**CAA Monthly Statistics**  
(up to and including March 1974)

## ENQUIRIES

**Statistics** Enquiries concerning the information in *CAA Monthly Statistics* should be addressed, according to the subject, as follows:—

Airport and Air Passenger Statistics: Civil Aviation Authority  
Room 209  
Shell Mex House  
Strand  
London WC2R 0DP  
Tel. 01 217 3638

Airline Statistics: Civil Aviation Authority  
Room 622  
Aviation House  
129 Kingsway  
London WC2B 6NN  
Tel. 01 405 6922 Ext. 244

**Distribution** Enquiries concerning orders and subscriptions should be addressed to:—

Civil Aviation Authority  
Printing and Publication Services  
Greville House  
37 Gratton Road  
Cheltenham  
Glos GL50 2BN

**Civil Aviation Statistics for earlier years** Statistics for the period from January 1968 to December 1972 were published in the Civil Aviation Series of the Department of Trade & Industry's *Business Monitors*. The series comprise:

CA. 1	<i>Airport activity</i>	(Monthly)
CA. 2	<i>Air passengers</i>	"
CA. 3	<i>Air freight &amp; mail</i>	"
CA. 4	<i>Airline operations</i>	"
CA. 5	<i>Airline operations</i>	(Quarterly)
CA. 6	<i>Domestic passenger traffic</i>	"
CA. 7	<i>Air passengers – international and cabotage</i>	"
CA. 8	<i>Airline financial statistics</i>	(Annually – 1968 to 1971 only)

Annual versions of CA. 1 to CA. 7 were also published

# Foreword

## 1 CONTENT

- 1.1 *CAA Monthly Statistics* is prepared by the Civil Aviation Authority with the co-operation of the United Kingdom airport and airline operators; some of this information is required by the Civil Aviation Act, 1971. Statistics for the Channel Islands airports are provided by the Commandant for Jersey Airport and the Office of the Lieutenant Governor for Guernsey and Alderney Airports. The assistance from all these authorities is gratefully acknowledged.
- 1.2 Some of the figures included in *CAA Monthly Statistics* are provisional only and may be revised in later issues. Figures contained in monthly and quarterly tables have not been seasonally adjusted, but figures are given, in the tables covering past years, for the most recent six months and the corresponding six months one year earlier.

## 2 CONVENTIONS

- 2.1 **Symbols and Abbreviations** The following are used throughout:

+	= UK Customs airport
.	= not available
—	= nil or less than half the final digit shown
n.e.i.	= not elsewhere included
a.t-km	= available tonne-kilometres

A.T. Movements = Air Transport Movements

- 2.2 **Rounding of Figures** In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

- 2.3 **Units of Measurement** Metric measurements are used throughout *CAA Monthly Statistics*

Tonne	= 1000 kilograms
Tonne-kilometres	= The product obtained by multiplying the number of tonnes carried by the distance flown measured in kilometres

Conversion factors (foot/pound system to metric system)

1 short ton (2000 lbs)	= 0.9072 tonnes
1 ton (2240 lbs)	= 1.0160 tonnes
1 statute mil (5280 feet)	= 1.6093 kilometres
1 short ton-mile	= 1.4600 tonne-kilometres

The explanations of other terms used throughout the Tables are contained in the section on Definitions immediately following the Tables.

## 3 ENQUIRIES

- 3.1 **Statistics** Enquiries concerning the information in *CAA Monthly Statistics* should be addressed, according to the subject, as follows:

Airport and Air Passenger Statistics: Civil Aviation Authority  
Room 209  
Shell Mex House  
Strand  
London WC2R 0DP  
Tel. 01 217 3638

Airline Statistics: Civil Aviation Authority  
Room 622  
Aviation House  
129 Kingsway  
London WC2B 6NN  
Tel. 01 405 6922 Ext. 244

**3.2 Distribution** Enquiries concerning orders and subscriptions should be addressed to:

Civil Aviation Authority  
Printing and Publication Services  
Greville House  
37 Gratton Road  
Cheltenham  
Glos GL50 2BN

**4 CIVIL AVIATION STATISTICS FOR EARLIER YEARS** Statistics for the period from January 1968 to December 1972 were published in the Civil Aviation Series of the Department of Trade & Industry's *Business Monitors*.

