Foreword

1 CONTENT

- 1.1 *CAA Monthly Statistics* is prepared by the Civil Aviation Authority with the co-operation of the United Kingdom airport and airline operators; some of this information is required by the Civil Aviation Act, 1971. Statistics for the Channel Islands airports are provided by the Commandant for Jersey Airport and the Office of the Lieutenant Governor for Guernsey and Alderney Airports. The assistance from all these authorities is gratefully acknowledged.
- 1.2 Some of the figures included in *CAA Monthly Statistics* are provisional only and may be revised in later issues. Figures contained in monthly and quarterly tables have not been seasonally adjusted, but figures are given, in the tables covering past years, for the most recent six months and the corresponding six months one year earlier.
- 1.3 Tables 13, 16–19 and 21 have been revised with effect from January 1977. Figures given in all the Tables are now for the current month only, instead of a monthly average of the latest three months. Tables 13 and 21 have been expanded so as to enable freight carried on all-freight flights to be separated from that carried on passenger flights, and to show a breakdown between International and Domestic and Scheduled and Non-Scheduled Traffic.
- 1.4 Tables 3–7 have been revised with effect from July 1977. Figures given in the Tables are now actuals for each quarter or year instead of a monthly average of three months or twelve months.

2 CONVENTIONS

- 2.1 **Symbols and Abbreviations** The following are used throughout:

| | |
|--------|---|
| + | = UK Customs airport |
| .. | = not available |
| — | = nil or less than half the final digit shown |
| n.e.i. | = not elsewhere included |
| a.t-km | = available tonne-kilometres |

A.T. Movements = Air Transport Movements

- 2.2 **Rounding of Figures** In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

- 2.3 **Units of Measurement** Metric measurements are used throughout *CAA Monthly Statistics*.

Tonne = 1000 kilograms
Tonne-kilometres = The product obtained by multiplying the number of tonnes carried by the distance flown measured in kilometres

Conversion factors (foot/pound system to metric system)

| | |
|----------------------------|---------------------------|
| 1 short ton (2000 lbs) | = 0.9072 tonnes |
| 1 ton (2240 lbs) | = 1.0160 tonnes |
| 1 statute mile (5280 feet) | = 1.6093 kilometres |
| 1 short ton-mile | = 1.4600 tonne-kilometres |

The explanations of other terms used throughout the Tables are contained in the section on Definitions immediately following the Tables.

3 ENQUIRIES

- 3.1 **Statistics** Enquiries concerning the information in *CAA Monthly Statistics* should be addressed to:

Civil Aviation Authority
Room T410
Space House
43/59 Kingsway
London WC2B 6TE
Tel. 01 379 7311 Ext. 2504

- 3.2 **Distribution** Enquiries concerning orders and subscriptions should be addressed to:

Civil Aviation Authority
Printing and Publication Services
Greville House
37 Gratton Road
Cheltenham
Glos GL50 2BN

- 4 **CIVIL AVIATION STATISTICS FOR EARLIER YEARS** Statistics for the period from January 1968 to December 1972 were published in the Civil Aviation Series of the Department of Trade & Industry's *Business Monitors*.

The series comprise:

| | | |
|-------|--|--------------------------------|
| CA. 1 | <i>Airport activity</i> | (Monthly) |
| CA. 2 | <i>Air passengers</i> | " |
| CA. 3 | <i>Air freight & mail</i> | " |

