Foreword

1 CONTENT

- 1.1 *CAA Monthly Statistics* is prepared by the Civil Aviation Authority with the co-operation of the United Kingdom airport and airline operators; some of this information is required by the Civil Aviation Act, 1971. Statistics for the Channel Islands airports are provided by the Commandant for Jersey Airport and the Office of the Lieutenant Governor for Guernsey and Alderney Airports. The assistance from all these authorities is gratefully acknowledged.
- 1.2 Some of the figures included in *CAA Monthly Statistics* are provisional only and may be revised in later issues. Figures contained in monthly and quarterly tables have not been seasonally adjusted, but figures are given, in the tables covering past years, for the most recent six months and the corresponding six months one year earlier.

2 CONVENTIONS

- 2.1 **Symbols and Abbreviations** The following are used throughout:

+	= UK Customs airport
..	= not available
—	= nil or less than half the final digit shown
n.e.i.	= not elsewhere included
a.t-km	= available tonne-kilometres
A.T. Movements	= Air Transport Movements

- 2.2 **Rounding of Figures** In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

- 2.3 **Units of Measurement** Metric measurements are used throughout *CAA Monthly Statistics*.

Tonne = 1000 kilogrammes
Tonne-kilometres = The product obtained by multiplying the number of tonnes carried by the distance flown measured in kilometres

Conversion factors (foot/pound system to metric system)

1 short ton (2000 lbs)	=	0.9072 tonnes
1 ton (2240 lbs)	=	1.0160 tonnes
1 statute mile (5280 feet)	=	1.6093 kilometres
1 short ton-mile	=	1.4600 tonne-kilometres

The explanations of other terms used throughout the Tables are contained in the section on Definitions immediately following the Tables.

3 ENQUIRIES

- 3.1 **Statistics** Enquiries concerning the information in *CAA Monthly Statistics* should be addressed to:

Civil Aviation Authority
Room T420
Space House
43/59 Kingsway
London WC2B 6TE
Tel. 01 379 7311 Ext. 2584

- 3.2 **Distribution** Enquiries concerning orders and subscriptions should be addressed to:

Civil Aviation Authority
Printing and Publication Services
Greville House
37 Gratton Road
Cheltenham
Glos GL50 2BN

- 4 **CIVIL AVIATION STATISTICS FOR EARLIER YEARS** Statistics for the period from January 1968 to December 1972 were published in the Civil Aviation Series of the Department of Trade & Industry's *Business Monitors*.

The series comprise:

CA. 1	<i>Airport activity</i>	(Monthly)
CA. 2	<i>Air passengers</i>	"
CA. 3	<i>Air freight & mail</i>	"
CA. 4	<i>Airline operations</i>	"
CA. 5	<i>Airline operations</i>	(Quarterly)
CA. 6	<i>Domestic passenger traffic</i>	"
CA. 7	<i>Air passengers – international and cabotage</i>	"
CA. 8	<i>Airline financial statistics</i>	(Annually – 1968 to 1971 only)

Annual versions of CA. 1 to C.A. 7 were also published.

Civil Aviation Statistics—January 1976

Activity at UK Airports

During the first month of 1976 air transport movements increased to a level of almost 51,000, marginally less than in January 1975 but a growth on the previous two years.