The series comprise:

CA. 1	<i>Airport activity</i>	(Monthly)
CA. 2	<i>Air passengers</i>	"
CA. 3	<i>Air freight &amp; mail</i>	"
CA. 4	<i>Airline operations</i>	"
CA. 5	<i>Airline operations</i>	(Quarterly)
CA. 6	<i>Domestic passenger traffic</i>	"
CA. 7	<i>Air passengers – international and cabotage</i>	"
CA. 8	<i>Airline financial statistics</i>	(Annually – 1968 to 1971 only)

Annual versions of CA. 1 to CA. 7 were also published.

# Civil Aviation Statistics—March 1974

## Activity at UK Airports

Air transport movements at UK airports totalled almost 50 000 during March 1974, a decline of 2·2 per cent on March 1973. During the three month period January to March 1974, however, a small growth was achieved against 1973; a 2·1 per cent decline in the London Area being offset by a 3·1 per cent growth at airports elsewhere in the UK. Heathrow (170 additional ATMs per month) and Stansted (21 additional ATMs per month) were alone in reporting growths in the London Area, almost one per cent and 15·7 per cent respectively. Gatwick and Luton handled a monthly average of 327 movements less than the 1st quarter 1973 and Luton 361 movements less; declines of 6·9 and 20·4 per cent respectively. Swansea (23 additional ATMs per month) Sumburgh (450 ATMs per month) and Aberdeen (750 ATMs per month) continued to report increasing activity and consequently achieved growth of 255·6 per cent, 174·4 per cent and 151·4 per cent respectively. Neither scheduled nor charter movements showed much change between January to March 1974 and the corresponding period in 1973 and whilst there was very little change (at 72·4 per cent) in the UK operators' share of scheduled service movements, their share of charter traffic increased by 1·3 percentage points to 90·9 per cent. There were over 200 diversions during March; a quarter of these occurred from Heathrow mainly owing to bad weather. Total UK club and private flying declined more heavily than air transport movements during March 1974 falling 19·6 per cent to approximately 57 000 movements. The monthly average of such movements in the 1st quarter of 1974 was nearly 49 000 against over 55 000 in the previous year, a decline of nearly 11·5 per cent.

Almost 2·8 million terminal passengers used UK airports during March. This represented a 2·0 per cent decline in London area passengers and 5·0 per cent decline elsewhere in the UK compared with April 1973 and resulted in an overall decrease of 2·9 per cent. During the first quarter of 1974, however, the growth of 0·6 per cent reported by the London Area compared with a year earlier was sufficient to provide a marginal overall growth of 0·2 per cent despite a decline of 0·8 per cent elsewhere in the UK. Heathrow and Stansted were again alone in the London Area in recording increases (5·8 per cent; 72 979 additional passengers per month and 15·9 per cent; 1185 additional passengers per month respectively). Passengers at Gatwick declined by a monthly average of 28 911, a decrease of 9·3 per cent.

Of the monthly average of 2·5 million passengers who used UK airports during the first quarter of 1974, 1·7 million travelled on international services and 0·8 million on domestic services; 1·2 million of the international passengers travelled by scheduled services and 0·5 million by charter services. Scheduled service carryings

showed a growth of 5·4 per cent on a year earlier while charter service carryings showed a decline of 17·9 per cent. The two largest markets for scheduled services were to France and the USA, the former carrying 13·3 per cent of total scheduled service passengers and the latter 11·9 per cent. Passengers travelling between the UK and France showed a growth of 19·3 per cent while passengers between the UK and the USA declined by 7·9 per cent. Passengers on scheduled services to Germany and Ireland both accounted for 9·1 per cent of total scheduled service passengers (a decline of 6·0 per cent and a growth of 7·1 per cent respectively). The most important market for charter services continued to be Spain with 41·7 per cent of total charter passengers but the number of passengers carried declined by 24·3 per cent. Charter services to Germany and Italy (7·4 per cent) also carried fewer passengers (9·5 and 21·0 per cent respectively) but continued to remain important markets (21·1 and 7·4 per cent of total charter passengers respectively).

The monthly average of passengers flying on UK domestic routes during the first quarter of 1974 was 4·8 per cent greater compared with a year earlier. Passengers on the London routes grew by 6·3 per cent (4·9 per cent growth on the London–Scotland routes and 7·3 per cent elsewhere).

