Foreword

1 CONTENT

- 1.1 *CAA Monthly Statistics* is prepared by the Civil Aviation Authority with the co-operation of the United Kingdom airport and airline operators; some of this information is required by the Civil Aviation Act, 1971. Statistics for the Channel Islands airports are provided by the Commandant for Jersey Airport and the Office of the Lieutenant Governor for Guernsey and Alderney Airports. The assistance from all these authorities is gratefully acknowledged.
- 1.2 Some of the figures included in *CAA Monthly Statistics* are provisional only and may be revised in later issues. Figures contained in monthly and quarterly tables have not been seasonally adjusted, but figures are given, in the tables covering past years, for the most recent six months and the corresponding six months one year earlier.
- 1.3 Tables 13, 16–19 and 21 have been revised with effect from January 1977. Figures given in all the Tables are now for the current month only, instead of a monthly average of the latest three months. Tables 13 and 21 have been expanded so as to enable freight carried on all-freight flights to be separated from that carried on passenger flights, and to show a breakdown between International and Domestic and Scheduled and Non-Scheduled Traffic.
- 1.4 Tables 3–7 have been revised with effect from July 1977 and Tables 8–9 with effect from January 1978. Figures given in the Tables are now actuals for each quarter or year instead of a monthly average of three months or twelve months.
- 1.5 Table 19 was withdrawn after December 1977 because of misreporting at certain airports which led to anomalies in the published figures. From October 1978 the table is produced in a simplified form.

2 CONVENTIONS

- 2.1 **Symbols and Abbreviations** The following are used throughout:

+ = UK Customs airport
.. = not available
— = nil or less than half the final digit shown
n.e.i. = not elsewhere included
a.t.-km = available tonne-kilometres

A.T. Movements = Air Transport Movements

- 2.2 **Rounding of Figures** In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

- 2.3 **Units of Measurement** Metric measurements are used throughout *CAA Monthly Statistics*.

Tonne = 1000 kilograms
Tonne-kilometres = The product obtained by multiplying the number of tonnes carried by the distance flown measured in kilometres

Conversion factors (foot/pound system to metric system)

1 short ton (2000 lbs) = 0.9072 tonnes
1 ton (2240 lbs) = 1.0160 tonnes
1 statute mile (5280 feet) = 1.6093 kilometres
1 short ton-mile = 1.4600 tonne-kilometres

The explanations of other terms used throughout the Tables are contained in the section on Definitions immediately following the Tables.

3 ENQUIRIES

- 3.1 **Statistics** Enquiries concerning the information in *CAA Monthly Statistics* should be addressed to:

Civil Aviation Authority
Room T415
CAA House
45/59 Kingsway
London WC2B 6TE
Tel. 01 379 7311 Ext. 2504

- 3.2 **Distribution** Enquiries concerning orders and subscriptions should be addressed to:

Civil Aviation Authority
Printing and Publication Services
Greville House
37 Gratton Road
Cheltenham
Glos GL50 2BN

- 4 **CIVIL AVIATION STATISTICS FOR EARLIER YEARS** Statistics for the period from January 1968 to December 1972 were published in the Civil Aviation Series of the Department of Trade & Industry's *Business Monitors*.

The series comprise:

CA. 1	<i>Airport activity</i>	(Monthly)
CA. 2	<i>Air passengers</i>	"
CA. 3	<i>Air freight & mail</i>	"
CA. 4	<i>Airline operations</i>	"
CA. 5	<i>Airline operations</i>	(Quarterly)
CA. 6	<i>Domestic passenger traffic</i>	"
CA. 7	<i>Air passengers – international and cabotage</i>	"
CA. 8	<i>Airline financial statistics</i>	(Annually – 1968 to 1971 only)

Annual versions of CA. 1 to CA. 7 were also published.