The level of activity in the London area during January 1976 increased marginally against 1975, whilst that over the remainder of the UK fell by 1·3 per cent. When comparing the November 1975-January 1976 period with the corresponding three months one year previously, an overall 1·3 per cent decline was recorded, comprising a 3·1 per cent decline in the London area against a marginal growth elsewhere. Heathrow alone among London area airports reported a decline (1509 fewer movements per month, 7·4 per cent decline). Gatwick reported 472 additional movements (10·4 per cent growth), Luton 189 additional movements (21·1 per cent growth), Stansted 9 additional movements (4·5 per cent growth) and Southend 5 additional movements (marginal growth). Aberdeen continued to report both the greatest increase in movements and the largest percentage growth during this period (1276 additional movements; 71·8 per cent growth) followed outside the London area by Edinburgh (187 additional movements per month: 16·2 per cent growth) and Norwich (88 additional movements: 20·1 per cent growth). Belfast reported the heaviest fall of 374 movements (19·3 per cent decline) whilst the heaviest percentage decline was 59·4 per cent at Cheltenham. The decline of 1·3 per cent in total movements during the November 1975-January 1976 period compared with the previous year comprised a decline of 5·0 per cent in scheduled service movements and a 16·2 per cent increase in charter movements. The UK operators marginally increased both their share of total movements to 75·8 per cent and their share of charter movements to 90·5 per cent but their share of scheduled movements fell marginally to 72·0 per cent.

Terminal passengers using UK airports increased to over 2·7 million during January 1976 (7·9 per cent growth on 1975); London area passengers grew by 9·3 per cent and those over the remainder of the UK by 4·4 per cent. Over the three months November 1975 to January 1976 a 5·6 per cent overall growth was reported; 6·1 per cent in the London area and 4·5 per cent elsewhere. Heathrow reported a monthly average of 68 112 additional passengers (4·7 per cent growth), Gatwick 33 927 additional passengers (13·4 per cent growth) and Luton 13 055 additional passengers (11·4 per cent growth). Southend handled 1075 fewer passengers per month (9·5 per cent decline) and Stansted 1059 fewer passengers (8·4 per cent decline). Over the rest of the UK Aberdeen reported both the greatest increase in passengers and the largest growth rate (13 206 per month; 33·6 per cent growth), followed by Manchester (13 055 passengers; 9·3 per cent growth) and Edinburgh (8273 passengers; 17·3 per cent growth). Gloucester/Cheltenham recorded the heaviest rate of decline during this period (68·1 per cent) and Belfast the heaviest actual decline (6074 fewer passengers per month). The overall 5·6 per cent growth in passengers in the period November

1975 to January 1976 compared with a year earlier comprised a 4·0 per cent growth in those travelling on scheduled services and 13·4 per cent in those travelling by charter services. The UK operators' share of total and scheduled service passengers fell marginally to 69·2 and 56·0 per cent respectively, whilst their share of charter service passengers increased marginally to 87·1 per cent.

During the three month period ending January 1976, a monthly average of 2·7 million passengers used UK airports, of which 1·9 million (6·7 per cent growth) travelled by international services and 0·8 million (3·2 per cent growth) by domestic services. Total international scheduled passengers increased by 4·7 per cent and again the most heavily used services were those to France, USA, and the Netherlands (12·1 per cent of the total, 3·5 per cent growth; 11·8 per cent of the total, 5·4 per cent growth and 8·2 per cent of the total, 5·6 per cent growth respectively). Charter service passengers showed a 12·4 per cent growth over this period when Spain, Italy and the German Republic were the most popular origins/destinations (37·5 per cent of the total, 4·4 per cent growth; 8·7 per cent of the total, 14·6 per cent growth and 8·6 per cent of the total, 2·6 per cent growth respectively). Domestic route passengers grew by an overall 2·6 per cent against the corresponding period the previous year. Services connecting Edinburgh reported the highest growth of 30·8 per cent followed by London routes with 7·1 per cent. Channel Island services carried marginally more passengers, whilst those to Belfast, Glasgow and the Isle of Man decline by 6·7 per cent, 6·3 per cent and 13·3 per cent respectively).