During the month of March 1974 cargo handled by UK airports reached almost 64 000 tonnes, a 4·4 per cent growth on March 1973. During the first quarter a monthly average of almost 60 000 tonnes moved through UK airports a growth of 7·3 per cent against the first quarter of 1973. London area airports reported an overall growth of 9·6 per cent between the same periods, to which Heathrow contributed 3380 additional tonnes per month (9·5 per cent growth) and Gatwick 327 additional tonnes per month (7·6 per cent growth). Stansted reported the highest rate of growth of 32·5 per cent (253 additional tonnes per month). Outside the London Area cargo handled during March 1974 was 12·8 per cent less than that handled in March 1973. Belfast reported handling 391 fewer tonnes per month in the 1st quarter of 1974 compared with a year earlier (a decline of 24·9 per cent). Increases were reported at Glasgow (380 additional tonnes; 22·3 per cent growth) and Bournemouth (375 additional tonnes; 172·5 per cent growth). Over the three months January–March 1974 cargo carried by scheduled services increased by 6·0 per cent and that by charter services by 16·6 per cent compared with a year earlier. The UK operators' share of tonnage carried by both scheduled and charter operators declined from the 1973 level, the former by 2·7 percentage points to 50·4 per cent and the latter by 4·1 percentage points to 71·5 per cent.

## **Output of UK Airlines**

At 672·5 million available tonne-kilometres the output of UK airlines for scheduled and non-scheduled services during March 1974 represented a decline of 3·5 per cent on March 1973.

The scheduled service output of over 482 million available tonne-kilometres was nearly 1 per cent higher than in March 1973, and an overall load factor of 55·6 per cent was achieved compared with 53·1 per cent a year earlier. Seat kilometres used were 55·1 per cent of those available compared with 54·8 per cent in March 1973. The seat factors on domestic and international services were 67·4 and 54·3 per cent compared with 67·1 and 53·9 per cent in the previous March. The non-scheduled services output in March

1974 was nearly 190 million available tonne-kilometres compared with over 218 million in March 1973, a decline of just over 13 per cent. Advance Booking Charters accounted for 3·8 million available tonne-kilometres and Inclusive Tour Charters for just over 80 million, 2·0 and 42·4 per cent of total non-scheduled output respectively.

**NOTE:** Statistics of airport activity, passengers and cargo are derived from data supplied by airports. Airline statistics are based on data supplied by airlines. Data from these two sources are not strictly comparable. There are small differences in timing and more significant differences arise because airlines are not asked to report non-revenue passengers and cargo.