Civil Aviation Statistics—July 1977

Activity at UK Airports

Air transport movements during July 1977 reached a level of 80 000, a growth of 5·9 per cent against July 1976; the proportion of all-freight movements fell marginally to stand at 4·9 per cent of the total. London area movements accounted for 39 000 (4·8 per cent growth as compared with the previous year). All the airports in the area reported increases in traffic. Heathrow reported 1 023 additional movements (4·2 per cent growth), Gatwick 183 additional movements (2·0 per cent growth), Southend 251 additional movements (21·4 per cent growth), Luton 208 additional movements (9·0 per cent growth) and Stansted 111 additional movements (32·2 per cent growth). Outside the London area, a total of 41 000 movements was reported (6·9 per cent growth). Sumburgh and Aberdeen reported the greatest increases in actual movements (861 additional movements; 70·8 per cent growth and 711 additional movements; 17·6 per cent growth respectively), followed by Norwich with 350 additional movements (59·1 per cent growth). Prestwick and Liverpool reported the heaviest falls in movements (263 fewer movements; 20·2 per cent decline and 136 fewer movements; 12·5 per cent decline respectively), followed by Birmingham with 126 fewer movements; 5·3 per cent decline. Scheduled movements in July 1977, as compared with the previous year, grew by 4·9 per cent and charter movements by 8·5 per cent. The UK operators' share of total and scheduled movements increased marginally to stand at 77·1 per cent and 74·7 per cent respectively; their share of charter movements decreased marginally to 83·2 per cent.

The number of terminal passengers reported by UK airports in July 1977 was almost 5·5 million, an increase of 7·9 per cent over the same month in the previous year. London area passengers grew by 9·6 per cent to 3·8 million. All five airports in the area reported growth, Gatwick 14·3 per cent (105 158 additional passengers), Southend 16·7 per cent (4 345 additional passengers), Stansted 16·7 per cent (4 741 additional passengers), Heathrow 7·9 per cent (193 230 additional passengers) and Luton 11·1 per cent (25 125 additional passengers). Outside the London area, 1·7 million terminal passengers used UK airports (4·1 per cent growth as compared with July 1976). Manchester reported the greatest increase in passengers handled with 16 882 additional passengers (5·1 per cent growth), followed by Aberdeen and Sumburgh with 15 337 additional passengers (18·7 per cent growth) and 14 172 additional passengers (64·9 per cent growth) respectively. Birmingham reported the heaviest fall (7 418 fewer passengers; 5·7 per cent decline), followed by Liverpool and Southampton with 4 142 fewer passengers (10·6 per cent

decline) and 3 282 fewer passengers (10·1 per cent decline) respectively. Passengers travelling on scheduled services increased by 7·9 per cent and those on charter services by 7·7 per cent. The UK operators' share of scheduled passengers fell 1·4 percentage points to stand at 62·6 per cent of the total and their share of charter passengers fell 2·4 percentage points to 74·5 per cent.

4·1 million passengers travelled on international services in July 1977 (9·3 per cent growth as compared with July 1976) and 1·3 million on domestic services (3·7 per cent growth). International scheduled services carried 11·0 per cent more passengers and international charter services 6·9 per cent more. The most heavily used scheduled routes were those to USA with 12·6 per cent of the total (3·6 per cent growth), followed by those to France and the Middle East with 11·4 per cent of the total (10·5 per cent growth) and 8·0 per cent of the total (39·8 per cent growth) respectively. Services to Spain carried 33·1 per cent of the total charter passengers (a marginal decline), services to USA carried 12·1 per cent of the total (51·7 per cent) and those to Italy 11·5 per cent of the total (a marginal increase). Of the passengers travelling on the domestic routes, those on the London, Edinburgh and Glasgow services increased (4·7 per cent, 13·5 per cent and 3·4 per cent respectively). Traffic carried on routes to Belfast, Channel Islands and Isle of Man declined, Isle of Man only marginally, Belfast by 8·8 per cent and Channel Islands by 1·7 per cent.

During July 1977, air freight handled at UK airports amounted to 59 000 tonnes (4·2 per cent growth as compared with July 1977). Almost 32 000 tonnes of this travelled on all-freight flights (2·0 per cent growth). In the London area, total tonnage rose by 4·4 per cent. Only Southend reported a fall in traffic (613 fewer tonnes; 56·9 per cent decline). Heathrow handled 1 176 additional tonnes (3·3 per cent growth), Gatwick 771 additional tonnes (12·0 per cent growth), Stansted 563 additional tonnes (27·5 per cent growth) and Luton 159 additional tonnes (35·1 per cent growth). Over the rest of the UK, total tonnage rose by 3·0 per cent. Prestwick and Bournemouth reported the heaviest increases in tonnage handled (398 additional tonnes; 43·3 per cent growth and 218 additional tonnes; 41·8 per cent growth respectively). East Midlands and Liverpool reported the heaviest falls in tonnage handled (151 fewer tonnes; 25·2 per cent decline and 80 fewer tonnes; 8·4 per cent decline respectively). Freight carried on scheduled services rose 3·1 per cent, as compared with the previous year, whilst that carried on charter services rose 8·5 per cent. The UK operators' share of total tonnage rose 1·5 percentage points to