During the month of January almost 49 000 tonnes of cargo moved through UK airports, 6·9 per cent less than in January 1975 and the lowest figure for that month since 1972. London area tonnage fell by 5·3 per cent and that over the remainder of the UK by 13·2 per cent. When comparing the tonnage recorded in the two three month periods ending January 1976 and 1975 an aggregate decline of 10·9 per cent was recorded. London area airports handled an overall 7·6 per cent less tonnage, and of this group only Gatwick and Stansted achieved growth against the previous year (1734 additional tonnes per month; 34·8 per cent growth and 395 tonnes; 27·4 per cent growth respectively). Heathrow handled 5076 fewer tonnes (13·9 per cent decline), Southend 409 fewer tonnes (28·1 per cent decline) and Luton 60 fewer tonnes (27·7 per cent decline). Outside the London area Aberdeen continued to report the largest increase in actual tonnage (116 additional tonnes per month; 47·4 per cent growth) followed by Southampton (51 additional tonnes; 86·8 per cent growth). A steady increase in activity during recent months at Norwich resulted in this airport recording the third highest increase in tonnage and the largest rate of growth (50 additional tonnes; over two fold growth). Manston reported the largest rate of decline (-83·7 per cent) and Belfast the heaviest fall in actual tonnage (1069 fewer tonnes per month). Whilst charter flight cargo grew by 17·2 per cent in the three month period compared with a year earlier that carried on scheduled services fell by 16·1

per cent. The UK operators' share of total tonnage fell 5.5 percentage points to 49.0 per cent, their share of scheduled service tonnage 8.4 percentage points to 41.2 per cent and their share of charter service tonnage 1.9 percentage points to 78.8 per cent.

Output of UK Airlines

The output of UK airlines for all services in January 1976 was 647 million available tonne-kilometres, an increase of 6.9 per cent on January 1975.

The scheduled service output of 455 million available tonne-kilometres was 7.7 per cent higher than a year earlier. The overall load factor of 54.7 per cent compared with 53.6 per cent the previous year. Seat kilometres used were 60.0 per cent of those available compared with 57.3 per cent in January 1975. Seat

factors on domestic and international scheduled services were 56.5 and 60.3 per cent respectively compared with 55.1 and 57.5 per cent a year earlier.

The non-scheduled output of 193 million available tonne-kilometres was 5.0 per cent higher than in January 1975. Advance Booking Charters and Inclusive Tour Charters accounted for 12.7 and 53.1 million available tonne-kilometres respectively compared with 10.3 and 41.5 million a year earlier.

NOTE: Statistics of airport activity, passengers and cargo are derived from data supplied by airports. Airline statistics are based on data supplied by the airlines. Data from these two sources are not strictly comparable. There are small differences in timing and more significant differences arise because airlines are not asked to report non-revenue passengers and cargo.

Size Structure of UK Airports and Airlines Year ended 31 December 1975

London includes Heathrow, Gatwick and Stansted.

S.E. England includes Ashford, London, Luton, Lydd, Manston and Southend.

N. England comprises the airports in England north of a line from the Mersey to the Humber (Manchester, Liverpool, Blackpool, Newcastle, Leeds/Bradford and Tees-side).

Glasgow includes Prestwick and Abbotscinch.

- (a) N. France comprises the airports north of the line of 49° latitude.
- (b) Soviet Union and Eastern Europe includes the United Soviet Socialist Republics, Bulgaria, Czechoslovakia, Hungary, Poland, Roumania and the Eastern Zone of Germany but excluding Berlin.
- (c) North Africa includes Algeria, Libya, Morocco and Tunisia.
- (d) Commonwealth countries only.
- (e) Commonwealth countries including Rhodesia.
- (f) Middle East includes Iraq, Iran, Israel, Jordan, Lebanon, Persian Gulf States, Saudi Arabia, Sudan and the United Arab Republic.
- (g) Total is in respect of charter passengers only. Passengers on scheduled flights included in London — Other Italy.
- (h) Total in respect of charter passengers only. Passengers on scheduled flights included in other routes to Italy.

The figures show the uplift and discharge of passengers at United Kingdom airports on services operated there according to their immediate destination or last point of embarkation overseas on those services. These may not, in all cases, be the origin or destination of passenger journeys: they may be places at which a journey was broken or a connection made with another air service. The figures in this table include all passengers carried on scheduled and charter services excluding those carried on aircraft chartered by Government Departments.