# Size Structure of UK Airports and Airlines Year ended 31 March 1974

**Table 1**

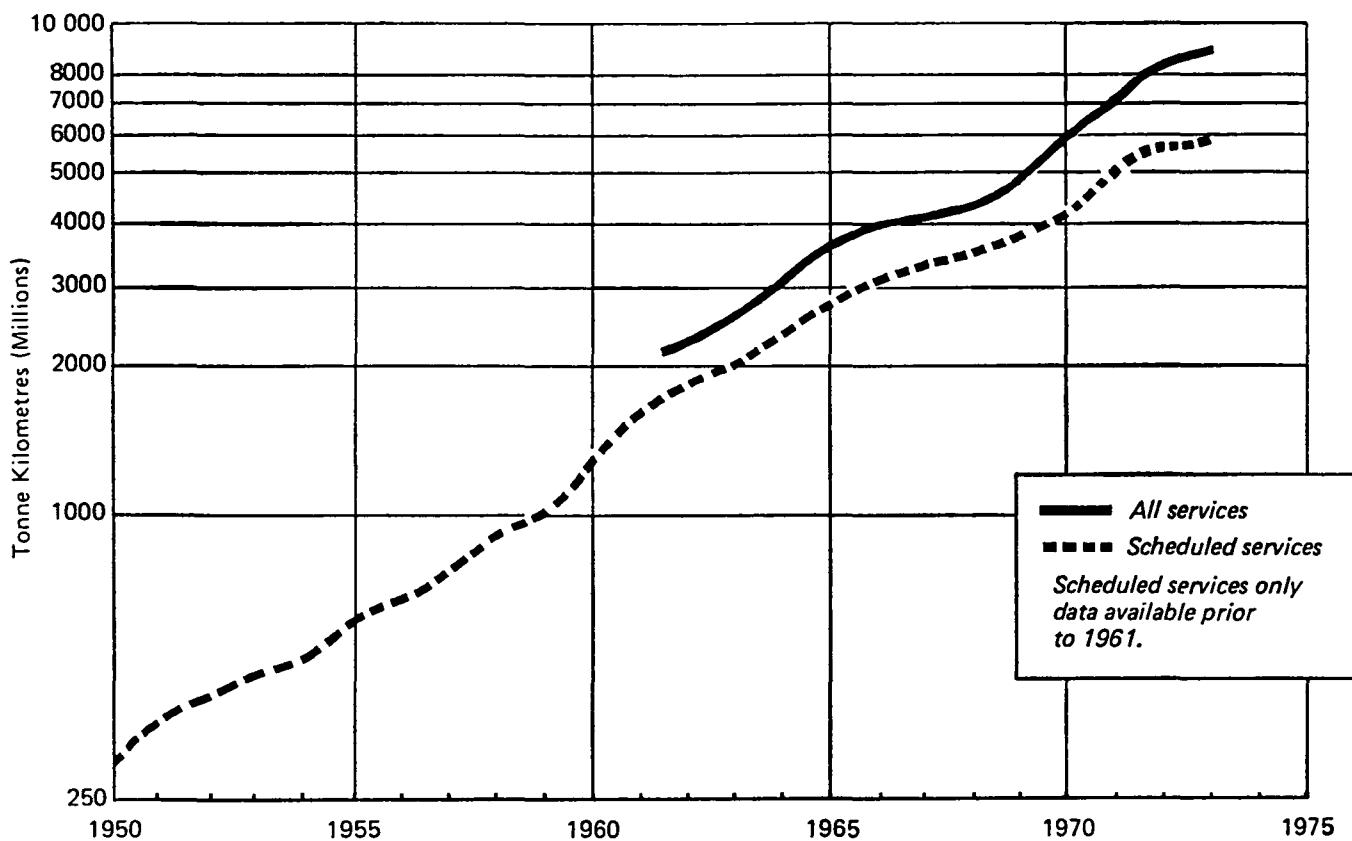

Airports	Terminal passengers (000)	Percentage of passengers at all UK airports	Percentage of airports this size and smaller	Percentage of passengers at all UK airports this size and smaller

**London** includes Heathrow, Gatwick and Stansted.

**S.E. England** includes Ashford, London, Luton, Lydd, Manston and Southend.

**N. England** comprises the airports in England north of a line from the Mersey to the Humber (Manchester, Liverpool, Blackpool, Newcastle, Leeds/Bradford and Tees-side).

**Glasgow** includes Prestwick and Abbotscinch.

- (a) N. France comprises the airports north of the line of 49° latitude.
- (b) Soviet Union and Eastern Europe includes the United Soviet Socialist Republics, Bulgaria, Czechoslovakia, Hungary, Poland, Roumania and the Eastern Zone of Germany but excluding Berlin.
- (c) North Africa includes Algeria, Libya, Morocco and Tunisia.
- (d) Commonwealth countries only.
- (e) Commonwealth countries including Rhodesia.
- (f) Middle East includes Iraq, Iran, Israel, Jordan, Lebanon, Persian Gulf States, Saudi Arabia, Sudan and the United Arab Republic.
- (g) Total is in respect of charter passengers only. Passengers on scheduled flights included in London – Other Italy.
- (h) Total is in respect of charter passengers only. Passengers on scheduled flights included in other routes to Italy.

The figures show the uplift and discharge of passengers at United Kingdom airports on services operated there according to their immediate destination or last point of embarkation overseas on those services. These may not, in all cases, be the origin or destination of passenger journeys: they may be places at which a journey was broken or a connection made with another air service. The figures in this table include all passengers carried on scheduled and charter services excluding those carried on aircraft chartered by Government Departments.

<b>TOTAL</b>	<b>418.0</b>	<b>398.7</b>	<b>—</b>

(a) Heathrow, Gatwick and Stansted.  
 Traffic counted in either direction.

The figures show the uplift and discharge of passengers according to the destination and origin of the route. Because of the method of collection of this information there are discrepancies between the reports received from airports on a route, particularly in the case of multi-sector flights. In most cases, however, the discrepancies are small, but in a few cases the figures include an estimated component.

<sup>†</sup> Variable charges can be made against only those licences issued under the revised system that came into effect on 1 January 1974; immediate conversion to the revised system did not take place in all cases. In the table above activities that continued under old-style licences have been included under the equivalent revised licence classes; for example, activity under Class A licences has been listed under Class 1, but were not in fact chargeable.

