SUPERSEDING
MIL-STD-1516B
13 November 1990

MILITARY HANDBOOK

UNIFIED CODE FOR
COATINGS AND FINISHES FOR
DOD MATERIEL

AMSC N/A

AREA MFFP

DISTRIBUTION STATEMENT A. Approved for public release distribution is unlimited.

FOREWARD

1. This military handbook is approved for use by all Departments and Agencies of the Department of Defense.
2. This handbook is for guidance only. This handbook cannot be cited as a requirement. If it is, the contractor does not have to comply.
3. Beneficial comments (recommendations, additions, deletions) and any pertinent data which may be of use in improving this document should be addressed to ASD/ENSI, Wright-Patterson Air Force Base, Ohio 45433-6503, by using the self addressed Standardization Document Improvement Proposal (DD Form 1426) appearing at the end of this document or by letter.

K.	Cross Reference to MIL-F-14072C Code System Finishes for Ground Electronic Equipment	106

1. SCOPE

1.1 Scope. This handbook establishes a uniform code and to serve as a general guide to the selection of suitable materials, procedures, and systems for cleaning, plating, painting and otherwise finishing metal, plastic, wood, and other surfaces, for use by the Department of Defense (DOD). This handbook is for guidance only. This handbook cannot be cited as a requirement. If it is, the contractor does not have to comply.

1.2 Selection of finish system. Unless otherwise specified, the responsibility for selecting the cleaning method, surface treatment, metal coating, paint system or other finish should rest with the procuring activity. The finishing system should be selected from those listed in this document and should be referenced on drawings, contracts, and item specifications. Code finish cross reference numbers are preceded by the CODE to avoid possible confusion, for example, MIL-HDBK-1516, Code 1012-3105. This does not preclude the acceptance of a proven commercial finish selected by the manufacturer, suppliers, or contractor and concurred in by the procuring activity. Additional information relative to protective finishes and their selection may be found in MIL-HDBK-132 and MIL-STD-171.

1.3 Exposure classification. Type I surfaces are areas, either exposed to view when equipment is in operating or traveling conditions or areas not exposed to view but subject to combined direct action of climatic elements. Climatic elements include temperature extremes, humidity extremes, rain, hail, snow, sleet, salt laden air, industrial atmospheres, direct solar radiation, dust and scouring action of wind-blown sand.

1.3.1 Type I (exposed). Type I surfaces are areas, either exposed to view when equipment is in operating or traveling conditions or areas not exposed to view but subject to combined direct action of climatic elements. Climatic elements include temperature extremes, humidity extremes, rain, hail, snow, sleet, salt laden air, industrial atmospheres, direct solar radiation, dust and scouring action of wind-blown sand.

1.3.2 Type II (sheltered). Type II surfaces are not exposed to view during equipment operation and not subject to direct action of rain, hail, snow, sleet, direct solar radiation, and sand.

2. REFERENCE DOCUMENTS

The documents listed below are not necessarily all of the documents reference herein, but are the ones that are needed in order to fully understand the information provided by this handbook. Documents cited herein are intended to provide supplemental technical data and guidance. Documents referenced in this handbook should be tailored before contractual use. The documents are listed here to provide guidance for developing requirements for specification sections 3 and 4 and program tasking. Section 2, of the contractual specification, should list all documents required for the program. DoD is currently implementing new policy to minimize use of military specifications and standards. Programs should verify status of all the document listed and/or cited herein before applying them or referencing them in contracts.

2.1 Government documents.

2.1.1 Specifications, standards, and handbooks. The following specifications, standards, and handbooks form a part of this document to the extent specified herein. Unless otherwise specified, the issues of these documents are those listed in the latest issue of the Department of Defense Index of Specifications and Standards (DODISS) and supplement thereto.

SPECIFICATIONS

FEDERAL

AA-371	Linseed Oil, Boiled (for Use in Organic Coatings)
AA-1452	Lacquer (Spraying, Chemical Resistant)
AA-1558	Paint, Stencil
QQ-C-320	Chromium Plating (Electrodeposited)
QQ-Z-325	Zinc Coating, Electrodeposited, Requirement for
QQ-N-290	Nickel Plating (Electrodeposited)
QQ-P-416	Plating, Cadmium (Electrodeposited)
QQ-S-365	Silver Plating, Electrodeposited, General Requirements for
TT-C-490	Cleaning Methods and Pretreatment of Ferrous Surfaces, for Organic Coatings
TT-C-494	Coating Compound, Bituminous, Solvent Type, Acid Resistant
TT-C-542	Coating Polyurethane, Oil Free, Moisture Curing
TT-E-485	Enamel, Semi-gloss Rust-inhibiting
TT-E-489	Enamel, Alkyd, Gloss (for Exterior and Interior Surfaces)
TT-E-515	Enamel, Alkyd, Lusterless, Quick-drying
TT-E-516	Enamel, Lusterless, Quick-drying Styrenated Alkyd Type
TT-E-527	Enamel, Alkyd, Lusterless
TT-E-529	Enamel, Alkyd, Semi-gloss, Co-polymer
TT-E-1593	Enamel, Silicone Alkyd Co-polymer, Gloss (for Interior and Exterior Use)
TT-F-336	Filler, Wood, Paste
TT-L-20	Lacquer, Camouflage
TT-L-32	Lacquer, Cellulose Nitrate, Gloss for Aircraft Use