Domestic Passengers by Main Routes

Table 19

Penzance	Other Routes	18.4	-27
	TOTAL	428.8	3

(a) Heathrow, Gatwick and Stansted

Traffic counted in either direction.

The figures show the uplift and discharge of passengers according to the destination and origin of the route. Because of the method of collection of this information there are discrepancies between the reports received from airports on a route, particularly in the case of multi-sector flights. In most cases, however, the discrepancies are small, but in a few cases the figures include an estimated component.

(a) Undergoing revision.

Appendix A Definitions—Traffic Statistics

MOVEMENTS AT AIRPORTS

An air transport movement	is a landing or a take-off of an aircraft engaged on commercial air transport. The types of movement covered are all scheduled service movements, whether loaded or empty, and charter movements transporting passengers or cargo from one point to another. All other types of commercial flying are excluded (e.g. flights returning to the airport of take-off without landing elsewhere, empty charter positioning flights paid for by the charterer, ferrying of empty aircraft, etc.).
Empty charter positioning flights	are flights by chartered aircraft moving into position for transport flights or returning to base after such flights.
Other commercial flights	are miscellaneous non-transport charter flights (e.g. commercial delivery or ferry of empty aircraft and local flights for the Press, survey companies or farmers).
Test and training flights	are flights for the purpose of testing aircraft or airports, or for training flying crew or ground personnel. Also included in this category are demonstration flights by makers or sellers of aircraft and aviation equipment. Aero-club instructional flights are excluded from this category and shown under 'Aero-club'.
Other non-commercial flights	by air transport operators are flights by air transport operators for the sole purpose of moving their own aircraft, personnel or stores from one place to another, and air transport flights forced to return to base by bad weather, engine failure or other causes.
Private flights	are flights for purely private purposes by private owners or other private aircraft operators, excluding aero-club flights.
Aero-club flights	are flights operated by aero-club members for instruction or pleasure.
Official flights	are flights for official purposes by British or foreign civil Government Departments excluding air transport movements.
Military flights	are flights by British or foreign military personnel exclusively for military purposes.

AIR PASSENGERS

Passengers	includes all revenue and non-revenue passengers on air transport flights. Air crew being carried on such flights other than as members of the aircraft's complement are classified as non-revenue passengers.
Revenue passengers	are those who pay 25 per cent or more of the normal applicable fare.
A terminal passenger	is a passenger joining or leaving the aircraft flight at the reporting airport. A passenger travelling between two reporting airports is counted twice, once at each airport.
A transit passenger	is a passenger who arrives at and departs from a reporting airport on the same aircraft which is transiting the airport. Each transit passenger is counted once only and not once on arrival and once on departure.

TYPES OF SERVICES

International services	are services flown between the United Kingdom (including Great Britain, Isle of Man, Channel Islands and Northern Ireland) and places outside.
Domestic services	are services flown entirely within Great Britain, Isle of Man, Channel Islands and Northern Ireland.
Cabotage	is traffic varried between territories of the United Kingdom other than domestic services.
Scheduled services	are those performed according to a published timetable, including those supplementary thereto, and open to use by members of the public.

Non-scheduled or charter services	include all air transport flights other than scheduled services.
Separate fare charters	are those where the charterer re-sells part of the capacity of the aircraft to the public at large; an organisation, etc.
Inclusive tour	consists of a round trip or circle trip performed in whole or in part by air, organised by a tour operator and offered to the public at a comprehensive price including besides air transport, accommodation for the duration of the trip, surface transport and, where appropriate, other amenities.
Advance booking charters	Charter flights operated under Class 2 licences between the UK and territories overseas in respect of which an operator has sold blocks of seats to one or more licensed travel organisers for resale to passengers. Advance details of sales to travel organisers and sales of seats to passengers have to be notified to the Civil Aviation Authority.
Sole-use charters	are those where the charterer has exclusive use of the whole capacity of the aircraft and does not dispose of any of it to third persons for reward.
Licence	means an air transport licence granted under Section 22 of the Civil Aviation Act 1971.