Civil Aviation Statistics—January 1979

Activity at UK Airports

Air transport movements during the month of January 1979 reached a level of 58 000 (a marginal increase over January 1978); the proportion of all-freight movements was 6.8 per cent of the total. The London area accounted for 29 000 movements (3 per cent growth as compared with the previous year). Gatwick reported 1140 additional movements (18.7 per cent growth), Stansted 191 additional movements (77.0 per cent growth) and Luton 28 additional movements (2.3 per cent growth). Heathrow and Southend reported falls in traffic (477 fewer movements; 2.4 per cent decline and 34 fewer movements; 3.1 per cent decline respectively). Outside the London area an overall decline of 2.2 per cent was reported. Manchester reported the greatest decrease with 439 fewer movements (13.1 per cent decline) followed by Prestwick with 158 fewer movements (23.2 per cent decline) and Belfast 118 fewer movements (7.0 per cent decline). Glasgow and Aberdeen reported increases in the number of actual movements (382 additional movements; 13.9 per cent growth and 329 additional movements; 7.7 per cent growth respectively). Liverpool reported more than a two fold increase in the number of movements (712 additional movements), however, this excessive growth was due to a strike of airport firemen during January 1978. Schedule movements at UK airports rose by 1.3 per cent and charter movements by 17.7 per cent. The UK operators' share of scheduled movements increased marginally to stand at 74.9 per cent of the total and their share of charter movements fell marginally to stand at 90.3 per cent of the total.

The number of terminal passengers reported by UK airports during January 1979 was 3.2 million, which represented a growth of 2.3 per cent as compared with the same month in the previous year. London area airports accounted for 2.3 million terminal passengers (a growth of 3.6 per cent) Gatwick reported 76 822 additional passengers (19.8 per cent growth), Stansted 7404 additional passengers (45.7 per cent growth), Luton 1247 additional passengers (1.1 per cent growth) and Heathrow 120 additional passengers (a marginal growth). Outside the London area 0.8 million passengers used UK airports (a decline of 1.3 per cent as compared with January 1978). Manchester reported the greatest decrease in the number of passengers handled (17 396 fewer passengers; 10.4 per cent decline). Belfast and Leeds/Bradford also reported falls in the number of passengers handled (6223 fewer passengers; 7.9 per cent decline and 3664 fewer passengers; 19.2 per cent decline respectively). Glasgow and Birmingham

reported the greatest increases (12 753 additional passengers; 11.1 per cent growth and 7205 additional passengers; 11.1 per cent growth respectively). Liverpool reported more than a four fold increase in the number of passengers handled, this exceptional increase is due to a strike of airport firemen during January 1978. Passengers travelling on scheduled services rose by 1.9 per cent and those travelling on charter services rose by 12.0 per cent. The UK operators' share of scheduled traffic fell by 2.0 percentage points to stand at 61.6 per cent of the total and their share of charter traffic rose marginally to stand at 87.7 per cent of the total.

2.4 million passengers travelled on international services in January 1979 (4.8 per cent growth as compared with January 1978). Scheduled services carried 3.8 per cent more passengers and charter services 8.3 per cent more. The most heavily used scheduled service was that to the USA, with 16.2 per cent of the total scheduled traffic, followed by France and Germany with 9.8 per cent of the total traffic (3.3 per cent decline and 7.9 per cent of the total (8.4 per cent growth) respectively. Services to Spain carried 28 per cent of all charter passengers (30.4 per cent growth), services to Italy 16.5 per cent of the total (17.4 per cent growth) and those to the Canary Islands 10.6 per cent of the total (45.2 per cent growth). Of the passengers carried on the main domestic routes those on the Glasgow, Isle of Man and Penzance routes increased by 21.5 per cent, 18.2 per cent and 15.8 per cent respectively. Traffic carried on the Belfast, Channel Islands and Edinburgh routes decreased (9.4 per cent fewer passengers, 6.5 per cent and 2.2 per cent respectively). There was a marginal decrease in the number of passengers on the London routes.

During January 1979, air freight handled at UK airports amounted to 69 000 tonnes (a growth of 24.9 per cent over the same month in the previous year) 40 000 tonnes of this travelled on all-freight flights. At the London area airports total tonnage rose by 18.0 per cent, amounting to 53 000 tonnes. Heathrow and Gatwick both reported increases of 13.3 percent (4451 additional tonnes and 1122 additional tonnes respectively). Southend reported an increase of just under two fold (1234 additional tonnes). Stansted and Luton also reported increases in tonnage handled (1188 additional tonnes; 51.5 per cent growth and 130 additional tonnes; 25.8 per cent growth respectively). At airports outside the London area tonnage handled rose by 57.4 per cent. East Midlands reported more than a two fold growth (1103 additional tonnes), Tees-side having handled

negligible tonnage in January 1978 reported 1336 additional tonnes. Liverpool reported more than a four fold increase, this exceptional increase being due to a strike of airport firemen during January 1978. Blackpool and Lydd reported the greatest decreases in tonnage handled (29·0 per cent decrease; 85 fewer tonnes and 23·9 per cent decrease; 72 fewer tonnes respectively). Birmingham reported a decrease of 8·6 per cent (34 fewer tonnes) Freight carried on scheduled services rose by 13·2 per cent whilst that carried on charter services rose by 68·2 per cent. The UK operators' share of scheduled tonnage fell by 7·3 percentage points to stand at 37·2 per cent of the total and their share of charter tonnage fell by 10·0 percentage points to stand at 77·8 per cent of the total.