TT-L-58	Lacquer, Spraying, Clear and Pigmented (for Interior Use)
TT-P-25	Primer Coating, Exterior Undercoat for Wood, Ready-Mixed, White and Tints
TT-P-28	Paint, Aluminum, Heat Resisting (1200°F)
TT-P-645	Primer, Paint, Zinc-chromate, Alkyd Type
TT-P-662	Primer Surfacer, Sanding, Lacquer and Enamel Type
TT-P-664	Primer, Coating, Synthetic, Rust-inhibiting, Lacquer-resisting
TT-P-1757	Primer Coating, Zinc Chromate, Low Moisture Sensitivity
TT-S-300	Shellac, Cut
TT-V-51	Varnish, Asphalt
TT-V-109	Varnish, Interior, Alkyd-Resin
TT-V-119	Varnish, Spar, Phenolic-Resin
TT-V-121	Varnish, Spar, Water Resisting
TT-W-571	Wood, Preservative, Treating Practices
TT-W-572	Wood-Preservative, Water-repellant
VV-L-800	Lubricating Oil, General Purpose, Preservative (Water Displacing, Low Temperature)
CCC-D-950	Dyeing and After Treating Processes for Cotton Cloths
MILITARY	
MIL-V-173	Varnish, Moisture and Fungus Resistant (for Treatment of Communications, Electronic, and Associated Equipment)
MIL-C-450	Coating-compound, Bituminous Solvent Type, Black (for Ammunition)
MIL-F-495	Finish, Chemical, Black, for Copper Alloys
MIL-T-704	Treatment and Painting of Materiel
MIL-E-1115	Enamel, Interior, Alkyd, White (Formula No. 30)
MIL-R-3043	Resin Coating, Unpigmented for Engine Components and Metal Parts
MIL-L-3150	Lubricating Oil, Preservative, Medium
MIL-M-3171	Magnesium Alloy, Processes for Pretreatment and Prevention of Corrosion on
MIL-C-3301	Compound, Asphaltic, Hot Melt (Cavity Lining)
MIL-L-3891	Luminescent Material and Equipment (Nonradioactive)
MIL-S-4383	Sealing Compound, Topcoat, Fuel Tank, BUNA-N- Type
MIL-E-4556	Coating Kit, Epoxy, for Interior of Steel Fuel Tanks
MIL-S-5002	Surface Treatments and Inorganic Coatings for Metal Surfaces of Weapon Systems
MIL-W-5044	Walkway Compound, Nonslip and Walkway Matting Nonslip
MIL-W-5050	Walkway, Coating and Matting, Nonslip Aircraft, Application of
MIL-C-5056	Coating, Permanent Resin, Process for Application of, to Aircraft Parts
MIL-C-5541	Chemical Conversion Coatings on Aluminum Alloys
MIL-F-7179	Finishes and Coatings: Protection of Aerospace Weapons Systems, Structures and Parts, General Specifications for
MIL-R-7705	Radomes, General Specification for

MIL-C-8514 Coating Compound, Metal Pretreatment, Resin-Acid
MIL-A-8625 Anodic Coatings, for Aluminum and Aluminum Alloys
MIL-S-8784 Sealing Compound, Low Adhesion, for Removable Panels and Fuel
Tank Inspection Plates
MIL-S-8802 Sealing Compound, Temperature Resistant, Integral Fuel Tanks
and Fuel Cell Cavities, High Adhesion
MIL-C-8837 Coating, Cadmium (Vacuum Deposited)
MIL-T-10727 Tin Plating, Electrodeposited or Hot-Dipped, for Ferrous and
Nonferrous Metals
MIL-S-11030 Sealing Compound, Non-curing, Polysulfide Base
MIL-S-11031 Sealing Compound, Adhesive, Curing (Polysulfide Base)
MIL-L-11195 Lacquer, Lusterless, Hot Spray
MIL-P-11414 Primer Coating, Lacquer Rust Inhibiting
MIL-V-12276 Varnish Phenolic, Baking
MIL-T-12664 Treatment, Fungus Resistant, Paranitrophenol, for Cork Products
MIL-C-13335 Coatings for Magnesium and Magnesium Alloys
MIL-L-13762 Lead Alloy Coating, Hot Dip (for Iron and Steel Parts)
MIL-L-13808 Lead Plating (Electrodeposited)
MIL-C-13924 Coating, Oxide, Black for Ferrous Metals
MIL-F-14072 Finishes for Ground Electronic Equipment
MIL-P-14105 Paint Heat Resisting (for Steel Surfaces)
MIL-C-14538 Chromium Plating, Black (Electrodeposited)
MIL-C-14550 Copper Plating (Electrodeposited)
MIL-P-14553 Primer Coating, Dipping Automotive
MIL-E-15090 Enamel, Equipment, Light Gray (Formula 11)
MIL-P-15328 Primer (Wash), Pretreatment, (Formula No. 117 for Metals)
MIL-P-15931 Paint, Anti-fouling, Vinyl (Formula No. 121 and No. 129)
MIL-C-16173 Corrosion Preventive Compound, Solvent Cutback, Cold
Application
DOD-P-16232 Phosphate Coatings, Heavy Manganese or Zinc Base (for
Ferrous Metals)
MIL-E-16663 Enamel, Semi-gloss (for Metal Surfaces of Ammunition and
Ammunition Containers)
MIL-C-17711 Coatings, Chromate, for Zinc Alloy Castings and Hot-Dip
Galvanized Surfaces
MIL-F-18264 Finishes, Organic; Weapons Systems, Application and
Control of
MIL-P-18317 Plating, Black Nickel (Electrodeposited) on Brass, Bronze, or
Steel
MIL-L-19538 Lacquer, Acrylic Nitrocellulose, Camouflage (for Aircraft use)
MIL-C-20218 Chromium Plating, Electrodeposited, Porous
MIL-P-20689 Plastic, Plastisol (for Coating Metallic Objects)
MIL-P-21563 Paint System, Fluorescent for Aircraft Application
MIL-P-21600 Paint System, Fluorescent, Removable, for Aircraft
Application
MIL-P-22332 Paint, Priming, Exterior and Interior (for Ammunition)

MIL-P-22735	Film, Elastomeric, Fluorescent, for Weapon Systems
MIL-C-22750	Coating, Epoxy-polyamide
MIL-D-23003	Deck Covering Compound Nonslip, Lightweight
MIL-C-23217	Coating, Aluminum, Vacuum Deposited
DOD-C-23236	Paint Coating Systems, Steel Ship Tank, Fuel and Salt Water Ballast
MIL-P-23377	Primer Coating, Epoxy Polyamide, Chemical and Solvent Resistant
MIL-P-23408	Plating, Tin-Cadmium (Electrodeposited)
MIL-C-23422	Chromium Plating, (Electrodeposited)
MIL-I-24092	Insulating Varnish, Electrical, Impregnating, Solvent Containing
MIL-C-24441	Paint, Epoxy-polyamide, General Specification for
DOD-E-24607	Enamel, Interior, Nonflaming (Dry) Chlorinated Alkyd Resin
MIL-E-24635	Enamel, Silicone Alkyd Co-polymer
MIL-P-26915	Primer Coating, Zinc Dust Pigmented, for Steel Surfaces
MIL-P-27418	Plating, Soft Nickel (Electrodeposited), Sulfamate Bath
MIL-C-27725	Coating, Corrosion Preventive, for Aircraft Integral Fuel Tanks
MIL-P-38336	Primer Coating, Inorganic, Zinc Dust Pigmented, Self-Curing, for Steel Surfaces
MIL-A-40147	Aluminum Coating (Hot-Dip) for Ferrous Parts
MIL-M-45202	Magnesium Alloys, Anodic Treatment for
MIL-G-45204	Gold Plating (Electrodeposited)
MIL-P-45209	Palladium Plating (Electrodeposited)
MIL-I-46058	Insulating Compound, Electrical (for Coating Printed Circuit Assemblies)
MIL-L-46064	Lead Tin Alloy Coating (Electrodeposited)
MIL-P-46085	Rhodium Plating (Electrodeposited)
MIL-P-46105	Primer Coating, Weld-through Zinc-rich
MIL-C-46168	Coating, Aliphatic Polyurethane, Chemical Agent Resistant
MIL-P-47141	Plating, Ternary Alloy (Electrodeposited)
MIL-P-47184	Plating, Nickel Tungsten, Electrodeposit on Aluminum Alloys, by Selective (Brush) Method
MIL-P-50002	Phosphate Coating Compounds for Phosphatizing Ferrous Metals
MIL-L-52043	Lacquer, Semi-gloss, Cellulose Nitrate
MIL-E-52835	Enamel, Modified Alkyd, Camouflage, Lusterless
MIL-E-52891	Enamel, Lusterless, Zinc Phosphate, Styrenated Alkyd Type
MIL-P-53022	Primer, Epoxy Coating, Corrosion Inhibiting, Lead & Chromate Free
MIL-P-53030	Primer Coating, Epoxy, Water Reducible, Lead & Chromate Free
MIL-P-53039	Coating, Aliphatic Polyurethane, Single Component, Chemical Agent Resistant