CLASSES OF LICENCE

Class 1	authorises scheduled service flights;
Class 2	authorises advance booking charter flights;
Class 3	authorises inclusive tour charter flights;
Class 4	authorises other charter flights for the carriage of passengers;
Class 5	authorises substitute charter flights;
Class 6	authorises charter flights for the carriage of cargo and attendants;
Class 7	authorises sole-use charter flights.

NB These definitions are not intended as a comprehensive statement of each type of licence. They define the general purpose of the types of flights authorised by each class of licence. The specification for each class of licence is published in the Civil Aviation Authority Official Record Series 1.

Exempt operations	are operations for which a licence is not required. The Civil Aviation Authority in pursuance of its powers under paragraph (a) of Section 21 (2) of the Civil Aviation Act 1971 has by an instrument dated 29 March 1972 and later instruments specified a number of types of flights for which a licence is not required. The specifications of such flights are published in the Authority's Official Record Series 1 but typical examples are ambulance flights, aircrew training and test flights, Government charters, helicopters carrying externally suspended loads, etc.
--------------------------	--

Cargo	means the weight of any property carried on an aircraft including the weight of vehicles carried, mail and diplomatic bags, but excluding passengers' baggage. When related to the activity of an airline or airlines, cargo uplifted means the number of tonnes of revenue cargo that is obtained by counting each tonne of cargo on a particular flight (with one flight number) once only and not repeatedly on each individual stage of that flight. The only exception to this is for cargo flown on both the international and domestic stages of the same flight which is considered in competition both as a domestic and an international shipment or despatch.
--------------	--

When related to the activity of an airport it is usual to measure cargo as uplifted and set down. Cargo in transit through the airport on the same aircraft is excluded as is mail, company stores, excess baggage, and diplomatic bags picked up and set down.

Appendix B Measures and their Computation

The Civil Aviation Authority follows closely the statistical practices of the International Civil Aviation Organisation.

Aircraft accident	An occurrence associated with the operation of an aircraft which takes place between the time any person boards the aircraft with the intention of flight until such time as all such persons have disembarked, in which (a) any person suffers death or serious injury as a result of being in or upon the aircraft or by direct contact with the aircraft or anything attached thereto, or (b) the aircraft incurs damage or structural failure which adversely affects the structure strength, performance or flight characteristics of the aircraft and which would normally require major repair or replacement of the affected component.
Aircraft days available	The sum of the number of days each aircraft is available for use during the year. This figure includes days required for maintenance and overhaul but it does not include days between the date of purchase and the date actually placed in service, days out of service due to major accidents or conversion, days when an aircraft is in possession of others or is not available because of government action such as grounding by government regulatory agencies.
Aircraft departures	The number of take-offs of aircraft. For statistical uses, departures are equal to the number of landings made or flight-stages flown.
Aircraft hours	An aircraft hour is said to be performed when an aircraft operates one hour; aircraft hours are measured on the basis of block-to-block time.
Aircraft hours flown per day	This is an average per aircraft measure computed by dividing the actual hours of use by the number on days on which the aircraft are available.
Aircraft kilometres performed	Aircraft kilometres equal the sum of the products obtained by multiplying the number of flights performed by the stage distance.
Aircraft movements	An aircraft take-off or landing at an airport. For airport traffic purposes one arrival and one departure are counted as two movements.
All cargo services	Services relating to scheduled or non-scheduled flights performed by aircraft carrying loads other than passengers, i.e. freight, baggage, mail.
Baggage	Personal property of passengers and crew carried on an aircraft by agreement with the operator.
Block-to-block/ chock-to-chock time	The total number of hours (and minutes) measured from the time the aircraft moves from the loading point until it stops at the unloading point.
Capacity offered per aircraft hour	This is an average per aircraft computed by dividing the tonne-kilometres available by the related aircraft hours of flight.
Capacity offered per flight	This is an average per aircraft computed by dividing the tonne-kilometres available by the related number of aircraft departures.
Cargo (or mail) tonne-kilometres performed	A metric tonne of cargo carried one kilometre. Cargo tonne-kilometres equal the sum of the products obtained by multiplying the number of tonnes of cargo, diplomatic bags carried on each flight stage by the stage distance. Mail tonne-kilometres are computed in the same way.