Output of UK Airlines

The output of UK airlines for all services in January 1979 was 851 million available tonne-kilometres, an increase of 5·7 per cent on January 1978.

The scheduled service output of 601 million available tonne-kilometres was 10·3 per cent higher than a year earlier. The overall load factor was 57·0 per cent, compared with 57·5 the previous year. Seat kilometres used were 61·4 per cent of those available. Seat factors on domestic and international scheduled services were 55·9 and 61·8 per cent respectively compared with 54·5 and 59·9 per cent a year earlier. The non-scheduled output of 250 million available tonne-kilometres was 3·6 per cent lower than in January 1978. Advance Booking Charters and Inclusive Tour Charters accounted for 7·4 and 77·8 million available tonne-kilometres respectively compared with 27·0 and 58·4 million a year earlier.

NOTE: Statistics of airport activity, passengers and cargo are derived from data supplied by airports. Airline statistics are based on data supplied by the airlines. Data from these two sources are not strictly comparable. There are small differences in timing and more significantly differences arise because airlines are not asked to report non-revenue passengers and cargo.

Size Structure of UK Airports and Airlines Year ended December 1978

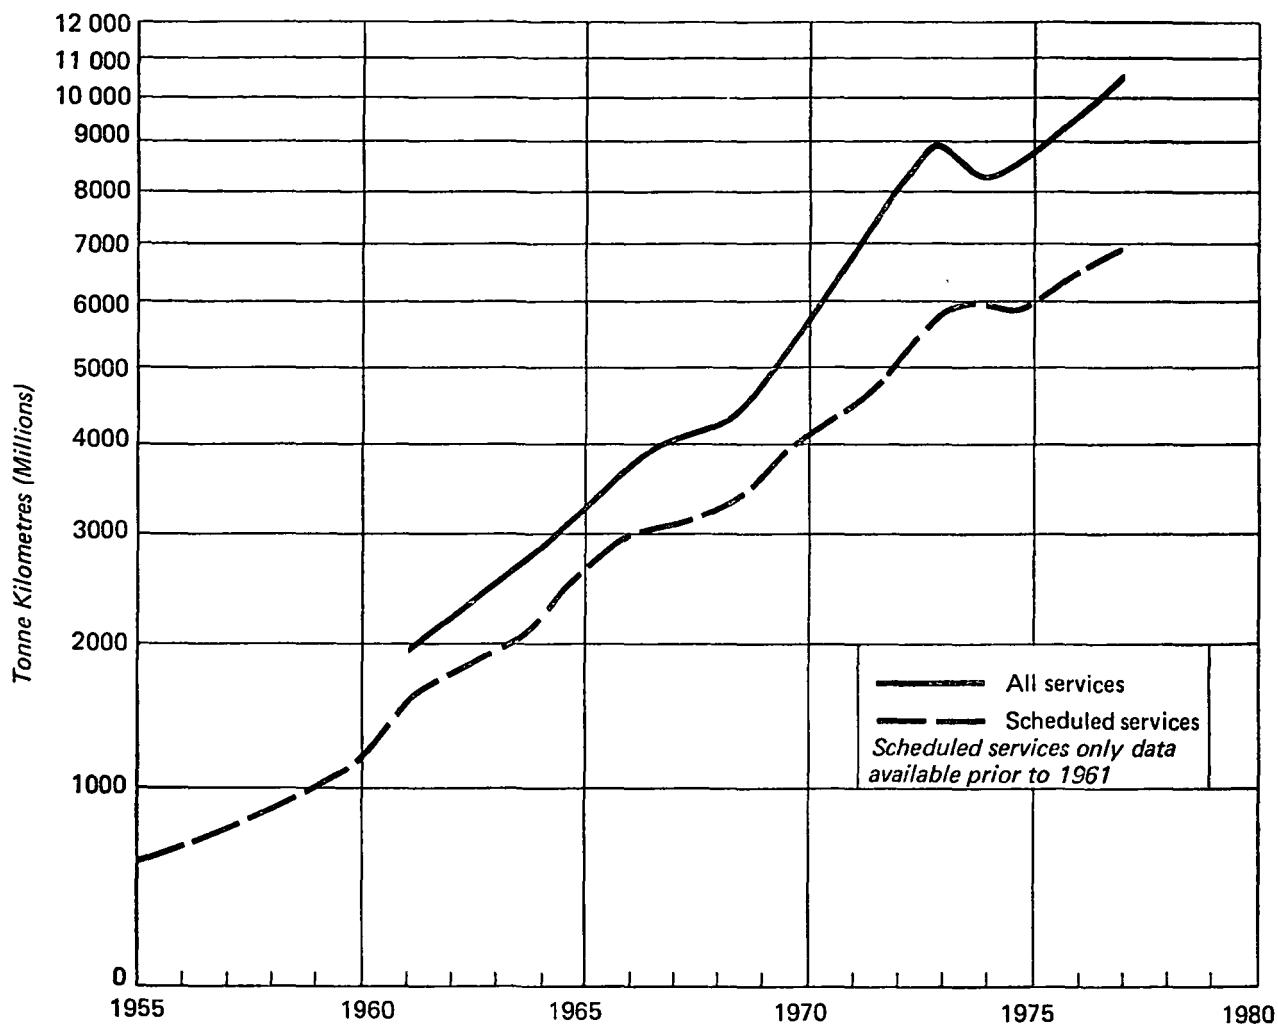

Table 1

Airports	Terminal passengers (000)	Percentage of passengers at all UK airports	Percentage of airports this size and smaller	Percentage of passengers at all UK airports this size and smaller

The above figures are derived from airport statistics.

(a) Excluding passengers to and from the Irish Republic, and oil rigs.

The following countries are included in the groups below:—

(b) Turkey, Israel, Jordan, Syria, Lebanon, Iraq, Kuwait, Saudi Arabia, Republic of South Yemen, Iran, Persian Gulf States, United Arab Emirates.

(c) Tunisia, Algeria, Morocco, Egypt, Libya.

(d) German Dem. Republic, Poland, Czechoslovakia, Hungary, Rumania, Albania, Bulgaria.