# Definitions

## AIRPORT ACTIVITY

- An air transport movement** is a landing or a take-off of an aircraft engaged on commercial air transport. The types of movement covered are all scheduled service movements, whether loaded or empty, and charter movements transporting passengers or cargo from one point to another. All other types of commercial flying are excluded (e.g. flights returning to the airport of take-off without landing elsewhere, empty charter positioning flights paid for by the charterer, ferrying of empty aircraft, etc.).
- Empty charter positioning flights** are flights by chartered aircraft moving into position for transport flights or returning to base after such flights.
- Other commercial flights** are miscellaneous non-transport charter flights (e.g. commercial delivery or ferry of empty aircraft and local flights for the Press, survey companies or farmers).
- Test and training flights** are flights for the purpose of testing aircraft or airports, or for training flying crew or ground personnel. Also included in this category are demonstration flights by makers or sellers of aircraft and aviation equipment. Aero-club instructional flights are excluded from this category and shown under 'Aero-club'.
- Other non-commercial flights** by air transport operators are flights by air transport operators for the sole purpose of moving their own aircraft, personnel or stores from one place to another, and air transport flights forced to return to base by bad weather, engine failure or other causes.
- Private flights** are flights for purely private purposes by private owners or other private aircraft operators, excluding aero-club flights.
- Aero-club flights** are flights operated by aero-club members for instruction or pleasure.
- Official flights** are flights for official purposes by British or foreign civil Government Departments excluding air transport movements.
- Military flights** are flights by British or foreign military personnel exclusively for military purposes.

## AIR PASSENGERS

- Passengers** includes all revenue and non-revenue passengers on air transport flights. Air crew being carried on such flights other than as members of the aircraft's complement are classified as non-revenue passengers.
- Revenue passengers** are those who pay 25 per cent or more of the normal applicable fare.
- A terminal passenger** is a passenger joining or leaving the aircraft flight at the reporting airport. A passenger travelling between two reporting airports is counted twice, once at each airport.
- A transit passenger** is a passenger who arrives at and departs from a reporting airport on the same aircraft which is transiting the airport. Each transit passenger is counted once only and not once on arrival and once on departure.

- International services** are services flown between the United Kingdom (including Great Britain, Isle of Man, Channel Islands and Northern Ireland) and places outside.
- Domestic services** are services flown entirely within Great Britain, Isle of Man, Channel Islands and Northern Ireland.
- Cabotage** is traffic carried between territories of the United Kingdom other than domestic services.
- Scheduled services** are those performed according to a published timetable, including those supplementary thereto, and open to use by members of the public.
- Non-scheduled services** include all air transport flights other than scheduled services.
- Charter services** are those transporting passengers or cargo for hire or reward from one point to another, other than scheduled services.

## AIR CARGO

- Cargo** in airport statistics means the weight of cargo (including accompanied vehicles) picked up and set down by aircraft on air transport flights. Cargo in transit through the airport on the same aircraft is excluded as is mail, company stores, excess baggage and diplomatic bags picked up and set down. (See also definition below under 'Airline Operations').
- Tonnes** are metric tonnes of 1 000 kilogrammes (2 204·62 lb).

## AIRLINE OPERATIONS

- Advance booking charters (ABC)** Charter flights operated under Class 2 licences between the UK and designated territories overseas in respect of which an operator has sold blocks of seats to one or more licensed travel organisers for resale to passengers. Details of the sales to travel organisers have to be notified to the Civil Aviation Authority 120 days before the date of the flight: details of the sales of seats to passengers which must be on a round trip basis have to be notified to the Authority 60 days before departure.
- Aircraft-hour** an aircraft hour is performed when an aircraft flies for one hour: aircraft hours are measured on the basis of block-to-block time.
- Aircraft-kilometre (Aircraft-km)** An aircraft-kilometre is performed when an aircraft flies one kilometre. Aircraft-kilometres equal the sum of the products obtained by multiplying the number of flights performed on each stage flight by the stage distance measured in kilometres.
- Cargo** in airline statistics means the weight of any property carried on an aircraft, including the weight of vehicles carried, mail and diplomatic bags, but excluding passengers' baggage. (See also definition above for 'Air Cargo' statistics and definition below for 'Passenger tonne-kilometres').
- Cargo tonne-km** means a metric tonne of cargo carried one kilometre. Cargo tonne-kilometres equal the sum of products obtained by multiplying the number of tonnes of cargo carried on each flight stage by the stage distance measured in kilometres.