Cargo (or mail) tonnes carried	The number of tonnes of cargo carried is obtained by counting each tonne of cargo or mail on a particular flight (with one flight number) once only and not repeatedly on each individual stage of that flight. The only exception to this is for cargo flown on both the international and domestic stages of the same flight, which is considered in computation both as a domestic and an international shipment or despatch. The same principle is used in calculating mail tonnes carried.
Distance flown per passenger	The average distance flown per passenger is computed by dividing the passenger-kilometres by the related number of passengers carried.
Distance flown per tonne of cargo	The average distance flown per tonne of cargo is computed by dividing the cargo tonne-kilometres performed by the related number of tonnes of cargo carried.
Flights (commercial air transport)	The operation of aircraft on a stage or number of stages with an unchanging flight number is counted as one flight. (Technical stops are not counted.) An air transport operation having both international and domestic stages would be counted as an international flight and also a domestic flight.
Passenger-kilometres performed	A passenger-kilometre is performed when a passenger is carried one kilometre. Calculation of passenger-kilometres equals the sum of the products obtained by multiplying the number of revenue passengers carried on each flight stage by the stage distance. The resultant figure is equal to the number of kilometres travelled by all passengers.
Passenger load factor	Passenger-kilometres performed divided by seat-kilometres available and expressed as a percentage.
Passenger revenue per traffic-unit	This is a type of financial measurement which relates the passenger traffic applicable to the passenger revenues. It is computed by dividing passenger revenues by the passenger-kilometres performed.
Passengers carried	The number of passengers carried is obtained by counting each passenger on a particular flight (with one flight number) once only and not repeatedly on each individual stage of that flight, with a single exception that a passenger flying on both the international and domestic stages of the same flight is counted as both a domestic and an international passenger.
Passengers carried per aircraft	The average number of passengers per aircraft is computed by dividing passenger-kilometres by the related aircraft kilometres flown.
Payload capacity	Total of aircraft capacity available for the carriage of revenue load (passengers, baggage, cargo and mail) measured in metric tonnes.
Payload capacity per aircraft	This is an average per aircraft computed by dividing the tonne-kilometres available by the related aircraft kilometres flown.
Payload carried	The revenue load of passengers, baggage, cargo and mail carried in the aircraft as measured in metric tonnes.
Seat-kilometres available	A seat-kilometre is available when a seat is flown one kilometre. Seat-kilometres available are equal to the sum of the products obtained by multiplying the number of passenger seats available for sale on each flight stage by the stage distance. Seats not actually available for the carriage of passengers because of the weight of fuel or other load are excluded in the calculations.

Seats available per aircraft This is an average per aircraft computed by dividing the seat-kilometres available by the related aircraft kilometres flown.

Speed flown per aircraft This is an average per aircraft measure computed by dividing the aircraft kilometres flown by the related aircraft hours of flight.

Stage distance flown per aircraft The average stage distance flown per aircraft is computed by dividing the aircraft kilometres flown by the related number of aircraft departures.

Tonne-kilometres available A metric tonne of available payload space flown one kilometre. Tonne-kilometres available equals the sum of the products obtained by multiplying the number of tonnes available for the carriage of revenue load (passengers, cargo and mail) on each flight stage by the stage distance.

Tonne-kilometres performed A metric tonne of revenue load carried one kilometre. Tonne-kilometres performed equals the sum of the products obtained by multiplying the number of tonnes of revenue load carried on each flight stage by the stage distance.

Tonnes available The capacity of the aircraft for the carriage of payload measured in tonnes.

Weight load factor Tonne-kilometres performed divided by tonne-kilometres available and expressed as a percentage.