stand at 50·3 per cent; their share of scheduled services tonnage fell 1·0 percentage points to 41·3 per cent, but their share of charter services tonnage rose 10·7 percentage points to 86·3 per cent.

Output of UK Airlines

The output of UK airlines for all services in July 1977 was 983 million available tonne-kilometres, an increase of 8·0 per cent on July 1976.

The scheduled service output of 575 million available tonne-kilometres was 2·1 per cent higher than a year earlier. The overall load factor was 61·0 per cent compared with 59·3 the previous year. Seat kilometres used were 67·3 per cent of those available. Seat factors on domestic and international scheduled services were

66·7 and 67·4 per cent respectively compared with 66·0 and 65·9 per cent a year earlier.

The non-scheduled output of 407 million available tonne-kilometres was 17·6 per cent higher than in July 1976. Advance Booking charters and Inclusive Tour charters accounted for 97·0 and 141·8 million available tonne-kilometres respectively compared with 61·3 and 146·8 million a year earlier.

NOTE: Statistics of airport activity, passengers and cargo are derived from data supplied by airports. Airline statistics are based on data supplied by the airlines. Data from these two sources are not strictly comparable. There are small differences in timing and more significant differences arise because airlines are not asked to report non-revenue passengers and cargo.

Size Structure of UK Airports and Airlines Year ended 30 June 1977

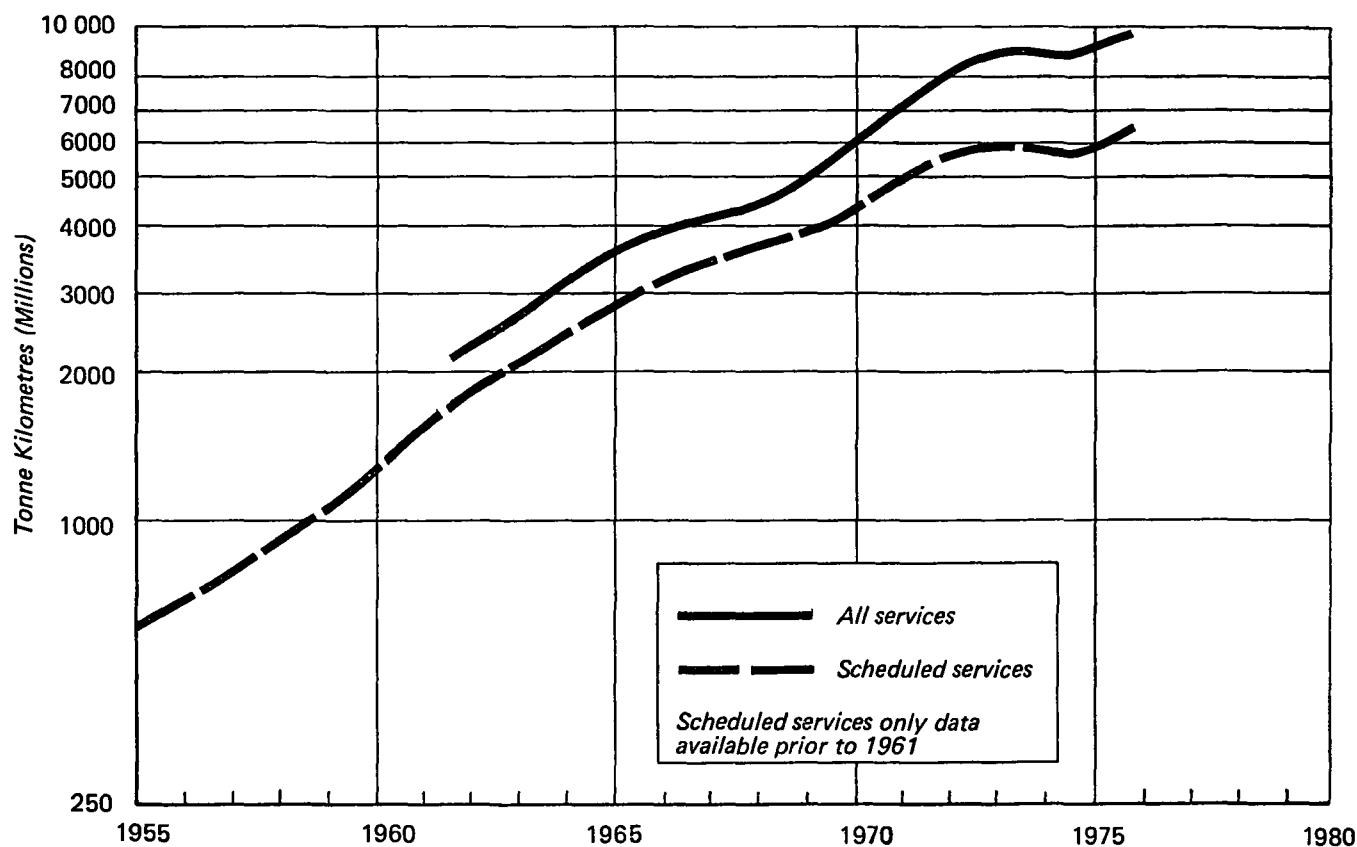

Table 1

| Airports | Terminal passengers (000) | Percentage of passengers at all UK airports | Percentage of airports this size and smaller | Percentage of passengers at all UK airports this size and smaller |

The above figures are derived from airport statistics.

(a) Excluding passengers to and from the Irish Republic.

(b) Passengers to and from North Africa and Middle East countries have been attributed to the European continent and Mediterranean Sea area.

(c) Commonwealth countries only.

(d) Oil Rigs not included.

London includes Heathrow, Gatwick and Stansted.

S.E. England includes London, Luton, Lydd, Manston and Southend.

N. England comprises the airports in England north of a line from the Mersey to the Humber (Manchester, Liverpool, Blackpool, Newcastle, Leeds/Bradford and Tees-side).