<b>Cargo uplifted</b>	means the number of tonnes of cargo which is obtained by counting each tonne of cargo on a particular flight (with one flight number) once only and not repeatedly on each individual stage of that flight. The only exception to this is for cargo flown on both the international and domestic stages of the same flight which is considered in computation both as a domestic and an international shipment or despatch.
<b>Daily utilisation per a/c (hrs)</b>	is an average per aircraft measure computed by dividing the aircraft hours of use by the number of days on which the aircraft are available. This latter figure includes days required for maintenance and overhaul but it does not include days between the date of purchase and the date actually placed in service, days out of service due to major accidents or conversion, days when an aircraft is in the possession of others or is not available because of government action, such as grounding by government order.
<b>Exempt operations</b>	are operations for which a licence is not required. The Civil Aviation Authority in pursuance of its powers under paragraph (a) of Section 21(2) of the Civil Aviation Act 1971 has by an instrument dated 29 March 1972 and later instruments specified a number of types of flights for which a licence is not required. The specifications of such flights are published in the Authority's Official Record Series 1 but typical examples are ambulance flights, aircrew training and test flights, Government charters, helicopters carrying externally suspended loads, etc.
<b>Inclusive tours (IT)</b>	are separate fare charters where the cost to the passenger includes the cost of accommodation.
<b>Licence</b>	means an air transport licence granted under Section 22 of the Civil Aviation Act 1971.
<b>Mail</b>	covers only that handled by postal administrations and includes troop mail.
<b>Mail tonne-km</b>	are calculated using the same principle as when calculating cargo tonne-km.
<b>Overall load factor</b>	is an expression of tonne-km used as a percentage of tonne-km available.
<b>Passengers</b>	in airline statistics means revenue passengers only, i.e. passengers paying 25 per cent or more of the normal fare.
<b>Passenger-km</b>	means a passenger carried one kilometre. Calculation of passenger-kilometre equals the sum of the products obtained by multiplying the number of passengers carried on each flight stage by the stage distance measured in kilometres. The resultant figure is equal to the number of kilometres travelled by all passengers. Note.—Passenger-km is numerically equivalent to Seat-km used.
<b>Passenger load factor</b>	is an expression of seat-km used as a percentage of seat-km available.
<b>Passengers uplifted and passengers carried</b>	The number of passengers uplifted is obtained by counting each revenue passenger on a particular flight (with one flight number) once only and not repeatedly on each individual stage of flight.
<b>Passenger tonne-kilometres</b>	is deduced as the difference between the total tonne-kilometres used and tonne-kilometres used for cargo and/or mail; it includes the weight of passengers' free and excess baggage.

- Seat-km available** a seat-kilometre is available when a seat is flown one kilometre. Seat-kms available are equal to the sum of the products obtained by multiplying the number of passenger seats available for sale on each stage flight by the stage distance measured in kilometres.
- Seat-km used** a seat-kilometre is used when a seat occupied by a revenue passenger is flown for one kilometre. Seat-km used is equal to the sum of the products obtained by multiplying the number of revenue passengers carried on each stage flight by the stage distance measured in kilometres.
- Separate fare charters** are those where the charterer re-sells part of the capacity of the aircraft to the public at large; an organisation, etc.
- Sole-use charters** are those where the charterer has exclusive use of the whole capacity of the aircraft and does not dispose of any of it to third persons for reward.
- Stage flights** that part of the flight between two consecutive places, i.e. from take-off to the next landing, excluding technical stops, on the route.
- Tonne-km available** a metric tonne of payload space available flown one kilometre. Tonne-km available is equal to the sum of the products obtained by multiplying the number of tonnes available for the carriage of revenue load (passengers and cargo) on each stage flight by the distance measured in kilometres.
- Tonne-km used** a metric tonne of revenue load carried one kilometre. Tonne-km used is the sum of the products obtained by multiplying the number of tonnes of revenue load (passengers and cargo) carried on each stage flight by the distance measured in kilometres.

## Classes of Licence

**NB** These definitions are not intended as a comprehensive statement of each type of licence. They define the general purpose of the types of flights authorised by each class of licence. The specification for each class of licence is published in the Civil Aviation Authority Official Record Series 1.

- Class 1** authorises scheduled service flights;
- Class 2** authorises advance booking charter flights;
- Class 3** authorises inclusive tour charter flights;
- Class 4** authorises other charter flights for the carriage of passengers;
- Class 5** authorises substitute charter flights;
- Class 6** authorises charter flights for the carriage of cargo and attendants;
- Class 7** authorises sole-use charter flights.