(e) Gibraltar, Luxembourg, Austria, Faroes, Finland, Iceland, Cyprus, Malta.

(f) Bermuda, British West Indies, Curacao, Jamaica, Barbados, Trinidad and Tobago, Guadeloupe, Martinique.

(g) Zambia, Malawi, Zaire, Angola, Central African Republic, Chad, Niger.

(h) Kenya, Uganda, Tanzania, Rwanda, Burundi, Sudan, Somali Republic, Ethiopia, Djibouti.

(i) Hong Kong, Singapore, Malaysia, Afghanistan, Nepal, Burma, Thailand, Laos, South Vietnam, North Vietnam, Cambodia, China, Taiwan, Korea, Indonesia.

(k) Rhodesia, South African Republic, Namibia, Botswana, Mozambique.

(l) Guyana, Venezuela, Colombia, Ecuador, Peru, Bolivia, Brazil, Paraguay, Uruguay, Argentina, Chile.

(m) Ghana, Nigeria, Sierra Leone, Gambia, Togoland, Western Sahara, Portuguese Guinea, Liberia, Equatorial Guinea, Mali, Guinea, Cameroon, Congo, Dahomey, Gabon, Ivory Coast, Mauritania, Senegal, Upper Volta.

London includes Heathrow, Gatwick and Stansted.

S.E. England includes Ashford, London, Luton, Lydd, Manston and Southend.

N. England comprises the airports in England north of a line from the Mersey to the Humber (Manchester, Liverpool, Blackpool, Newcastle, Leeds/Bradford and Tees-side).

Glasgow includes Prestwick and Abbotinch.

- (a) N. France comprises the airports north of the line of 49° latitude.
- (b) Soviet Union and Eastern Europe includes the United Soviet Socialist Republics, Bulgaria, Czechoslovakia, Hungary, Poland, Roumania and the Eastern Zone of Germany but excluding Berlin.
- (c) North Africa includes Algeria, Libya, Morocco and Tunisia.
- (d) Commonwealth countries only.
- (e) Commonwealth countries including Rhodesia.
- (f) Middle East includes Iraq, Iran, Israel, Jordan, Lebanon, Persian Gulf States, Saudi Arabia, Sudan and the United Arab Republic.
- (g) Total is in respect of charter passengers only. Passengers on scheduled flights included in London – Other Italy.
- (h) Total is in respect of charter passengers only. Passengers on scheduled flights included in other routes to Italy.