Glasgow includes Prestwick and Abbotscinch.

- (a) N. France comprises the airports north of the line of 49° latitude.
- (b) Soviet Union and Eastern Europe includes the United Soviet Socialist Republics, Bulgaria, Czechoslovakia, Hungary, Poland, Roumania and the Eastern Zone of Germany but excluding Berlin.
- (c) North Africa includes Algeria, Libya, Morocco and Tunisia.
- (d) Commonwealth countries only.
- (e) Commonwealth countries including Rhodesia.
- (f) Middle East includes Iraq, Iran, Israel, Jordan, Lebanon, Persian Gulf States, Saudi Arabia, Sudan and the United Arab Republic.
- (g) Total is in respect of charter passengers only. Passengers on scheduled flights included in London – Other Italy.
- (h) Total is in respect of charter passengers only. Passengers on scheduled flights included in other routes to Italy.

These figures are based on the origin and destination of passengers as reported to UK airport authorities by UK and foreign airlines. Operators are required to report in respect of each service operated the point of uplift and discharge of each passenger. The figures may not reflect a passenger's entire air journey; the point at which a passenger disembarks from a particular service may not represent their ultimate destination.

Although Operators are asked to report all passenger journeys, in some cases the actual point of uplift or discharge is not recorded. In such cases all passengers are allocated to the end point of the service, i.e., the aircraft's ultimate origin or destination. This has been the practice since the 1 January 1976 — before this date missing information was replaced by estimates made by the Authority. The figures in this table include all passengers carried on scheduled and chartered services excluding those carried on aircraft chartered by government departments.

Domestic Passengers by Main Routes July 1977 Table 19

(a) Heathrow, Gatwick and Stansted
 Traffic counted in either direction

The figures show the uplift and discharge of passengers according to the destination and origin of the route. Because of the method of collection of this information there are discrepancies between the reports received from airports on a route, particularly in the case of multi-sector flights. In most cases, however, the discrepancies are small, but in a few cases the figures include an estimated component.