MIL-C-62218 Corrosion Preventive Compounds, Cold-Application (For New and Fielded Motor Vehicles and Trailers)

MIL-L-81352 Lacquer, Acrylic

MIL-C-81562 Coating, Cadmium, Tin-Cadmium, and Zinc (Mechanically Deposited)

MIL-C-81706 Chemical Conversion Materials for Coating Aluminum and Aluminum Alloys

MIL-P-81728 Plating, Tin Lead (Electrodeposited)

MIL-S-81733 Sealing and Coating Compound, Corrosion Inhibiting

MIL-C-81740 Coating, Aluminum and Aluminum Alloys (Metallic Compound Decomposition)

MIL-C-81751 Coating, Metallic Ceramic

MIL-C-81797 Coating, Inorganically Bonded Aluminum (Electrophoretically deposited)

MIL-A-81801 Anodic Coating for Zinc and Zinc Alloys

MIL-C-83019 Coating, Polyurethane, for Protection of Integral Fuel Tank Sealing Compound

MIL-C-83445 Coating System, Polyurethane Non-yellowing, White, Rain Erosion Resistant Thermally Reflective

MIL-C-83231 Coatings, Polyurethane, Rain Erosion Resistant for Exterior Aircraft and Missile Plastic Parts

MIL-C-83286 Coating, Urethane, Aliphatic Isocyanate, for Aerospace Application

MIL-C-83488 Coating Aluminum Ion Vapor Deposited

MIL-C-87115 Coating, Immersion Zinc Flake/Chromate Dispersion

STANDARDS

MILITARY

MIL-STD-171 Finishing of Metal and Wood Surfaces

MIL-STD-186 Protective Finishing for Army Missile Weapons Systems

MIL-STD-193 Finishing Procedures, Tactical Vehicles (Tracked and Wheeled)

MIL-STD-194 Systems for Painting and Finishing Fire-Control Materiel

MIL-STD-753 Corrosion Resistant Steel Parts, Sampling, Inspection, and Testing or Surface Passivation

MIL-STD-808 Finishes, Protective, and Codes for Finishing Schemes for Ground Support Equipment

MIL-STD-865 Brush Plating, Electro Deposition

MIL-STD-868 Nickel Plating, Low Embrittlement, Electrodeposition

MIL-STD-870 Cadmium Plating, Low Embrittlement, Electrodeposition

MIL-STD-1303 Painting of Naval Ordnance Equipment

MIL-STD-1501 Chromium Plating, Low Embrittlement, Electrodeposition

MIL-STD-1503 Preparation of Aluminum Alloys for Surface Treatments and Inorganic Coatings

MIL-STD-2000 Standard Requirements for Soldered Electrical and Electronic Assemblies

HANDBOOKS

MILITARY

MIL-HDBK-132 Protective Finishes for Metal and Wood Surfaces

(Unless otherwise indicated, copies of specifications, standards, and handbooks, are available from the Standardization Document Order Desk, 700 Robbins Avenue, Building 4D, Philadelphia, PA 19111-5094.)

2.2 Non-Government publications. The following documents forms a part of this document to the extent specified herein. Unless otherwise specified, the issues of the documents which are DoD adopted are those listed in the latest issue of the DoDISS, and supplement thereto.

SOCIETY OF AUTOMOTIVE ENGINEERS (SAE)

AMS 2400	Cadmium Plating
AMS 2401	Cadmium Plating, Low Hydrogen Content Deposit
AMS 2402	Zinc Plating
AMS 2403	Nickel Plating, General Purpose
AMS 2404	Electroless Nickel Plating
AMS 2405	Electroless Nickel Plating Low Phosphorus
AMS 2406	Chromium Plating, Hard Deposit (DoD Adopted)
AMS 2407	Chromium Plating, Porous
AMS 2408	Tin Plating
AMS 2410	Silver Plating, Nickel Strike, High Bake (DoD Adopted)
AMS 2411	Silver Plating, for High Temperature Applications
AMS 2412	Silver Plating, Copper Strike, Low Bake (DoD Adopted)
AMS 2414	Lead Plating
AMS 2415	Lead and Indium Plating (DoD Adopted)
AMS 2418	Copper Plating (DoD Adopted)
AMS 2419	Cadmium-Titanium Alloy Plating (DoD Adopted)
AMS 2422	Gold Plating, Electronic Applications
AMS 2423	Nickel Plating, Hard Deposit
AMS 2424	Nickel Plating, Low Stressed Deposit (DoD Adopted)
AMS 2425	Gold Plating, for Thermal Control (DoD Adopted)
AMS 2426	Cadmium Plating, Vacuum Deposition
AMS 2468	Hard Coating Treatment of Aluminum Alloys
AMS 2469	Process and Performance Requirements for Hard Coating Treatment of Aluminum Alloys (DoD Adopted)
AMS 2470	Anodic Treatment of Aluminum Alloys, Chromic Acid Process
AMS 2471	Anodic Treatment of Aluminum Alloys, Surfacing Acid Process, Undyed Coating

AMS 2472	Anodic Treatment of Aluminum Base Alloys, Sulfuric Acid Process, Dyed Coating
AMS 2473	Chemical Treatment for Aluminum Alloys, General Purpose Coating
AMS 2474	Chemical Treatment for Aluminum Base Alloys (Low Electrical Resistance Coating)
AMS 2475	Protective Treatments, Magnesium Base Alloys
AMS 2476	Electrolytic Treatment, Magnesium Base Alloys, Alkaline Type, Full Coating
AMS 2478	Anodic Treatment of Magnesium Base Alloys, Acid Type, Full Coat
AMS 2479	Anodic Treatment of Magnesium Base Alloys, Acid Type, Thin Coat
AMS 2480	Phosphate Treatment, Paint Base
AMS 2481	Phosphate Treatment, Anti-Chafing

(Application for copies should be addressed to the Society of Automotive Engineers, 400 Commonwealth Drive, Warrendale PA 15096).

