dividing the tonne-kilometres available by the related aircraft kilometres flown.
Payload carried	The revenue load of passengers, baggage, cargo and mail carried in the aircraft as measured in metric tonnes.
Seat-kilometres available	A seat-kilometre is available when a seat is flown one kilometre. Seat-kilometres available are equal to the sum of the products obtained by multiplying the number of passenger seats available for sale on each flight stage by the stage distance. Seats not actually available for the carriage of passengers because of the weight of fuel or other load are excluded in the calculations.

- Seats available per aircraft** This is an average per aircraft computed by dividing the seat-kilometres available by the related aircraft kilometres flown.
- Speed flown per aircraft** This is an average per aircraft measure computed by dividing the aircraft kilometres flown by the related aircraft hours of flight.
- Stage distance flown per aircraft** The average stage distance flown per aircraft is computed by dividing the aircraft kilometres flown by the related number of aircraft departures.
- Tonne-kilometres available** A metric tonne of available payload space flown one kilometre. Tonne-kilometres available equals the sum of the products obtained by multiplying the number of tonnes available for the carriage of revenue load (passengers, cargo and mail) on each flight stage by the stage distance.
- Tonne-kilometres performed** A metric tonne of revenue load carried one kilometre. Tonne-kilometres performed equals the sum of the products obtained by multiplying the number of tonnes of revenue load carried on each flight stage by the stage distance.
- Tonnes available** The capacity of the aircraft for the carriage of payload measured in tonnes.
- Weight load factor** Tonne-kilometres performed divided by tonne-kilometres available and expressed as a percentage.