30 Cargo by Type and Nationality of Operator July 1977

Appendix A Definitions—Traffic Statistics

MOVEMENTS AT AIRPORTS

| | |
|--|--|
| An air transport movement | is a landing or a take-off of an aircraft engaged on commercial air transport. The types of movement covered are all scheduled service movements, whether loaded or empty, and charter movements transporting passengers or cargo from one point to another. All other types of commercial flying are excluded (e.g. flights returning to the airport of take-off without landing elsewhere, empty charter positioning flights paid for by the charterer, ferrying of empty aircraft, etc.). |
| Empty charter positioning flights | are flights by chartered aircraft moving into position for transport flights or returning to base after such flights. |
| Other commercial flights | are miscellaneous non-transport charter flights (e.g. commercial delivery or ferry of empty aircraft and local flights for the Press, survey companies or farmers). |
| Test and training flights | are flights for the purpose of testing aircraft or airports, or for training flying crew or ground personnel. Also included in this category are demonstration flights by makers or sellers of aircraft and aviation equipment. Aero-club instructional flights are excluded from this category and shown under 'Aero-club'. |
| Other non-commercial flights | by air transport operators are flights by air transport operators for the sole purpose of moving their own aircraft, personnel or stores from one place to another, and air transport flights forced to return to base by bad weather, engine failure or other causes. |
| Private flights | are flights for purely private purposes by private owners or other private aircraft operators, excluding aero-club flights. |
| Aero-club flights | are flights operated by aero-club members for instruction or pleasure. |
| Official flights | are flights for official purposes by British or foreign civil Government Departments excluding air transport movements. |
| Military flights | are flights by British or foreign military personnel exclusively for military purposes. |

AIR PASSENGERS

| | |
|-----------------------------|---|
| Passengers | includes all revenue and non-revenue passengers on air transport flights. Air crew being carried on such flights other than as members of the aircraft's complement are classified as non-revenue passengers. |
| Revenue passengers | are those who pay 25 per cent or more of the normal applicable fare. |
| A terminal passenger | is a passenger joining or leaving the aircraft flight at the reporting airport. A passenger travelling between two reporting airports is counted twice, once at each airport. |
| A transit passenger | is a passenger who arrives at and departs from a reporting airport on the same aircraft which is transiting the airport. Each transit passenger is counted once only and not once on arrival and once on departure. |

TYPES OF SERVICES

| | |
|-------------------------------|--|
| International services | are services flown between the United Kingdom (including Great Britain, Isle of Man, Channel Islands and Northern Ireland) and places outside. |
| Domestic services | are services flown entirely within Great Britain, Isle of Man, Channel Islands and Northern Ireland. |
| Cabotage | is traffic carried between territories of the United Kingdom other than domestic services. |
| Scheduled services | are those performed according to a published timetable, including those supplementary thereto, and open to use by members of the public. |

| | |
|--|--|
| Non-scheduled or charter services | include all air transport flights other than scheduled services. |
| Separate fare charters | are those where the charterer re-sells part of the capacity of the aircraft to the public at large; an organisation, etc. |
| Inclusive tour | consists of a round trip or circle trip performed in whole or in part by air, organised by a tour operator and offered to the public at a comprehensive price including besides air transport, accommodation for the duration of the trip, surface transport and, where appropriate, other amenities. |
| Advance booking charters | Charter flights operated under Class 2 licences between the UK and territories overseas in respect of which an operator has sold blocks of seats to one or more licensed travel organisers for resale to passengers. Advance details of sales to travel organisers and sales of seats to passengers have to be notified to the Civil Aviation Authority. |
| Sole-use charters | are those where the charterer has exclusive use of the whole capacity of the aircraft and does not dispose of any of it to third persons for reward. |
| Licence | means an air transport licence granted under Section 22 of the Civil Aviation Act 1971. |

CLASSES OF LICENCE

- Class 1** authorises scheduled service flights;
- Class 2** authorises advance booking charter flights;
- Class 3** authorises inclusive tour charter flights;
- Class 4** authorises other charter flights for the carriage of passengers;
- Class 5** authorises substitute charter flights;
- Class 6** authorises charter flights for the carriage of cargo and attendants;
- Class 7** authorises sole-use charter flights.