AMERICAN SOCIETY FOR TESTING AND MATERIALS (ASTM)

ASTM A123	Zinc (Hot-Galvanized) Coatings on Products Fabricated for Rolled, Pressed, and Forged Steel Shapes, Plates, Bars, and Strip, Specification for (DoD Adopted)
ASTM A153	Zinc Coating (Hot Dip) on Iron and Steel Hardware, Specification for (DoD Adopted)
ASTM A164	Electrodeposited Coatings of Zinc on Steel, Specification for
ASTM A165	Electrodeposited Coatings of Cadmium on Steel, Specification for
ASTM A380	Cleaning and Descaling Stainless Steel Parts, Equipment and Systems, Recommended Practice for (DoD Adopted)
ASTM A623	Tin Mill Products, General Requirements for (DoD Adopted)
ASTM A624	Tin Mill Products, Electrolytic Tin Plate Single Reduced (DoD Adopted)
ASTM A626	Tin Mill Products, Electrolytic Tin Plate Double Reduced (DoD Adopted)
ASTM A630	Determination of Tin Coating Weights for Hot-Dip & Electrolytic Tin Plate (DoD Adopted)
ASTM B177	Chromium Plating on Steel for Engineering Use, Recommended Practice for
ASTM B200	Electrodeposited Coatings of Lead and Lead-Tin Alloys on Steel and Ferrous Alloys, Specification for
ASTM B201	Chromate Coatings on Zinc and Cadmium Surfaces, Recommended Practice for Testing
ASTM B253	Preparation of and Electroplating on Aluminum Alloys by the Zincate Process, Recommended Practice for

ASTM B454	Mechanically Deposited Coatings of Cadmium and Zinc on Ferrous Metals, Specification for
ASTM B456	Electrodeposited Coatings of Nickel/Cadmium, Specification for
ASTM B488	Electrodeposited Coatings of Gold for Engineering Uses, Specification for (DoD Adopted)
ASTM B499	Coating Thicknesses by the Magnetic Method, Nonmagnetic Coatings on Magnetic Basis Metals, Measurement of (DoD Adopted)
ASTM B545	Electrodeposited Coatings of Tin, Specification for (DoD Adopted)
ASTM B579	Electrodeposited Coatings of Tin-Lead Alloy (Solder Plate), Specification for (DoD Adopted)
ASTM B580	Anodic Oxide Coatings on Aluminum, Specification for (DoD Adopted)
ASTM B633	Zinc on Iron & Steel, Electrodeposited Coatings of (DoD Adopted)
ASTM D2092	Preparation of Zinc-Coated Steel Surfaces for Painting, Recommended Practices for (DoD Adopted)

(Applications for copies should be addressed to the American Society for Testing and Materials, 1916 Race Street, Philadelphia PA 19103-1187.)

(Non-Government standards and other publications are normally available from the organizations that prepare or distribute the documents. *These documents also may be available in or through libraries or other informational services.*)

2.3 Order of precedence. In the event of a conflict between the text of this handbook and those of MIL-STD-171, specifications or drawings, the requirements of drawings should have first preference, those of specifications next, MIL-STD-171 next, and those of this handbook last.

2.4 Controlling specifications and handbooks. See appendix for controlling material and process specifications and handbooks.

3. DEFINITIONS

NOT APPLICABLE

4. GENERAL REQUIREMENTS

4.1 MATERIALS. All materials used should conform to the requirements of the applicable specification. Types, classes, grades, etc., should be specified by the acquisition activity.

5. DETAILED REQUIREMENTS

5.1 Finish Codes. Codes which may be specified on Engineering drawings are presented in table I through III. The tables cover the following types of finishes:

- Type I. Chemical Coatings
- Type II. Metallic Coatings
- Type III. Organic Coatings

5.2 Supplementary notes. Supplementary notes may be required on the drawings to complete the identification of a finish when a specification offers options. Not every combination is covered by code in this handbook. Drawing notes should be prepared as required.

5.3 Manufacturers' options. If the finish of a part is to be specified by the manufacturer, the basic code for a specification (e.g. Code 1010 for Cadmium Plate in accordance with QQ-P-416) may be specified. The degree of freedom of selection of types, classes, etc., by the designer or manufacturer, however, is still governed by the system specifications or the particular material specification.

5.4 Multiple finish. A drawing for a part or assembly may have to reflect more than one finish or a partial finish. Such a drawing should contain codes and notes to identify the finishes with the appropriate areas or zones.

5.5 Example codes

5.5.1 Actuator casing. An actuator casing of forged 2014-T6 aluminum alloy is to be repro cured for use on a weapon system requiring MIL-F-7179, type II protection. The part is interior to the aircraft. One code appropriate for this application is MIL-HDBK-1516, A-3105 with MIL-A-8625, class 1, noted on the drawing. In view of features and disadvantages of the three types under MIL-A-8625 it was determined that any type would be acceptable. Type II is the most likely to be supplied due to lowest cost. The coating will be sealed since this is required unless otherwise specified. Two coats of zinc chromate primer, TT-P-1757 are specified since this requirement conforms to the interior protection requirement of MIL-F-7179 (type II, class E).

5.5.2 Carbon steel fitting. A low strength, medium carbon steel special shaped fitting to be repro cured assembles to aluminum alloy airframe. An appropriate finish is MIL-HDBK-1516, 1012/3105 (cadmium plate, chromate treatment and two coats of primer).

5.5.3 Magnesium skin assembly. A skin assembly consists of AZ31B–H24 magnesium skin to which 2024–T3 aluminum stiffeners are riveted. It will be necessary to differentiate between finish for magnesium and finish for aluminum as follows:

- a. Finish for aluminum alloy parts should be MIL–HDBK–1516, CC/3105.
- b. Finish for magnesium alloy skin should be MIL–HDBK–1516, NB/3104, on interior surface and NB/2101 Color No. 16473 in accordance with FED–STD–595 on exterior surface.
- c. Treat faying surfaces in accordance with MIL–F–7179.