These figures show the uplift and discharge of passengers at United Kingdom airports on services operated there according to their immediate destination or last point of embarkation overseas on those services. These may not, in all cases, be the origin or destination of passenger journeys : they may be places at which a journey was broken or a connection made with another air service. The figures in this table include all passengers carried on scheduled and charter services excluding those carried on aircraft chartered by Government Departments.

Domestic Passengers by Main Routes January 1979

(a) Heathrow, Gatwick and Stansted
 Traffic counted in either direction

The figures show the uplift and discharge of passengers according to the destination and origin of the route. Because of the method of collection of this information there are discrepancies between the reports received from airports on a route, particularly in the case of multi-sector flights. In most cases, however, the discrepancies are small, but in a few cases the figures include an estimated component.

Appendix A Definitions—Traffic Statistics

MOVEMENTS AT AIRPORTS

An air transport movement	is a landing or a take-off of an aircraft engaged on commercial air transport. The types of movement covered are all scheduled service movements, whether loaded or empty, and charter movements transporting passengers or cargo from one point to another. All other types of commercial flying are excluded (e.g. flights returning to the airport of take-off without landing elsewhere, empty charter positioning flights paid for by the charterer, ferrying of empty aircraft, etc.).
Empty charter positioning flights	are flights by chartered aircraft moving into position for transport flights or returning to base after such flights.
Other commercial flights	are miscellaneous non-transport charter flights (e.g. commercial delivery or ferry of empty aircraft and local flights for the Press, survey companies or farmers).
Test and training flights	are flights for the purpose of testing aircraft or airports, or for training flying crew or ground personnel. Also included in this category are demonstration flights by makers or sellers of aircraft and aviation equipment. Aero-club instructional flights are excluded from this category and shown under 'Aero-club'.
Other non-commercial flights	by air transport operators are flights by air transport operators for the sole purpose of moving their own aircraft, personnel or stores from one place to another, and air transport flights forced to return to base by bad weather, engine failure or other causes.
Private flights	are flights for purely private purposes by private owners or other private aircraft operators, excluding aero-club flights.
Aero-club flights	are flights operated by aero-club members for instruction or pleasure.
Official flights	are flights for official purposes by British or foreign civil Government Departments excluding air transport movements.
Military flights	are flights by British or foreign military personnel exclusively for military purposes.

AIR PASSENGERS

Passengers	includes all revenue and non-revenue passengers on air transport flights. Air crew being carried on such flights other than as members of the aircraft's complement are classified as non-revenue passengers.
Revenue passengers	are those who pay 25 per cent or more of the normal applicable fare.
A terminal passenger	is a passenger joining or leaving the aircraft flight at the reporting airport. A passenger travelling between two reporting airports is counted twice, once at each airport.
A transit passenger	is a passenger who arrives at and departs from a reporting airport on the same aircraft which is transiting the airport. Each transit passenger is counted once only and not once on arrival and once on departure.

TYPES OF SERVICES

International services	are services flown between the United Kingdom (including Great Britain, Isle of Man, Channel Islands and Northern Ireland) and places outside.
Domestic services	are services flown entirely within Great Britain, Isle of Man, Channel Islands and Northern Ireland.
Cabotage	is traffic carried between territories of the United Kingdom other than domestic services.
Scheduled services	are those performed according to a published timetable, including those supplementary thereto, and open to use by members of the public.

Non-scheduled or charter services	include all air transport flights other than scheduled services.
Separate fare charters	are those where the charter re-sells part of the capacity of the aircraft to the public at large; an organisation, etc.
Inclusive tour	consists of a round trip or circle trip performed in whole or in part by air, organised by a tour operator and offered to the public at a comprehensive price including besides air transport, accommodation for the duration of the trip, surface transport and, where appropriate, other amenities.
Advance booking charters	Charter flights operated under Class 2 licences between the UK and territories overseas in respect of which an operator has sold blocks of seats to one or more licensed travel organisers for resale to passengers. Advance details of sales of seats to passengers have to be notified to the Civil Aviation Authority in accordance with Schedules 5, 5A, 6 or 7 to Series 1 of the Authority's Official Record.
Sole-use charters	are those where the charterer has exclusive use of the whole capacity of the aircraft and does not dispose of any of it to third persons for reward.
Licence	means an air transport licence granted under Section 22 of the Civil Aviation Act 1971.