NB These definitions are not intended as a comprehensive statement of each type of licence. They define the general purpose of the types of flights authorised by each class of licence. The specification for each class of licence is published in the Civil Aviation Authority Official Record Series 1.

Exempt operations are operations for which a licence is not required. The Civil Aviation Authority in pursuance of its powers under paragraph (a) of Section 21 (2) of the Civil Aviation Act 1971 has by an instrument dated 29 March 1972 and later instruments specified a number of types of flights for which a licence is not required. The specifications of such flights are published in the Authority's Official Record Series 1 and include all sole-use charter flights other than those made to or from vessels or installations used in connection with oil or gas exploration or production under the sea. Other examples are ambulance flights, aircrew training and test flights, Government charters, helicopters carrying externally suspended loads, etc.

Cargo means the weight of any property carried on an aircraft including the weight of vehicles carried, mail and diplomatic bags, but excluding passengers' baggage. When related to the activity of an airline or airlines, cargo uplifted means the number of tonnes of revenue cargo that is obtained by counting each tonne of cargo on a particular flight (with one flight number) once only and not repeatedly on each individual stage of that flight. The only exception to this is for cargo flown on both the international and domestic stages of the same flight which is considered in competition both as a domestic and an international shipment or despatch.

When related to the activity of an airport it is usual to measure cargo as uplifted and set down. Cargo in transit through the airport on the same aircraft is excluded as is mail, company stores, excess baggage, and diplomatic bags picked up and set down.

Appendix B Measures and their Computation

The Civil Aviation Authority follows closely the statistical practices of the International Civil Aviation Organisation.

| | |
|---|---|
| Aircraft accident | An occurrence associated with the operation of an aircraft which takes place between the time any person boards the aircraft with the intention of flight until such time as all such persons have disembarked, in which (a) any person suffers death or serious injury as a result of being in or upon the aircraft or by direct contact with the aircraft or anything attached thereto, or (b) the aircraft incurs damage or structural failure which adversely affects the structure strength, performance or flight characteristics of the aircraft and which would normally require major repair or replacement of the affected component. |
| Aircraft days available | The sum of the number of days each aircraft is available for use during the year. This figure includes days required for maintenance and overhaul but it does not include days between the date of purchase and the date actually placed in service, days out of service due to major accidents or conversion, days when an aircraft is in possession of others or is not available because of government action such as grounding by government regulatory agencies. |
| Aircraft departures | The number of take-offs of aircraft. For statistical uses, departures are equal to the number of landings made or flight-stages flown. |
| Aircraft hours | An aircraft hour is said to be performed when an aircraft operates one hour; aircraft hours are measured on the basis of block-to-block time. |
| Aircraft hours flown per day | This is an average per aircraft measure computed by dividing the actual hours of use by the number of days on which the aircraft are available. |
| Aircraft kilometres performed | Aircraft kilometres equal the sum of the products obtained by multiplying the number of flights performed by the stage distance. |
| Aircraft movements | An aircraft take-off or landing at an airport. For airport traffic purposes one arrival and one departure are counted as two movements. |
| All cargo services | Services relating to scheduled or non-scheduled flights performed by aircraft carrying loads other than passengers, i.e. freight, baggage, mail. |
| Baggage | Personal property of passengers and crew carried on an aircraft by agreement with the operator. |
| Block-to-block/ chock-to-chock time | The total number of hours (and minutes) measured from the time the aircraft moves from the loading point until it stops at the unloading point. |
| Capacity offered per aircraft hour | This is an average per aircraft computed by dividing the tonne-kilometres available by the related aircraft hours of flight. |
| Capacity offered per flight | This is an average per aircraft computed by dividing the tonne-kilometres available by the related number of aircraft departures. |
| Cargo (or mail) tonne-kilometres performed | A metric tonne of cargo carried one kilometre. Cargo tonne-kilometres equal the sum of the products obtained by multiplying the number of tonnes of cargo, diplomatic bags carried on each flight stage by the stage distance. Mail tonne-kilometres are computed in the same way. |