5.6 Table arrangement. Tables I, II, and III provide codes for specific materials and processes. The first column CODE identifies the code letter or number of a material/process. The NOMENCLATURE column cites the controlling specification title or identifies the material/process. The specification/handbook alpha–numeric identification is cited in the column CONTROLLING SPECIFICATION. In some cases, classification (types, grades, classes) of the specification is also coded. If specification classification is not coded, type, grade, or class may be added to the code or added to notes. The FEATURES column briefly notes information about the material/process, its intended use, and application. The final column SYSTEM SPECIFICATION identifies the system specifications that call out the treatment or coating and provide, as applicable, the system specification coding scheme.

6. NOTES

6.1 Subject term (key word) listing.

- Aluminum alloys
- Anodic coating
- Black oxide coating
- Cadmium plating
- Chemical coatings
- Magnesium Alloy
- Metallic coatings
- Phosphate coatings
- Organic coatings

6.2 Changes from previous issue. Vertical lines or asterisks are not used in this revision to identify changes with respect to the previous issue due to the extensiveness of the changes.

TABLE 1. Chemical Coatings

Code	Nomenclature	Controlling Specifications	Features	System Specifications
A	Anodic Coatings for Aluminum Alloy	MIL-A-8625	Aluminum oxide coatings that are formed by an electrochemical process. and provides base for paints and dry film lubes. Imparts corrosion resistance. Required coatings for parts subject to erosion, abrasion and wear and for exterior surfaces exposed to sea water environment. Available dyed (class 2) or nondyed (class 1). Class 1 is furnished unless otherwise specified See Code C below for MIL-C-5541. Reference: MIL-HDBK-132A, Para 5.9 and 5.10 (ASTM B580) 1/	MIL-S-5002 MIL-STD-194A (Table VII) MIL-T-704J (3.2.2) MIL-STD-808A (D-350) MIL-F-14072C (E511)
		Type 1B	Chromic acid anodize. Uses a lower voltage (current density) process than the Type I to overcome the 5% copper, 7% silicon, or 7.5% total alloying elements limitations. AC	
AC		Type I	Chromic acid anodize. Not suitable for aluminum alloys containing over 5% copper, 7% silicon, or 7.5% total alloying elements. Best flexibility and least reduction of fatigue life of the three types. Coating thickness available from 0.005 to 0.3 mil. Required to be sealed unless otherwise specified. Reference: (ASTM B580, AMS 2470)	MIL-STD-171D (7.1) MIL-STD-186D (201) MIL-STD-193K (Table V) MIL-STD-194A (Table VII)

1/ () indicates similar industry specifications.

TABLE I. Chemical Coatings. (Continued)

Code	Nomenclature	Controlling Specifications	Features	System Specifications
AS		Type II	<p>Sulfuric acid anodize. Heavier (higher density) coating than Type I or Type IB. Least expensive of the three types Coating thickness available from 0.05 to 1 mil. Coating thickness over 0.5 mil will have the same fatigue disadvantages as type III. Required to be sealed unless otherwise specified. Corrosion resistance of dyed (class 2) coatings may be improved by duplex sealing with sodium dichromate either during or after sealing with nickel acetate. Reference: ASTM B580, AMS 2471 for Class 1 AMS 2472 for Class 2</p>	<p>MIL-STD-171D (7.2) MIL-STD-186D (202) MIL-STD-193K (Table V) MIL-STD-194A (Table VII)</p>
AH		(MIL-A-8625).	Replaces cancelled document MIL-C-60536	
AB		(MIL-A-8625)	Replaces cancelled document MIL-C-60539	
AW		MIL-A-8625 Type III	<p>Hard anodize, produced by proprietary baths. Provides wear and abrasion resistance with best corrosion resistance of the three types. Sealing should be specified when both abrasion and corrosion resistance are required. Sealing should be disallowed for maximum degree of abrasion resistance.</p>	<p>MIL-STD-171D (7.5) MIL-STD-186D (207) MIL-STD-193K (Table V) MIL-F-14072C (E514).</p>

TABLE I. Chemical Coatings. (Continued)

Code	Nomenclature	Controlling Specifications	Features	System Specifications
AW		MIL-A-8625 Type III	Coating thickness available from 0.5 to 4 mils. Dimension building equals 1/2 coating thickness. Not recommended for use where restoration of dimensions due to wear is planned. <i>Coating will reduce fatigue strength.</i> Thick films are brittle and inflexible. Not suited for thin sheet. Reference: (ASTM B580, AMS 2468, and AMS 2469)	
C	<u>Chemical Films for Aluminum Alloys</u>	MIL-C-5541 MIL-C-81706	Chromate conversion coatings ^{1/} intended as corrosion preventive films for aluminum alloys. May be used in lieu of MIL-A-8625 anodic films where: 1) resistance to wear, abrasion, or erosion are not required. 2) Paint is to follow or where electrical conductivity is essential. Approved for use in touchup damaged MIL-A-8625 anodic coatings. Furnished as liquid (form I), powder (form II), or ready to use premix (form III), under MIL-C-81706.* Solution may be applied by spray brush, or dip (methods A, B, or C).	MIL-S-5002 MIL-STD-193K (Table IV) MIL-STD-808A(D-351) MIL-T-704J (3.2.2) MIL-STD-171D (7.3)

^{1/} Conversion coatings do not possess the corrosion resistance of anodic coatings.

N	Chemical Films for Magnesium Alloys	MIL-M-3171	Chemical conversion coatings for magnesium alloys. Normally authorized on Air Force Weapon systems only for touchup of anodic coatings or for temporary protection.	MIL-S-5002 MIL-STD-186D(209) MIL-STD-808A (5.4.2)

TABLE I. Chemical Coatings. (Continued)

Code	Nomenclature	Controlling Specifications	Features	System Specifications
N	Chemical Films for Magnesium Alloys	MIL-M-3171	All types, except type I, provide no appreciable dimensional change. Suitable for close to tolerance surfaces. Reference: MIL-HDBK-132A, Para 4.5 and 13.3 (AMS 2475)	
NA		MIL-M-3171 Type I	Chrome pickle treatment for all magnesium alloys. (DOW 1, MACroMAG 101). Poor paint base Temporary protection only. Electrically conductive; suitable for electrical bonding. Not suitable for close tolerance surfaces. Remove approximately 0.6 mil of metal from each surface. Touchup treatment for all types of magnesium treatments. May be brushed applied, though tank application gives best results. Temperature limit, 450°F.	MIL-STD-171D (8.2) MIL-STD-194A (Table VIII) MIL-T-704J (3.2.3) MIL-STD-193K (Table II)
NB		Type III	Dichromate treatment (Dow 7, MACroMAG D-7). Best paint base and best corrosion protection of the MIL-M-3171 treatments. Not suitable for magnesium alloys EK30A, EK41A, HM21A, HM31A, LA141A, HK31A, and MIA. Temperature limit, 550°F.	MIL-STD-171D (8.4) MIL-STD-194A (Table VIII) MIL-STD-808 (F-400, F-401) MIL-T-704J (3.2.3) MIL-STD-193K (Table II)