CLASSES OF LICENCE

- Class 1** authorises scheduled service flights;
- Class 2** authorises advance booking charter flights;
- Class 3** authorises inclusive tour charter flights;
- Class 4** authorises other charter flights for the carriage of passengers;
- Class 5** authorises substitute charter flights;
- Class 6** authorises charter flights for the carriage of cargo and attendants;
- Class 7** authorises sole-use charter flights (except exempted operations).

NB These definitions are not intended as a comprehensive statement of each type of licence. They define the general purpose of the types of flights authorised by each class of licence. The specification for each class of licence is published in the Civil Aviation Authority Official Record Series 1.

Exempt operations	are operations for which a licence is not required. The Civil Aviation Authority in pursuance of its powers under paragraph (a) of Section 21 (2) of the Civil Aviation Act 1971 has by an instrument dated 29 March 1972 and later instruments specified a number of types of flights for which a licence is not required. The specifications of such flights are published in the Authority's Official Record Series 1 and include all sole-use charter flights other than <ul style="list-style-type: none"> (a) flights to or from a vessel or installation used or intended to be used in connection with oil or gas exploration or production under the sea, not being a vessel or installation still in the course of construction; (b) flights for the carriage of cargo or passengers and cargo to, from or within the United Kingdom, Channel Islands and Isle of Man by aircraft having a maximum total weight authorised of 25 000 kg or more; (c) flights beginning or ending at London (Heathrow) Airport, being flights for the carriage of passengers by aircraft having more than 10 seats available for occupation by passengers. Other examples are ambulance flights, aircrew training and test flights, Government charters, helicopters carrying externally suspended loads, etc.
--------------------------	--

Cargo	means the weight of any property carried on an aircraft including the weight of vehicles carried, mail and diplomatic bags, but excluding passengers' baggage. When related to the activity of an airline or airlines, cargo uplifted means the number of tonnes of revenue cargo that is obtained by counting each tonne of cargo on a particular flight (with one flight number) once only and not repeatedly on each individual stage of that flight. The only exception to this is for cargo flown on both the international and domestic stages of the same flight which is considered in competition both as a domestic and an international shipment or despatch.
--------------	--

When related to the activity of an airport it is usual to measure cargo as uplifted and set down. Cargo in transit through the airport on the same aircraft is excluded as is mail, company stores, excess baggage, and diplomatic bags picked up and set down.

Appendix B Measures and their Computation

The Civil Aviation Authority follows closely the statistical practices of the International Civil Aviation Organisation.

Aircraft accident	An occurrence associated with the operation of an aircraft which takes place between the time any person boards the aircraft with the intention of flight until such time as all such persons have disembarked, in which (a) any person suffers death or serious injury as a result of being in or upon the aircraft or by direct contact with the aircraft or anything attached thereto, or (b) the aircraft incurs damage or structural failure which adversely affects the structure strength, performance or flight characteristics of the aircraft and which would normally require major repair or replacement of the affected component.
Aircraft days available	The sum of the number of days each aircraft is available for use during the year. This figure includes days required for maintenance and overhaul but it does not include days between the date of purchase and the date actually placed in service, days out of service due to major accidents or conversion, days when an aircraft is in possession of others or is not available because of government action such as grounding by government regulatory agencies.
Aircraft departures	The number of take-offs of aircraft. For statistical uses, departures are equal to the number of landings made or flight-stages flown.
Aircraft hours	An aircraft hour is said to be performed when an aircraft operates one hour; aircraft hours are measured on the basis of block-to-block time.
Aircraft hours flown per day	This is an average per aircraft measure computed by dividing the actual hours of use by the number of days on which the aircraft are available.
Aircraft kilometres performed	Aircraft kilometres equal the sum of the products obtained by multiplying the number of flights performed by the stage distance.
Aircraft movements	An aircraft take-off or landing at an airport. For airport traffic purposes one arrival and one departure are counted as two movements.
All cargo services	Services relating to scheduled or non-scheduled flights performed by aircraft carrying loads other than passengers, i.e. freight, baggage, mail.
Baggage	Personal property of passengers and crew carried on an aircraft by agreement with the operator.
Block-to-block/chock-to-chock time	The total number of hours (and minutes) measured from the time the aircraft moves from the loading point until it stops at the unloading point.
Capacity offered per aircraft hour	This is an average per aircraft computed by dividing the tonne-kilometres available by the related aircraft hours of flight.
Capacity offered per flight	This is an average per aircraft computed by dividing the tonne-kilometres available by the related number of aircraft departures.
Cargo (or mail) tonne-kilometres performed	A metric tonne of cargo carried one kilometre. Cargo tonne-kilometres equal the sum of the products obtained by multiplying the number of tonnes of cargo, diplomatic bags carried on each flight stage by the stage distance. Mail tonne-kilometres are computed in the same way.