| | |
|---|---|
| Cargo (or mail) tonnes carried | The number of tonnes of cargo carried is obtained by counting each tonne of cargo or mail on a particular flight (with one flight number) once only and not repeatedly on each individual stage of that flight. The only exception to this is for cargo flown on both the international and domestic stages of the same flight, which is considered in computation both as a domestic and an international shipment or despatch. The same principle is used in calculating mail tonnes carried. |
| Distance flown per passenger | The average distance flown per passenger is computed by dividing the passenger-kilometres by the related number of passengers carried. |
| Distance flown per tonne of cargo | The average distance flown per tonne of cargo is computed by dividing the cargo tonne-kilometres performed by the related number of tonnes of cargo carried. |
| Flights (commercial air transport) | The operation of aircraft on a stage or number of stages with an unchanging flight number is counted as one flight. (Technical stops are not counted.) An air transport operation having both international and domestic stages would be counted as an international flight and also a domestic flight. |
| Passenger-kilometres performed | A passenger-kilometre is performed when a passenger is carried one kilometre. Calculation of passenger-kilometres equals the sum of the products obtained by multiplying the number of revenue passengers carried on each flight stage by the stage distance. The resultant figure is equal to the number of kilometres travelled by all passengers. |
| Passenger load factor | Passenger-kilometres performed divided by seat-kilometres available and expressed as a percentage. |
| Passenger revenue per traffic-unit | This is a type of financial measurement which relates the passenger traffic applicable to the passenger revenues. It is computed by dividing passenger revenues by the passenger-kilometres performed. |
| Passengers carried | The number of passengers carried is obtained by counting each passenger on a particular flight (with one flight number) once only and not repeatedly on each individual stage of that flight, with a single exception that a passenger flying on both the international and domestic stages of the same flight is counted as both a domestic and an international passenger. |
| Passengers carried per aircraft | The average number of passengers per aircraft is computed by dividing passenger-kilometres by the related aircraft kilometres flown. |
| Payload capacity | Total of aircraft capacity available for the carriage of revenue load (passengers, baggage, cargo and mail) measured in metric tonnes. |
| Payload capacity per aircraft | This is an average per aircraft computed by dividing the tonne-kilometres available by the related aircraft kilometres flown. |
| Payload carried | The revenue load of passengers, baggage, cargo and mail carried in the aircraft as measured in metric tonnes. |
| Seat-kilometres available | A seat-kilometre is available when a seat is flown one kilometre. Seat-kilometres available are equal to the sum of the products obtained by multiplying the number of passenger seats available for sale on each flight stage by the stage distance. Seats not actually available for the carriage of passengers because of the weight of fuel or other load are excluded in the calculations. |

| | |
|--|---|
| Seats available per aircraft | This is an average per aircraft computed by dividing the seat-kilometres available by the related aircraft kilometres flown. |
| Speed flown per aircraft | This is an average per aircraft measure computed by dividing the aircraft kilometres flown by the related aircraft hours of flight. |
| Stage distance flown per aircraft | The average stage distance flown per aircraft is computed by dividing the aircraft kilometres flown by the related number of aircraft departures. |
| Tonne-kilometres available | A metric tonne of available payload space flown one kilometre. Tonne-kilometres available equals the sum of the products obtained by multiplying the number of tonnes available for the carriage of revenue load (passengers, cargo and mail) on each flight stage by the stage distance. |
| Tonne-kilometres performed | A metric tonne of revenue load carried one kilometre. Tonne-kilometres performed equals the sum of the products obtained by multiplying the number of tonnes of revenue load carried on each flight stage by the stage distance. |
| Tonnes available | The capacity of the aircraft for the carriage of payload measured in tonnes. |
| Weight load factor | Tonne-kilometres performed divided by tonne-kilometres available and expressed as a percentage. |