TABLE I. Chemical Coatings. (Continued)

Code	Nomenclature	Controlling Specifications	Features	System Specifications
NC		MIL-M-3171 Type IV	Galvanic anodic treatment, (Dow 9, MACroMAG D-9) For all alloys not treatable by Type III though suitable for all alloys. Blackening treatment. Very good paint base. Requires electrochemical (bath) deposition. Temperature 500°F	MIL-STD-171D (8.5) MIL-STD194A (Table VIII)
ND		Type VI	Chromic acid brush-on treatment. (Dow 19, MACroMAG D-19). For temporary protection and touchup of all magnesium treatments. Generally used for parts too large to be immersed for MIL-M-45202 or MIL-M-3171. Type IV, treatments. Preferred over Type I for brush-on or touchup due to less harmful effect of residual solution lower toxicity, lower cost, and less critical application procedures. Temperature limit 450°F	MIL-STD-171D (8.6)
NE		Type VII	Fluoride anodize plus corrosion preventive chromate post treatment. (Magnesium Electron). Replaces certain cleaning and pickling operations. Good base for other treatments, such as Type III.	MIL-STD-171D (8.8)

TABLE I. Chemical Coatings. (Continued)

Code	Nomenclature	Controlling Specifications	Features	System Specifications
NF		M-3171 Type VIII	Chromate treatment. (Iridite 15). Alternate treatment for types I, III, VI, or VII when approved by the procuring activity. Applied by dip or brush. Temperature limit, 550°F.	MIL-STD-171D (8.9)
Q	Phosphate Coatings for ferrous metals	TT-C-490	Steel parts to be phosphated and painted shall receive phosphate treatment conforming to TT-C-490, Type I. Steel parts to be given supplementary oil or preservative shall be treated in accordance with MIL-P-16232. Phosphate processes are embrittling to high strength steels. Reference: MIL-HDBK-132A, Para. 4.3 10.2, 10.3, (AMS 2473, AMS 2480, AMS 2481)	MIL-S-5002 MIL-STD-171D (Table V) MIL-STD-193K (Table V) MIL-STD-194A (Table VI; Item 4) MIL-T-704J (3.2.1) MIL-STD-808A (F-100) MIL-F-14072C(ER) (P211)
QA	Zinc phosphate	TT-C-490 Type I	Zinc phosphate treatment for parts which will receive subsequent organic coatings. Best of the phosphate as a paint base and corrosion preventive. Inhibits underpaint corrosion. Coating weights - 150 mg/ft ² for spray application and 300 mg/ft ² for immersion application (minimum values).	MIL-S-5002 MIL-STD-171D (5.1.1) MIL-STD-186D(210) MIL-T-704J (3.2.1)

TABLE I. Chemical Coatings, (Continued)

Code	Nomenclature	Controlling Specifications	Features	System Specifications
QM	Manganese Phosphate	DOD-P-16232 Type M (MIL-P-50002)	Heavy manganese phosphate coating intended primarily as a lubricant or preservative retainer, wear resistant. Commonly used on bearing surfaces to facilitate break-in and to maintain lubricity. More resistant than zinc phosphate coating to alkaline environment. Serviceability of the coating without supplementary treatment is poor. Chemically converted (Class 4) coatings provides improved corrosion prevention. Coating weight - 1500 mg/ft ² minimum. (Thickness - 0.2 to 0.4 mil). Temperature limit, 250°F.	MIL-S-5002 MIL-STD-171D (5.3.1) MIL-STD-193K (Table V)
QMA		Type M, Class 1	Manganese phosphate, with preservative oil treatment as specified by the procuring activity.	MIL-STD-171D (5.3.1.1)
QMB		Type M, Class 2	Manganese phosphate, with lubricating oil in accordance with MIL-L-3150	MIL-STD-171D (5.3.1.2) MIL-F-14072C(E211)

TABLE I. Chemical Coatings. (Continued)

Code	Nomenclature	Controlling Specifications	Features	System Specifications

MIL-P-18317	Plating, Black Nickel (Electrodeposited) on Brass, Bronze, or Steel	1225
MIL-L-19537	Lacquer, Acrylic Nitrocellulose Gloss (for Aircraft use)	2100
MIL-L-19538	Lacquer, Acrylic Nitrocellulose, Camouflage (for Aircraft use)	2100