Cargo (or mail) tonnes carried	The number of tonnes of cargo carried is obtained by counting each tonne of cargo or mail on a particular flight (with one flight number) once only and not repeatedly on each individual stage of that flight. The only exception to this is for cargo flown on both the international and domestic stages of the same flight, which is considered in computation both as a domestic and an international shipment or despatch. The same principle is used in calculating mail tonnes carried.
Distance flown per passenger	The average distance flown per passenger is computed by dividing the passenger-kilometres by the related number of passengers carried.
Distance flown per tonne of cargo	The average distance flown per tonne of cargo is computed by dividing the cargo tonne-kilometres performed by the related number of tonnes of cargo carried.
Flights (commercial air transport)	The operation of aircraft on a stage or number of stages with an unchanging flight number is counted as one flight. (Technical stops are not counted.) An air transport operation having both international and domestic stages would be counted as an international flight and also a domestic flight.
Passenger-kilometres performed	A passenger-kilometre is performed when a passenger is carried one kilometre. Calculation of passenger-kilometres equals the sum of the products obtained by multiplying the number of revenue passengers carried on each flight stage by the stage distance. The resultant figure is equal to the number of kilometres travelled by all passengers.
Passenger load factor	Passenger-kilometres performed divided by seat-kilometres available and expressed as a percentage.
Passenger revenue per traffic-unit	This is a type of financial measurement which relates the passenger traffic applicable to the passenger revenues. It is computed by dividing passenger revenues by the passenger-kilometres performed.
Passengers carried	The number of passengers carried is obtained by counting each passenger on a particular flight (with one flight number) once only and not repeatedly on each individual stage of that flight, with a single exception that a passenger flying on both the international and domestic stages of the same flight is counted as both a domestic and an international passenger.
Passengers carried per aircraft	The average number of passengers per aircraft is computed by dividing passenger-kilometres by the related aircraft kilometres flown.
Payload capacity	Total of aircraft capacity available for the carriage of revenue load (passengers, baggage, cargo and mail) measured in metric tonnes.
Payload capacity per aircraft	This is an average per aircraft computed by dividing the tonne-kilometres available by the related aircraft kilometres flown.
Payload carried	The revenue load of passengers, baggage, cargo and mail carried in the aircraft as measured in metric tonnes.
Seat-kilometres available	A seat-kilometre is available when a seat is flown one kilometre. Seat-kilometres available are equal to the sum of the products obtained by multiplying the number of passenger seats available for sale on each flight stage by the stage distance. Seats not actually available for the carriage of passengers because of the weight of fuel or other load are excluded in the calculations.

Seats available per aircraft	This is an average per aircraft computed by dividing the seat-kilometres available by the related aircraft kilometres flown.
Speed flown per aircraft	This is an average per aircraft measure computed by dividing the aircraft kilometres flown by the related aircraft hours of flight.
Stage distance flown per aircraft	The average stage distance flown per aircraft is computed by dividing the aircraft kilometres flown by the related number of aircraft departures.
Tonne-kilometres available	A metric tonne of available payload space flown one kilometre. Tonne-kilometres available equals the sum of the products obtained by multiplying the number of tonnes available for the carriage of revenue load (passengers, cargo and mail) on each flight stage by the stage distance.
Tonne-kilometres performed	A metric tonne of revenue load carried one kilometre. Tonne-kilometres performed equals the sum of the products obtained by multiplying the number of tonnes of revenue load carried on each flight stage by the stage distance.
Tonnes available	The capacity of the aircraft for the carriage of payload measured in tonnes.
Weight load factor	Tonne-kilometres performed divided by tonne-kilometres available and expressed as a percentage.