<u>Specification Identification</u>	<u>Title</u>	<u>MIL-HDBK-1516 Code No.</u>
MIL-C-20218	Chromium Plating, Electrodeposited, Porous	1161
MIL-P-20689	Plastic, Plastisol (for Coating Metallic Objects)	2276
MIL-T-21330	Treatment, Insect Resistant, for Paper	TD
MIL-P-21563	Paint System, Fluorescent for Aircraft Application	5300
MIL-P-21600	Paint System, Fluorescent, Removable, for Aircraft Application	5335
MIL-P-22332	Paint, Priming, Exterior and Interior (for Ammunition)	2590
MIL-P-22636	Primer Coating, for Red Fuming Nitric Acid Resistant Paint	2560
MIL-P-22735	Film, Elastomeric, Fluorescent, for Weapon Systems	5310
MIL-C-22750	Coating, Epoxy-polyamide	2360
MIL-C-22751	Coating System, Epoxy-polyamide, Chemical and Solvent Resistant, Process for Application of	2292
MIL-D-23003	Deck Covering Compound Non-slip, Lightweight	5110
MIL-C-23217	Coating, Aluminum, Vacuum Deposited	1060
DOD-C-23236	Paint Coating Systems, Steel Ship Tank, Fuel and Salt Water Ballast	5334
MIL-T-12879	Treatment, Chemical Prepaint and Corrosion Inhibitive, for Zinc Surfaces	Z
MIL-S-13518	Wood Preservative, Tetrachlorophenol and Pentachlorophenol, Surface Sealing Compound	3507
MIL-L-13762	Lead Alloy Coating, Hot Dip (for Iron and Steel Parts)	1515
MIL-L-13808	Lead Plating (Electrodeposited)	1510
MIL-C-13924	Coating, Oxide, Black for Ferrous Metals	R
MIL-F-14072	Finishes for Ground Electronic Equipment	System Specification
MIL-P-14105	Paint Heat Resisting (for Steel Surfaces)	5260
MIL-P-14458	Paint, Rubber, Red Fuming Nitric Acid Resistant	2570
MIL-C-14486	Lacquer, Vinyl Resin, Semi-gloss	2110
MIL-C-14538	Chromium Plating, Black (Electrodeposited)	1160
MIL-C-14550	Copper Plating (Electrodeposited)	1420
MIL-P-14553	Primer Coating, Dipping Automotive	2255, 2500
MIL-E-15090	Enamel, Equipment, Light Gray (Formula 11)	2299
MIL-P-15328	Primer (Wash), Pretreatment, (Formula No. 117 for Metals)	2210, 2282
MIL-P-15929	Primer Coatings, Shipboard, Vinyl-Red Lead (Formula No. 119)	2295
MIL-P-15930	Primer Coating, Shipboard, Vinyl-Zinc Chromate (Formula No. 120 - for Hot Spray)	2260
MIL-P-15931	Paint, Anti-fouling, Vinyl (Formula No. 121 and No. 129)	5336
MIL-P-15935	Paint, Outside, Gray (Vinyl alkyd) (Formula No. 122-11)	2294
MIL-E-15936	Enamel, Exterior, Gray, No. 27 (Vinyl-alkyd)	2293
MIL-T-16070	Treatment, Mildew-Resistant, for Rope	TB
MIL-C-16173	Corrosion Preventive Compound, Solvent Cutback, Cold Application	R
DOD-P-16232	Phosphate Coatings, Heavy Manganese or Zinc Base (for Ferrous Metals)	QM
MIL-P-23377	Primer Coating, Epoxy Polyamide, Chemical and Solvent Resistant (Primer for Code 2200, 2300, 2802)	2200, 2225
MIL-P-23408	Plating, Tin-Cadmium (Electrodeposited)	1440
MIL-C-23422	Chromium Plating, (Electrodeposited)	1180

Specification Identification	Title	MIL-HDBK-1516 Code No.
MIL-C-23675	Coating, Anti-fouling, Hull Bottom for Weapons Systems	5333
MIL-I-24092	Insulating Varnish, Electrical, Impregnating, Solvent Containing	5346
MIL-C-24441	Paint, Epoxy-polyamide, General Specification for (MIL-C-22441 -1 thru -7)	2291
MIL-L-25142	Luminescent Material, Fluorescent	2288
MIL-C-26074	Coating, Electroless, Nickel, Requirements for	1210
MIL-P-26915	Primer Coating, Zinc Dust Pigmented, for Steel Surfaces	2281
MIL-C-27227	Coating, Polyurethane, for Aircraft Application	2802
MIL-C-27315	Coating System, Elastomeric, Thermally Reflective and Rain Erosion Resistant	5200 2703
MIL-P-27418	Plating, Soft Nickel (Electrodeposited), Sulfamate Bath	1226
MIL-C-27725	Coating, Corrosion Preventive, for Aircraft Integral Fuel Tanks	5520
MIL-A-38267	Application of Polyurethane Fuel Tank Coatings	5520
MIL-P-38336	Primer Coating, Inorganic, Zinc Dust Pigmented, Self-Curing, for Steel Surfaces	2280
MIL-A-40147	Aluminum Coating (Hot-Dip) for Ferrous Parts	1045
MIL-M-45202	Magnesium Alloys, Anodic Treatment for	M
MIL-G-45204	Gold Plating (Electrodeposited)	1350
MIL-P-45209	Palladium Plating (Electrodeposited)	1470
MIL-I-46058	Insulating Compound, Electrical (for Coating Printed Circuit Assemblies)	5344
MIL-L-46064	Lead Tin Alloy Coating (Electrodeposited)	1450
MIL-P-46085	Rhodium Plating (Electrodeposited)	1480
MIL-P-46093	Primer Coating, Synthetic (for Brake Drums)	2275
MIL-E-46096	Enamel, Lusterless, Quick Drying, Styrenated Alkyd Type, Solar Heat Reflecting	5250
MIL-P-46105	Primer Coating, Weld-through Zinc-rich	5345
MIL-E-46117	Enamel, Alkyd, Lusterless, Solar Heat Reflecting, Olive Drab	5210
MIL-C-46127	Coating, Gray, Undercoat (Solar Heat Reflecting)	5230
MIL-E-46136	Enamel, Semi-gloss, Alkyd, Solar Heat Reflecting, Olive Drab	5220
MIL-E-46138	Lacquer, Lusterless, Acrylic-Nitrocellulose, Solar Heat Reflecting, Olive Drab	5240
MIL-E-46139	Enamel, Semi-gloss, Rust-inhibiting Solar Heat Reflecting, Olive Drab	5235
MIL-L-46142	Lacquer, Lusterless, Solar Heat Reflecting	5245
MIL-L-46159	Lacquer, Acrylic, Low Reflective	5245
MIL-C-46168	Coating, Aliphatic Polyurethane, Chemical Agent Resistant	2279
MIL-S-46844	Solder Bath Soldering of Printed Wire Assemblies	1460
MIL-P-46847	Plastic Material, Foamed Polyurethane for Encapsulating Electronic Components	5343
MIL-P-46856	Primer Coating Epoxy, Process, for Application of	2290
MIL-P-47141	Plating, Ternary Alloy (Electrodeposited)	1520
MIL-P-47184	Plating, Nickel Tungsten, Electrodeposit on Aluminum Alloys, by Selective (Brush) Method	1250
MIL-P-50002	Phosphate Coating Compounds for Phosphatizing Ferrous Metals	QM, QZ

<u>Specification Identification</u>	<u>Title</u>	<u>MIL-HDBK-1516 Code No.</u>

MIL-P-52192	Primer Coating, Epoxy	2220
MIL-E-52227	Enamel, Semi-gloss, Quick Drying	2340
MIL-E-52798	Enamel, Alkyd, Camouflage	2278
MIL-E-52835	Enamel, Modified Alkyd, Camouflage, Lusterless	2296
MIL-E-52891	Enamel, Lusterless, Zinc Phosphate, Styrenated Alkyd Type	2118
MIL-L-52909	Lacquer, Acrylic, camouflage, Lusterless	2326
MIL-L-52926	Lacquer, Camouflage, Lusterless Hot Spray, Forest Green	2327
MIL-E-52929	Enamel, Alkyd, camouflage, Flash Dry	2328
MIL-N-55392	Nickel-Carbon, Porous, Electrodeposited for Camouflage	1230
MIL-C-60536	Coating, Anodic Hard for Aluminum and Aluminum Alloys	AH
MIL-C-60539	Coating, Anodic, Conventional for Aluminum and Aluminum Alloys	AB
MIL-L-81352	Lacquer, Acrylic (for Naval Weapons Systems)	2200
MIL-C-81562	Coating, Cadmium, Tin-Cadmium, and Zinc (Mechanically Deposited)	1030
MIL-C-81706	Chemical Conversion Materials for Coating Aluminum and Aluminum Alloys	C
MIL-P-81728	Plating, Tin Lead (Electrodeposited)	1450
MIL-S-81733	Sealing and Coating Compound, Corrosion Inhibiting	5518
MIL-C-81740	Coating, Aluminum and Aluminum Alloys (Metallic Compound Decomposition)	1046
MIL-C-81751	Coating, Metallic Ceramic	1500
MIL-C-81797	Coating, Inorganically Bonded Aluminum Electrochemically deposited	1059
MIL-A-81801	Anodic Coating for Zinc and Zinc Alloys	MZ
MIL-C-83019	Coating, Polyurethane, for Protection of Integral Fuel Tank Sealing Compound	5530
MIL-C-83445	Coating System, Polyurethane Non-yellowing, White, Rain Erosion Resistant Thermally Reflective	2708
MIL-C-83466	Coating, Polyurethane, Aliphatic Isocyanate, Thermal Flux Resistant, for Aerospace Applications	5205
MIL-C-83231	Coatings, Polyurethane, Rain Erosion Resistant for Exterior Aircraft and Missile Plastic Parts	2704, 2705
MIL-C-83286	Coating, Urethane, Aliphatic Isocyanate, for Aerospace Applications	2300, 2310
MIL-C-83488	Coating Aluminum Ion Vapor Deposited	1065
MIL-P-87112	Primer Coating, Elastomeric, Polysulfide Corrosion Inhibiting	2310
MIL-C-87115	Coating, Immersion Zinc Flake/Chromate Dispersion	1325

Specification Identification	Title	MIL-HDBK-1516 <u>Code No.</u>

APPENDIX E

CROSS REFERENCE TO MIL-STD-194A SYSTEMS FOR PAINTING AND FINISHING FIRE-CONTROL MATERIAL

MIL-STD-194A contains the following tables, which specify "items". Paragraph 4.4 of MIL-STD-194A uses MIL-HDBK-1516 Code Numbers 5330 or 5331. MIL-HDBK-1516 Code Numbers are shown in parentheses in the following tables for their respective "items."

Table I of MIL-STD-194A

- Item 1. MIL-STD-171 System 21.5 (2235; 2400)
2. MIL-STD-171 System 21.6 Discontinued, use 21.3
3. MIL-STD-171 System 21.16 Discontinued, use 1.9.3.3 and 21.5 or 21.3
4. MIL-STD-171 System 21.16 Discontinued, use 1.9.3.3 and 21.9
5. MIL-STD-171 System 23.1 (2235; 2530)
6. MIL-STD-171 System 23.2 Discontinued, use 23.1
7. MIL-STD-171 System 21.6 Discontinued, use 21.3
8. MIL-STD-171 System 21.7 (2220; 2480)
9. MIL-STD-171 System 20.11 Discontinued, use 20.8
10. MIL-STD-171 System 20.1 (2420)

APPENDIX F

CROSS REFERENCE TO MIL-STD-808A CODE SYSTEM

**FINISHES, PROTECTIVE, AND CODES, FOR FINISHING SCHEMES
 FOR GROUND AND GROUND SUPPORT EQUIPMENT**

MIL-STD-808A, Paragraph 5.3.2.5 covers Code N in MIL-HDBK-1516
 MIL-STD-808A, Paragraph 5.3.2.2.2 covers Code Z in MIL-HDBK-1516

MIL-STD-808D Finish Code No.	MIL-HDBK-1516 Code No.	MIL-STD-808D Finish Code No.	MIL-HDBK-1516 Code No.
F-100	Q, 2215, and 2240 or 2245	FF-906	2112
F-101	2281	FF-907	5325
F-102	2230	FF-908	2530
F-103	2282 and 2240 or 2245	FF-909	2302; 2802
F-200	2282 and 2235, 2215, or 2460	P-106	1150
F-211	2282, and 2215 or 2240	P-114	1012 or 1013
F-301	A; 2230	P-115	1012
F-302	C; 2282; 2215	P-116	1300
F-303	C; 2282; 2230	P-150(?)	1200
F-400	NB; 2282; 2215	P-161	1016
F-500	3507; 2240	P-162	1015
F-501	3507; 2230	P-163	1300
F-502	3501	P-170	1017
F-503	2112; 3103	D-200	P
FF-905	2630	D-210	RB
		D-350	A
		D-351	C

Most of the finish processes in MIL-STD-808A have, as the last step, a final finish that is selected from Tables II, III, and IV, which list specifications and color code.

Code numbers from MIL-HDBK-1516 for the tables follow:

TABLE II	3503
TABLE III	2330
TABLE IV	2320 or 3503 5260 and 2320 or 3503

Primers for these three tables have the following MIL-HDBK-1516 code numbers:
 2240, 2245, 2215, 2282, or 2281.

APPENDIX K

CROSS REFERENCE TO MIL-F-14072C CODE SYSTEM
 FINISHES FOR GROUND ELECTRONIC EQUIPMENT

MIL-F-14072C is organized by tables:

TABLE I – Involves a 3-step procedure prior to application of the final film, step 4 is Table IA.

- Step 1. Reconditioning. When applicable, corresponds to MIL-HDBK-1516 Code N.
- Step 2. Passivation. Corresponds to MIL-HDBK-1516 Codes Z, A, C, N, or M, when applicable.
- Step 3. Pretreatment/Primer. As listed in 3.9.1, corresponds to MIL-HDBK-1516 Code Nos. 2240; 2245; 2215; 2210; 2260; 2225; and should be specified when applicable. A finish number is assigned in Table I consisting of "P" and a number, for example, "P701.1", which converted to MIL-HDBK-1516 code numbers would result in:

Step 1 = N
 Step 2 = MH
 Step 3 = 2225.

TABLE IA – FINAL PAINT FILM (STEP 4)

Film Designation (MIL-F-14072C)	MIL-HDBK-1516 Code No.
